

As a person with diabetes, you are at higher risk of having problems develop over time that could impact your vision. Your primary care doctor may recommend that you have a diabetic retinal eye exam every one to two years by an eye doctor. It is important to get your eyes checked by an eye doctor because they have specialized equipment that can detect eye problems caused by diabetes.

If you need help setting up an eye exam, your primary care provider’s office can recommend someone, or you can call Customer Service at 1.800.455.9776 (TTY user should call 1.800.743.3333). Hours of operation beginning Oct. 1 - March 31 are 8 am - 8 pm Monday-Friday or beginning April 1 - Sept. 31, our hours are 8 am - 8 pm seven days a week.

How to use this form:

Patient	Eye Care Doctor
<ol style="list-style-type: none"> 1. Set up an eye exam with an optometrist or ophthalmologist. If you need help your primary care provider’s office can recommend someone, or you can call Customer Service. 2. Take this with you to your exam so the eye doctor can record the results. 3. After the eye doctor completes this form, ask the doctor to send it to your Primary Care Physician (PCP). 	<ol style="list-style-type: none"> 4. 1. Discuss the tests included in the exam with your patient. 2. Document the services rendered on this form. 3. Sign form. 4. Fax or send a copy of the completed form to the patient’s primary physician.
