

Adding Integers with the Same Sign

Name _____

Date _____ Period _____

To add integers with the same sign...
add their absolute values, then apply the appropriate sign.

Determine the “sign” of the following integers.

4

-6

-8

8

-2

-1

7

3

To add integers with the same sign...
add their absolute values, then apply the appropriate sign.

Add the following integers

$$4 + 6 = +10$$

$$-4 + -6 = -10$$

$$-7 + -5 = -12$$

To add integers with the same sign...
add their absolute values, then apply the appropriate sign.

Add the following integers

$$2 + 9 = +11 \quad 12 + 7 = +19 \quad -4 + -11 = -15$$

To add integers with the same sign...
add their absolute values, then apply the appropriate sign.

Add the following integers

$$-1 + -8 = -9 \quad 13 + 4 = +17 \quad -10 + -12 = -22$$

To add integers with the same sign...
add their absolute values, then apply the appropriate sign.
