East:	GC	General Commercial	East:	LC	Local / Corridor Commercial
	MUN	Municipal		PSP	Public / Semi-Public
West:	AG	Agriculture	West:	LC	Local / Corridor Commercial

PROJECT DESCRIPTION

The applicant is seeking Development Plan approval for a Biggby Coffee drive-through restaurant to be in an existing retail space. The project will involve site modifications to accommodate the drive-through facility including relocation of dumpster enclosure, the addition of a menu ordering board, and striping to direct on-site circulation which would be restricted to one-way travel in certain locations.

PLANNING OVERVIEW

The site is located on the southwest corner of Moon Rd. and US 40 / Main St. and includes an existing BP fueling station. The project received development plan approval on March 5, 2012 (DP-12-001). The proposed use would occupy a currently vacant tenant space at the west end of the building.

The site is within 600' of Main St. and Moon Rd. – both of which are Gateway Corridors. The ordinance allows the addition of accessory uses such as drive-through facilities to be reviewed and approved administratively. However, in this situation the proposed site modifications represent a significant change to the overall site. Additionally, it appears that development of the existing site did not follow the plans approved by the Plan Commission in certain areas such as landscaping and pedestrian connectivity. Therefore, staff determined

TOWN OF PLAINFIELD DESIGN REVIEW COMMITTEE REPORT

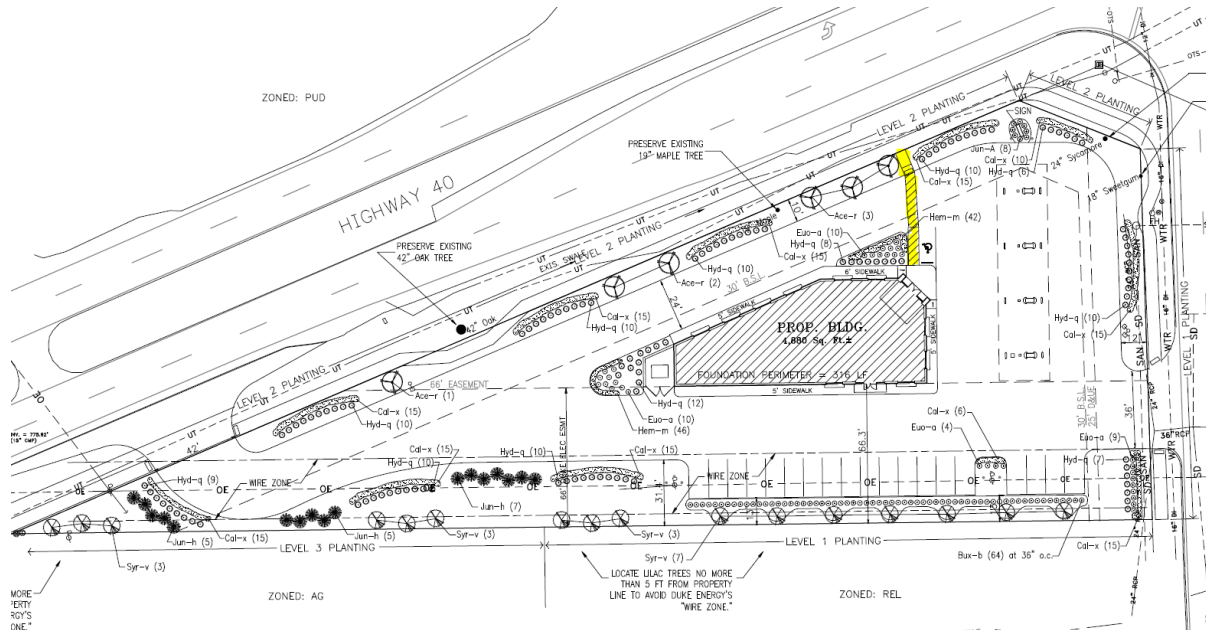

that the proposed use was not suitable for administrative approval and that an amended development plan would need to be submitted to the Plan Commission.

DESIGN REVIEW

Staff requests that the Design Review Committee review the proposed development project and provide comments and / or design recommendations to the applicant and staff. The following items are identified by the Zoning Ordinance as standards for Development Plan review:

Design Review Summary		
Review Area	Status	Questions / Comments
Building Design		
Minimum Yards and Building Setbacks	Not applicable	
Maximum Building Height	Not applicable	
Finished Façade Toward a Gateway	Not applicable	
Building Materials	Not applicable	
Site Design		
Loading Space Orientation	Not applicable	
Outside Storage	Not applicable	
Parking Spaces	Not applicable	
Site Lighting	Not applicable	No additional lighting proposed
Mechanical Equipment:	Not applicable	Staff would note that the current building is not in compliance with the ordinance as mechanical equipment is not screened on the south elevation.
Trash Enclosure / Trash Compactor	Complies	The existing dumpster enclosure on the west side of the building will be removed and replaced with a new enclosure on the SW corner of the site. Section details show that the gates will be wood and the walls will be faced with brick to match the building.
Pedestrian Connectivity	Complies.	See staff comments below regarding pedestrian connectivity.
Landscaping		
Perimeter Yard Landscaping	Not applicable	Current compliance unknown due to prior deviations from the approved landscape plan.
Parking Lot Trees	Not applicable	
Parking Lot Screening	Not applicable	
Foundation Landscaping	Not applicable	

TOWN OF PLAINFIELD DESIGN REVIEW COMMITTEE REPORT

DP-12-001 Landscape Plan

3. Several modifications to the site, including to the landscape plan, were made after the Plan Commission granted approval to the project. As part of the request for a Development Plan Amendment an updated landscape plan for the overall site reflecting the existing and proposed landscaping should be submitted for review.
4. The proposed dumpster enclosure would be located a considerable distance from the building and the doors would be facing Main St. Given the propensity for enclosure doors to remain open or be “pinned” behind the dumpster, is this a desirable location and orientation?

5. In its findings for approval the Plan Commission must determine that the proposed development is appropriate to the site and its surroundings. The existing development did not account for a drive-through facility in the design. Are the proposed improvements sufficient to meet the above criteria?
