

# Lesson 11

You can find  
my friends in  
many places

Underground Friends  
Oh see it is raining.

The centipede, earthworm  
and snail have come out  
from their homes  
underground.

I must be careful how I walk. I must not step on them.

They are my friends.

Mummy there's a cockroach  
in the kitchen!

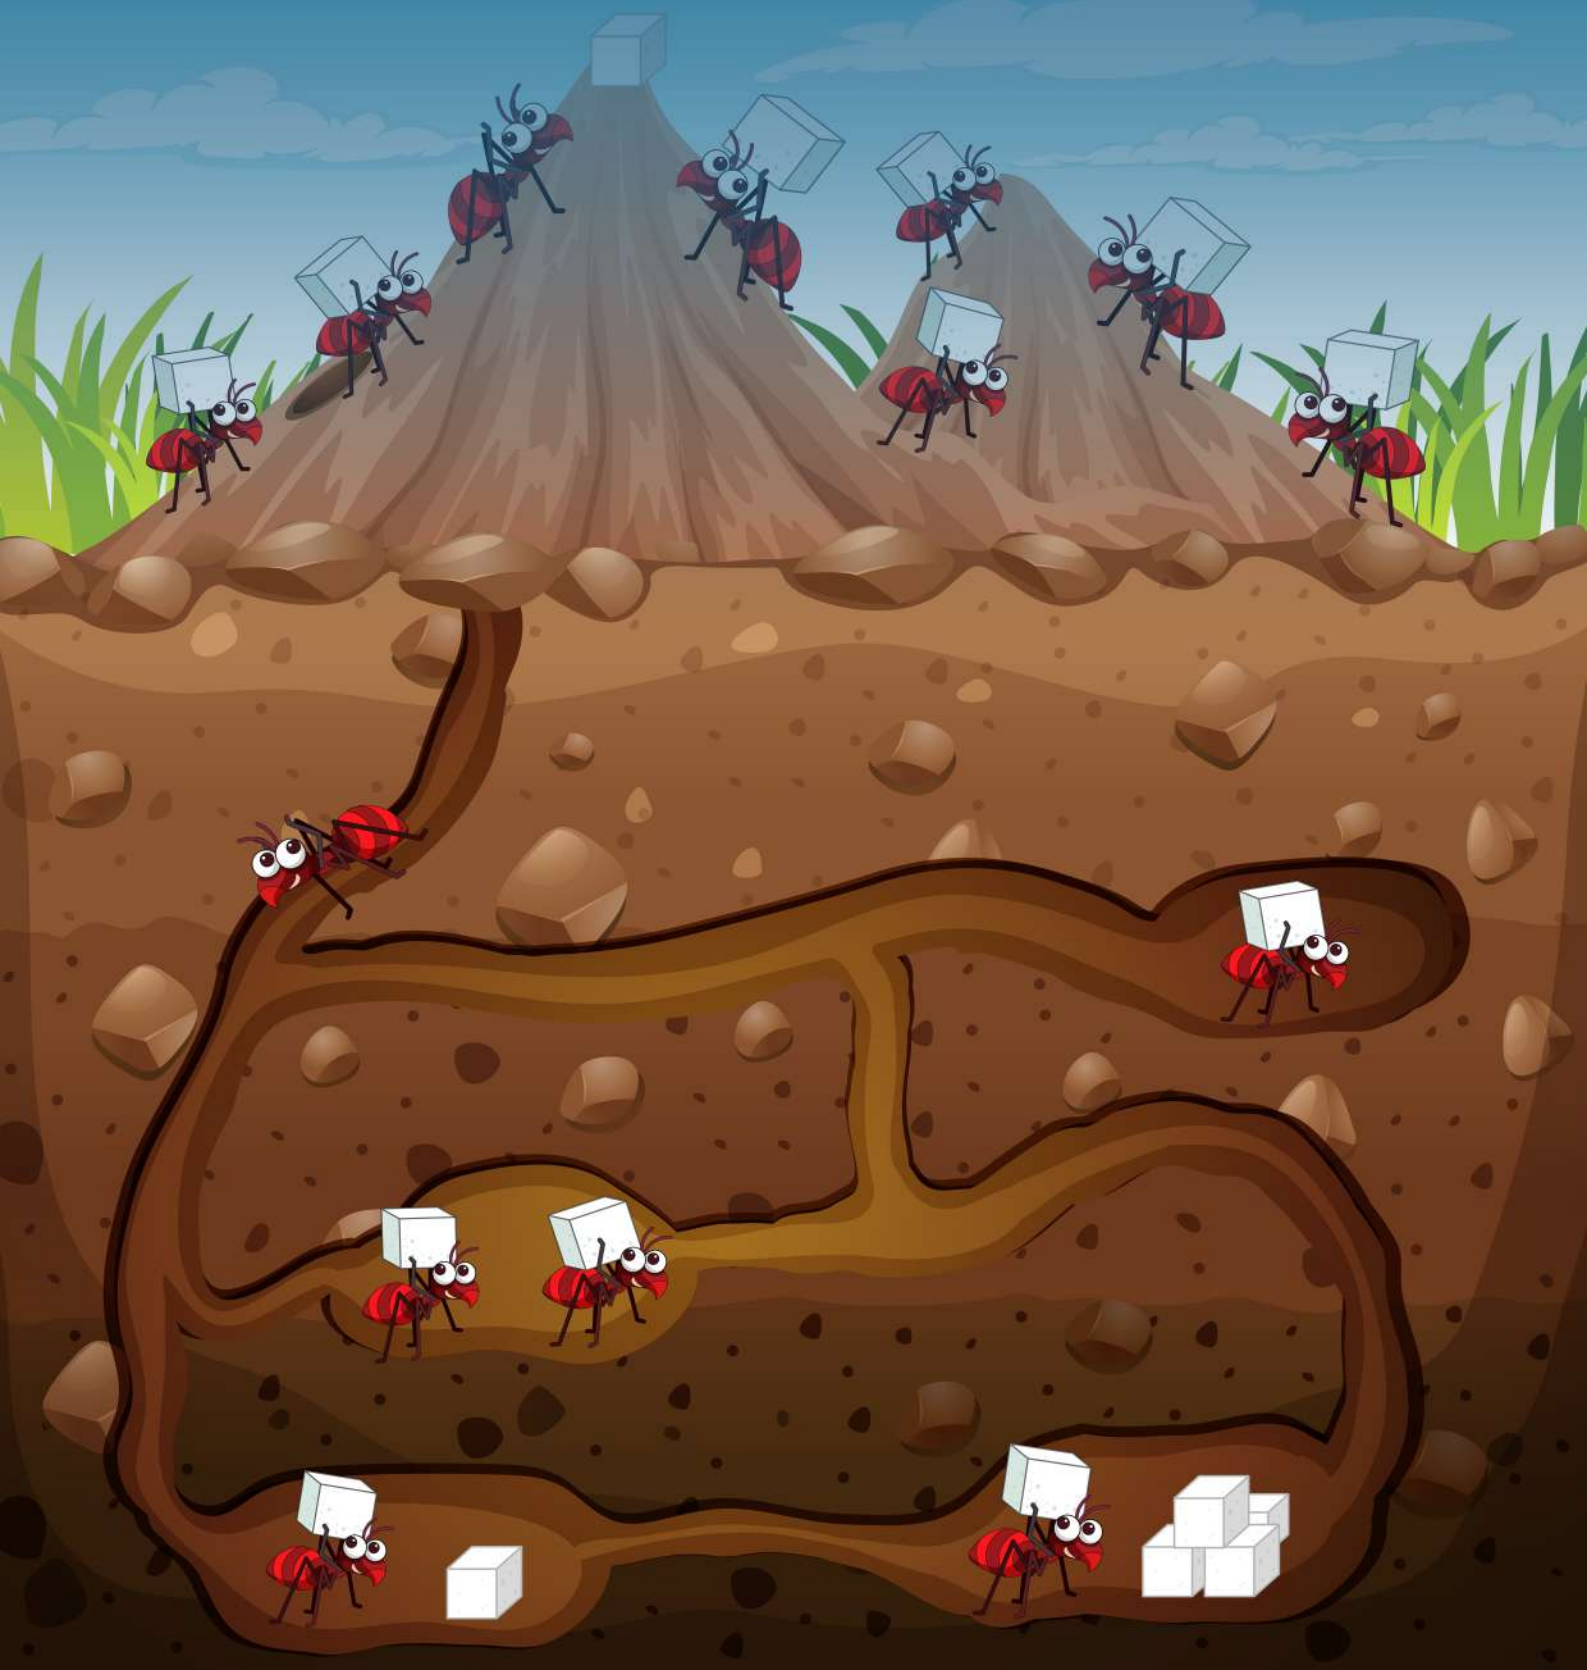

Please don't kill it, just let  
it go underground where it  
lives.

The hardworking ants have  
built such a big anthill.

It is their home so we must  
not break it.

On The Ground Friends  
There is doggy, there is  
kitten, and they are running  
around.

