Adding and Subtracting Fractions

Name _____

Date _____ Period _____

To add fractions....
If two fractions have same denominator...

Add the numerators...

and keep the denominator

$$\frac{2}{8} + \frac{3}{8}$$

To add fractions....
If two fractions have same denominator...

Add the numerators...

and keep the denominator

$$\frac{2}{7} + \frac{4}{7}$$

To subtract fractions....
If two fractions have same denominator...

Subtract the numerators...

and keep the denominator

$$\frac{5}{8} - \frac{3}{8}$$

To subtract fractions....
If two fractions have same denominator...

Subtract the numerators...

and keep the denominator

$$\frac{4}{7} - \frac{3}{7}$$

To add fractions....
If two fractions have different denominator...

Get a common denominator

$$\frac{2}{5} + \frac{1}{2}$$

To add fractions....
If two fractions have different denominator...

Get a common denominator

$$\frac{1}{4} + \frac{2}{3}$$

To subtract fractions....
If two fractions have different denominator...

Get a common denominator

$$\frac{2}{3} - \frac{1}{5}$$

To subtract fractions....
If two fractions have different denominator...

Get a common denominator

$$\frac{1}{4} - \frac{2}{3}$$
