

Post-Reg Funnel

Don't Let a **Good Lead** Go to Waste!

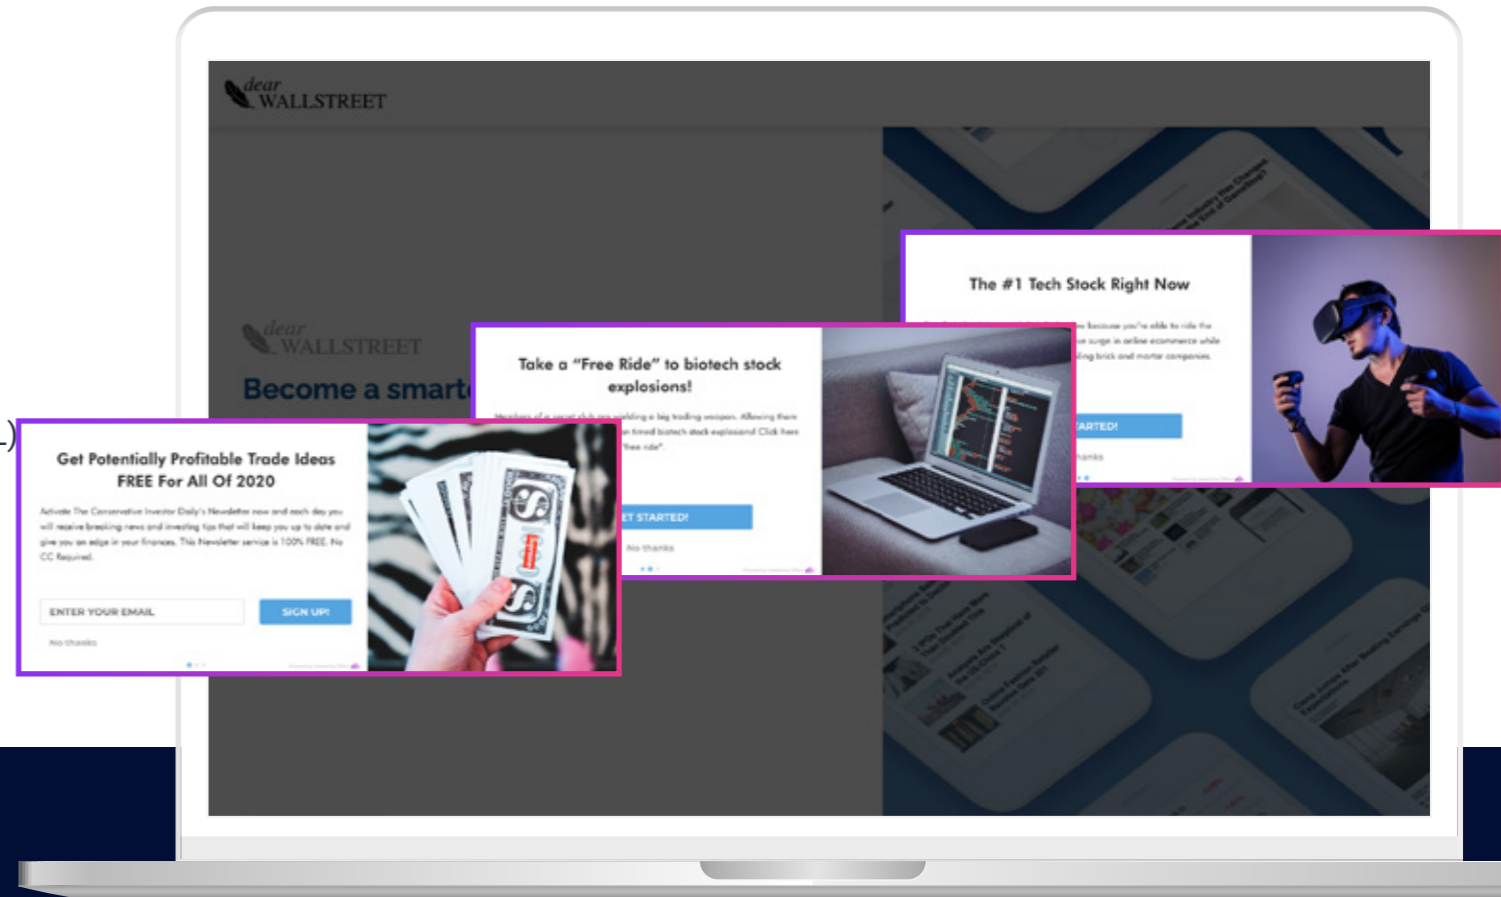

For publishers the biggest priorities heading into 2021 are how to grow revenue they can control.

As the digital advertising industry has matured, new marketing twists have evolved allowing for advanced and creative lead generation opportunities and our **Post-registration Funnel** is becoming one of the brightest spots for publishers' online revenues.

How Does it Work? After someone signs up to your email data base that subscriber is presented with a series of offers that allow you to start earning revenue on those leads instantly.

Publishers can customize different slides, whether it's a registration offer (CPL) or a few natives ads.

The flow of the post registration funnel is entirely up you!

Power to the **Publisher!**

We focus on helping publishers generate revenue by offering Native Ads that blend and flow seamlessly between their content through multiple channels.

It's simple. When someone clicks, you earn money.

Our Native Ad experiences capture a user's attention better than traditional ads would, which means more clicks and more revenue.

Don't just take our word for it!
