Brett,

We checked and we are only 2.5 miles off the end of the runway at the airport and this tower can't be extended.

Thanks,

Tracy Crittendon

Hi Tracy –

Checking back to see if you had received any feedback from the tower manufacturer whether or not this tower could be extended or not.

Thank you!

Brett,

I will need to reach out to the tower manufacturer to find out if it can be extended. My initial discovery is it can't be extended as it is tapered at the top of the monopole. Tower diagram is below.

Subject: SWI Funds Tower Holdings, LLC site in Plainfield, IN | ASR 1299502 | 120' Monopole - near Gladden Road,

Hi Greg –

K2 Towers III, LLC has a 120' monopole tower in Plainfield, IN. AT&T is looking to go around this area to help fill their capacity needs around Main Street and to the new development areas to the north. The available height on this site is not high enough for AT&T's needs. Is this tower able to be extended by 20'? AT&T would need a CL height of 135' to achieve their desired network needs for the area.

Would you be able to provide me with the most recent SA for this site?

Thanks for your time!
