

A photograph of a church interior, viewed from the back of the sanctuary looking towards the front. Rows of dark wood pews with grey fabric upholstery are visible. In the background, there is a wooden stage with a large pipe organ on the right, a wooden pulpit on the left, and a drum set. A large white projection screen is mounted on the brick wall above the stage. A large purple curved shape is overlaid on the left side of the image.

WORSHIP SEATING

Irwin Seating Company

THE IRWIN DIFFERENCE

For over 100 years, Irwin Seating Company’s focus has been on meeting our customers’ needs with stylish, reliable seating. We understand that the unique design of each sanctuary means what worked well in one space may not work well in yours. We start by asking questions, listening closely to the answers and then tailoring a solution for your specific needs. Our experience and expertise will assist you in every phase of your project; from initial chair selection and budget evaluation to sanctuary layout / design through chair installation and beyond.

We recognize the importance of stewardship and understand seating must be reliable, easy to maintain and comfortable for years to come. Our chairs embody this understanding with quiet, comfortable components that are virtually maintenance free, the use of engineered, impact resistant polymers, heavy gauge steel, and fabrics that pass the industry’s most stringent tests. As the photography shown here illustrates, our extensive product line gives us the ability to compliment almost any architectural approach from traditional to contemporary.

Our service is as strong and reliable as our seating. Every person at Irwin Seating Company is focused on meeting customer needs at every stage of the project. We provide chair design consultation and seating layout CAD services to ensure a proper fit. We manufacture on time and deliver complete. We install your seating using only factory trained and certified installers to ensure integrity. Finally, with our Midwest manufacturing plants we can easily provide parts and restoration services to make sure everything stays functional for as long as your chairs are in use.

TELESCOPIC SEATING

Integra Seating:

The use of retractable systems in multi purpose rooms continues to grow in popularity. Integra has the appearance, comfort and durability required in performance and lecture spaces.

The Integra beam mount system sets a new standard for functionality with the choice of manual or semi-automatic chair operation — both options reduce operation times and require minimal effort. For safety and ease of cleaning, the chair fold down mechanisms are supplied with an attractive and protective dust / debris cover.

To ensure durability, Integra has been engineered to meet all standard industry requirements for spectator seating as well as our own, more rigorous internal testing. Talk with your Irwin Seating representative today and find out if Integra is the right choice for your facility.

Telescopic platforms can be provided without permanent seating for use as choral risers or with folding chairs. Learn more in our telescopic seating brochure or go to irwinseating.com.

Bayside Church
Roseville, California

Prestige Seating:

Take full advantage of your multi-use space with the Prestige Series from Irwin Seating Company. This innovative concept combines auditorium seating with a telescopic system allowing valuable floor space to be used for other functions like dances or banquets.

The Prestige Series is available with our most popular seats and backs like the No. 90 Citation back shown here, and deliver the same level of comfort and stability you've come to expect from us.

Operation of the Prestige Series is made even easier with the industry's first semi-automated, nose mount chair system. This unique design utilizes a spring assist mechanism to aid in raising the backs while dampening the folding motion. Simply activate the chair release mechanism and the backs automatically fold to the stored position. The innovative and patent pending design greatly reduces setup and take-down times, while increasing your overall value.
