

Notice is hereby given that Entergy Arkansas, LLC ("EAL") intends to file with the Arkansas Public Service Commission ("APSC") on or around Monday, October 19, 2026 (the "Application Filing Date"), an Application for approval to construct a battery energy storage system ("BESS" or the "Project") at EAL's existing Driver Solar facility. The proposed Project is located at 3303 U.S. 61 Osceola, Arkansas, in Mississippi County, Arkansas. The approximate location of Driver Solar is shown on the attached map. The Project consists of rechargeable battery modules, a power conversion system, a battery management controller, and safety and cooling infrastructure.

Information relative to the filing, including the Environmental Impact Statement, in this matter may be obtained from the Secretary of the APSC, 1000 Center Street, Little Rock, Arkansas 72201, or on the APSC website, <http://www.apsc.arkansas.gov>, following the Application Filing Date.

Interventions and limited appearances for interested persons should be filed in compliance with the provisions of APSC Rules of Practice and Procedure 23 CAR § 462-402. Petitions for leave to intervene or limited appearances must be filed with the APSC within thirty (30) days of October 19, 2026, the date set forth above as the Application Filing Date, unless good cause is shown pursuant to Ark. Code Ann. § 23-18-517 et seq., and APSC 23 CAR § 462-604.

A public hearing date may be set by the APSC. If a public hearing is set, it would be expected to be held at the APSC building in Little Rock, Arkansas, located at 1000 Center Street. The purpose of any such hearing may include the APSC hearing evidence related to the need for the proposed Project and several other factors, including the general economic and probable environmental impact of the proposed Project; its cost and customer impact; any alternatives; and conformance with project plans and applicable laws so that the APSC can determine whether the proposed Project is reasonable and will serve the public interest. One of the purposes of the hearing is to choose the location with the least generally adverse economic and environmental consequences, and in the course of selecting a location the APSC may modify the proposed location if it is in the public interest. Additionally, the APSC does not award compensation for damages to a landowner; to the extent applicable, any compensation due is awarded by circuit court in an eminent domain proceeding if the applicant and the landowner cannot settle privately.

Additionally, the residents of Mississippi County, other surrounding communities, and other interested persons are cordially invited to a virtual open house for an initial review of information regarding the proposed construction of the Project at the Driver Solar facility. The virtual open house will give area residents and local business owners an opportunity to review the project, submit questions, and provide feedback. Entergy Arkansas representatives will monitor feedback and answer any questions you may have.

The facilities being proposed for construction and a location map can be found at the following link: www.EntergyArkansas.com/Driver.

Please feel free to forward this link to any interested persons who may want to visit this informational webpage. Questions and comments can be submitted through the questionnaire on the webpage. Entergy Arkansas looks forward to providing you this opportunity to review the proposed project and assisting you with any questions, we value your feedback on this exciting project.

If you have any questions regarding the Project, please submit your question by email to: newresource@entergy.com or by calling 501-213-0706 and leaving a voicemail. Your call will be returned as soon as possible.

For further information regarding this matter, contact the office of the Secretary to the APSC and reference APSC Docket No. 26-073-U. Alternatively, you can contact EAL through:
