

Function Notation

$f(x)$ reads f of x

$$f(x) = x^2 - 4x + 9$$

Function f , that is dependent on x .

Function Notation

$g(x)$ reads g of x

$$g(x) = x^2 - 4x + 9$$

Function g , that is dependent on x .

Function Notation

$h(x)$ reads h of x

$$h(x) = x^2 - 4x + 9$$

Function h , that is dependent on x .

Function Notation

$f(a)$ reads f of a

$$f(a) = a^2 - 4a + 9$$

Function f , that is dependent on a .

Function Notation

$$y = x^2 - 4x + 9$$

Function Notation

To evaluate a function, determine the value of y or $f(x)$ at a particular value of x .

$$f(x) = x^2 - 4x + 9$$

$$f(2)$$

Function Notation

To evaluate a function, determine the value of y or $f(x)$ at a particular value of x .

$$f(x) = x^2 - 4x + 9$$

find $f(3) + f(1)$

Function Notation

To evaluate a function, determine the value of y or $f(x)$ at a particular value of x .

$$f(x) = x^2 - 4x + 9$$

Evaluate $(f(x + 2))$
