

Table of Contents

<i>I. Sprint Speed</i>	8
I.1 Acceleration and Maximum Velocity	9
<i>II. Speed Zones</i>	13
<i>III. Intensity Limits</i>	16
<i>IV. Speed Development Strategies</i>	17
IV.1 Climate/Environmental Conditions	18
IV.1.1 Cold Weather Training Strategies	19
IV.2. Therapy Options.....	30
IV.3. Tolerance to CNS Intensive Loading.....	30
IV.4. Applications for non-track Speed/Power Athletes	31
IV.4.1. Long to Short for Non-Track Speed/Power Athletes.....	32
IV.4.2. Short to Long for Non-Track Speed/Power Athletes.....	34
IV. 5. A Track and Field Discussion	34
<i>V. Tempo</i>	39
V.1. Extensive Tempo	39
V.2. Non-Running Tempo.....	41
V.3. Intensive Tempo.....	42
V. 4. Tempo vs Maximal Aerobic Speed, 300yd Shuttle, and Yo-Yo.....	42
V.4.1. Maximal Aerobic Speed.....	43
V.4.3. The Yo-Yo Test	55
<i>VI. The Utility of Power Speed</i>	57
VI.1. The Drills	57
VI.2. Warm Up- Readiness Assessment.....	58
VI.3. Movement Enhancement.....	59
VI.4. Tempo Alternative.....	60
VI.5. Rehabilitation	60
<i>VII. Task Specific Work Capacity</i>	63
<i>VIII. Implications on Sport Training Load Management</i>	66
<i>IX. Acceleration is a Skill</i>	69
<i>X. Reduction of Non-Contact Injury</i>	70

X.1. Hamstrings as a Barometer of Training Load Management	72
XI. Trainability of speed	78
XI.1. The Value of Speed for Team Sport Athletes	81
XII. The Dynamic Stereotype	83
XIII. Sprint Training Integrated into the Training Load Via the High/Low Method	84
XIV. Applied Sciences	89
XIV.1. Applied Physics	89
XIV.1.1. Initiating a Sprint from a Static Start	89
XIV.1.2. Displacing a Force Vector and Deceleration	92
XIV.1.3. Acceleration	97
XIV.1.4. An Athlete Encountering an Unbalanced Force	98
XIV.1.5. Speed Kills	100
XIV.1.6. Net Force Being Constant, the Lesser the Mass the Greater the Acceleration	101
XIV.1.7. Mass Being Constant, Acceleration is Dependent Upon Increased Net Force Application	102
XIV.1.8. Weights Follow Speed.....	104
XIV.2. Applied Biomechanics.....	109
XIV.2.1. The Start	109
XIV.2.2. Starting from the Prone, Supine, or Side Lying Position	110
XIV.2.2.b. The Prone Position	110
XIV.2.2.c. The Supine Position.....	112
XIV.2.2.d. The Side Lying Position.....	112
XIV.2.3. 2 Points of Contact	113
XIV.2.3.a. One Knee Down.....	113
XIV.2.3.a. 2 Points of Contact- Standing Start Position	115
XIV.2.4. 3- and 4-Point Low Starts.....	116
XIV.2.5. Acceleration + Maximum Velocity	121
XIV.2.5.a. Arm Action	123
XIV.2.5.b. Posture	126
XIV.2.5.c. Leg Action.....	129
XIV.2.5.d. Heel Recovery	132
XIV.2.5.e. Pendulum- Frans Bosch	137
XIV.2.5.f. Position of the Foot Prior to Ground Contact.....	137
XIV.2.6. The Biomechanical Truths of sprinting.....	138
XIV.3. Applied Physiology	140
XIV.3.1. Time is of the essence	141
XIV.3.2. Bioenergetic Training Parameters.....	143
XV.1. Block Start	149
XV.2. Acceleration	150
XV.3. Maximum Velocity	151

<i>XVI. Alactic Speed Work</i>	152
<i>XVII. Applied Sprint Training.....</i>	156
<i>XVIII. Program Examples</i>	170
<i>XIX. Summary.....</i>	199