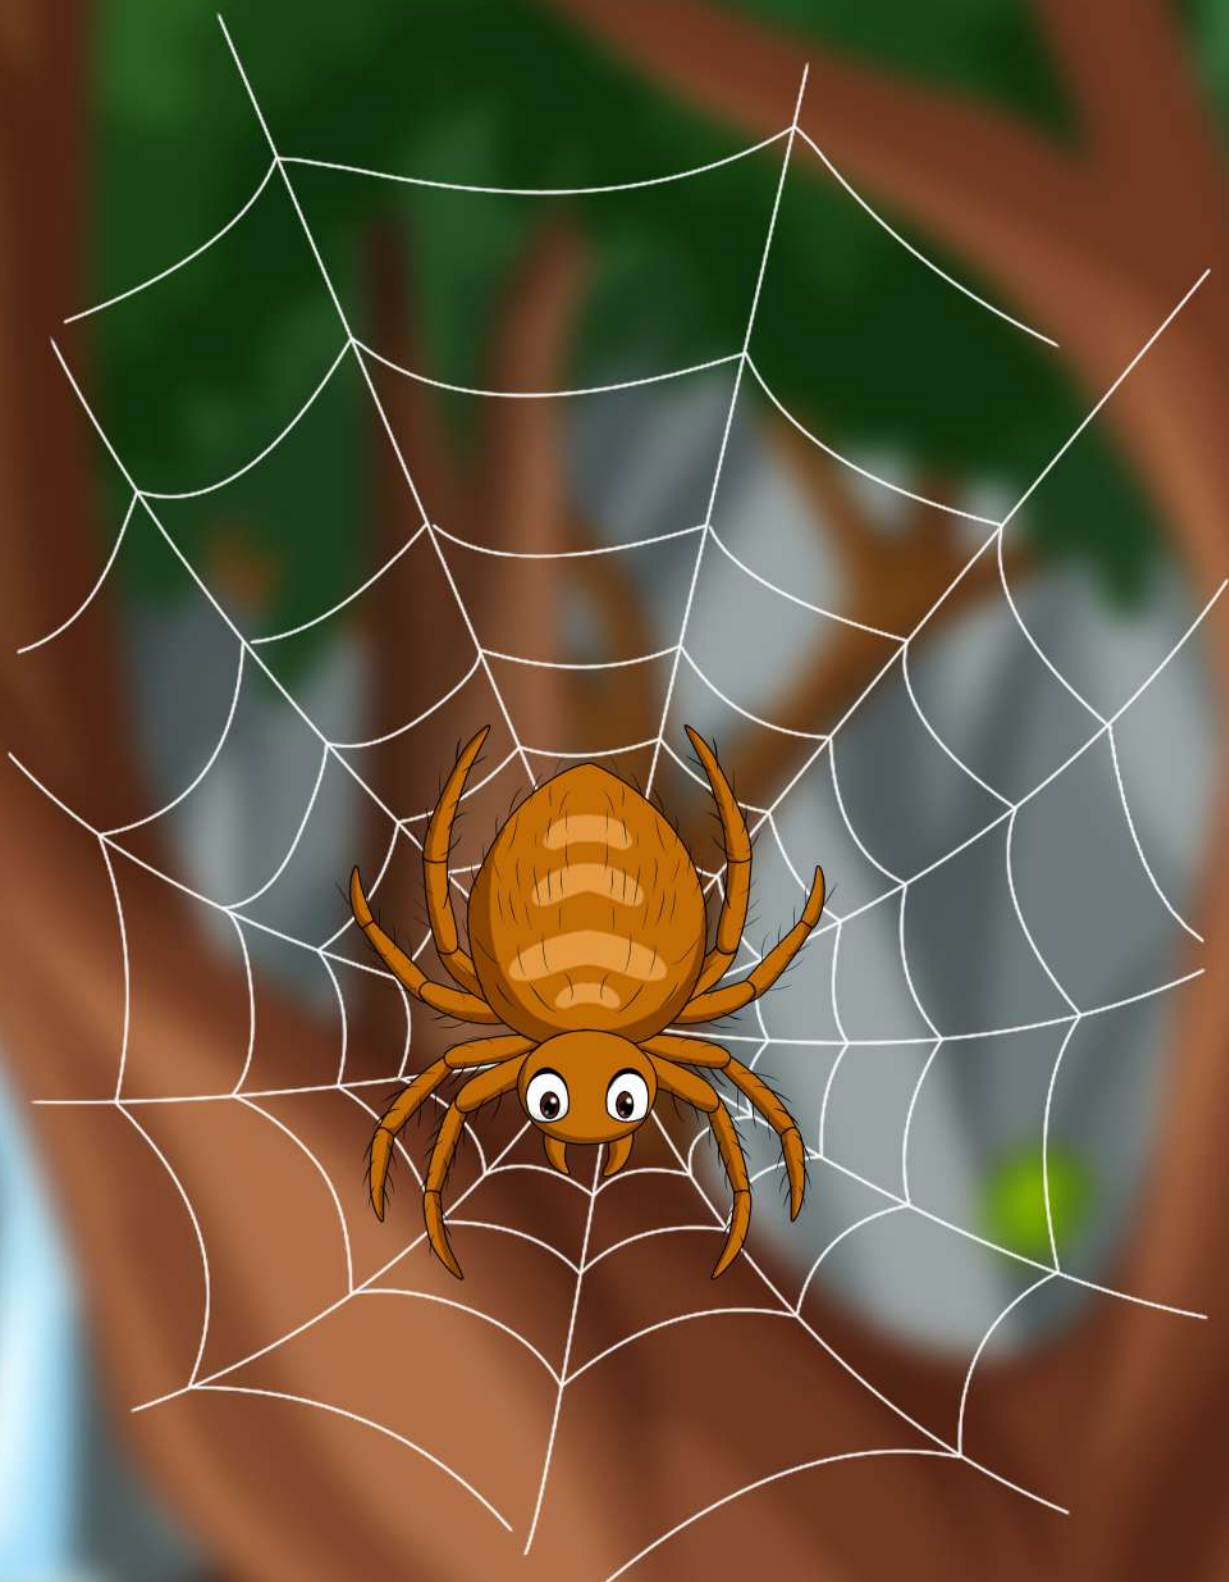

The horse, the cow and many more animals live on top of the ground. I see many of them everyday.

The spider has spun such a lovely web.

Please, Mummy, let it be.

In The Air  
Butterflies are all around  
me;

I can see their lovely wings.

I will not catch them -  
I will let them be.

Bees are buzzing busily,

they are flying through the  
air,

I think they have a lot of  
work today.

# In The Water

The fishes are swimming  
so happily, let's not catch  
them.

They should feel safe in  
their homes.

There are so many  
shellfishes with them.

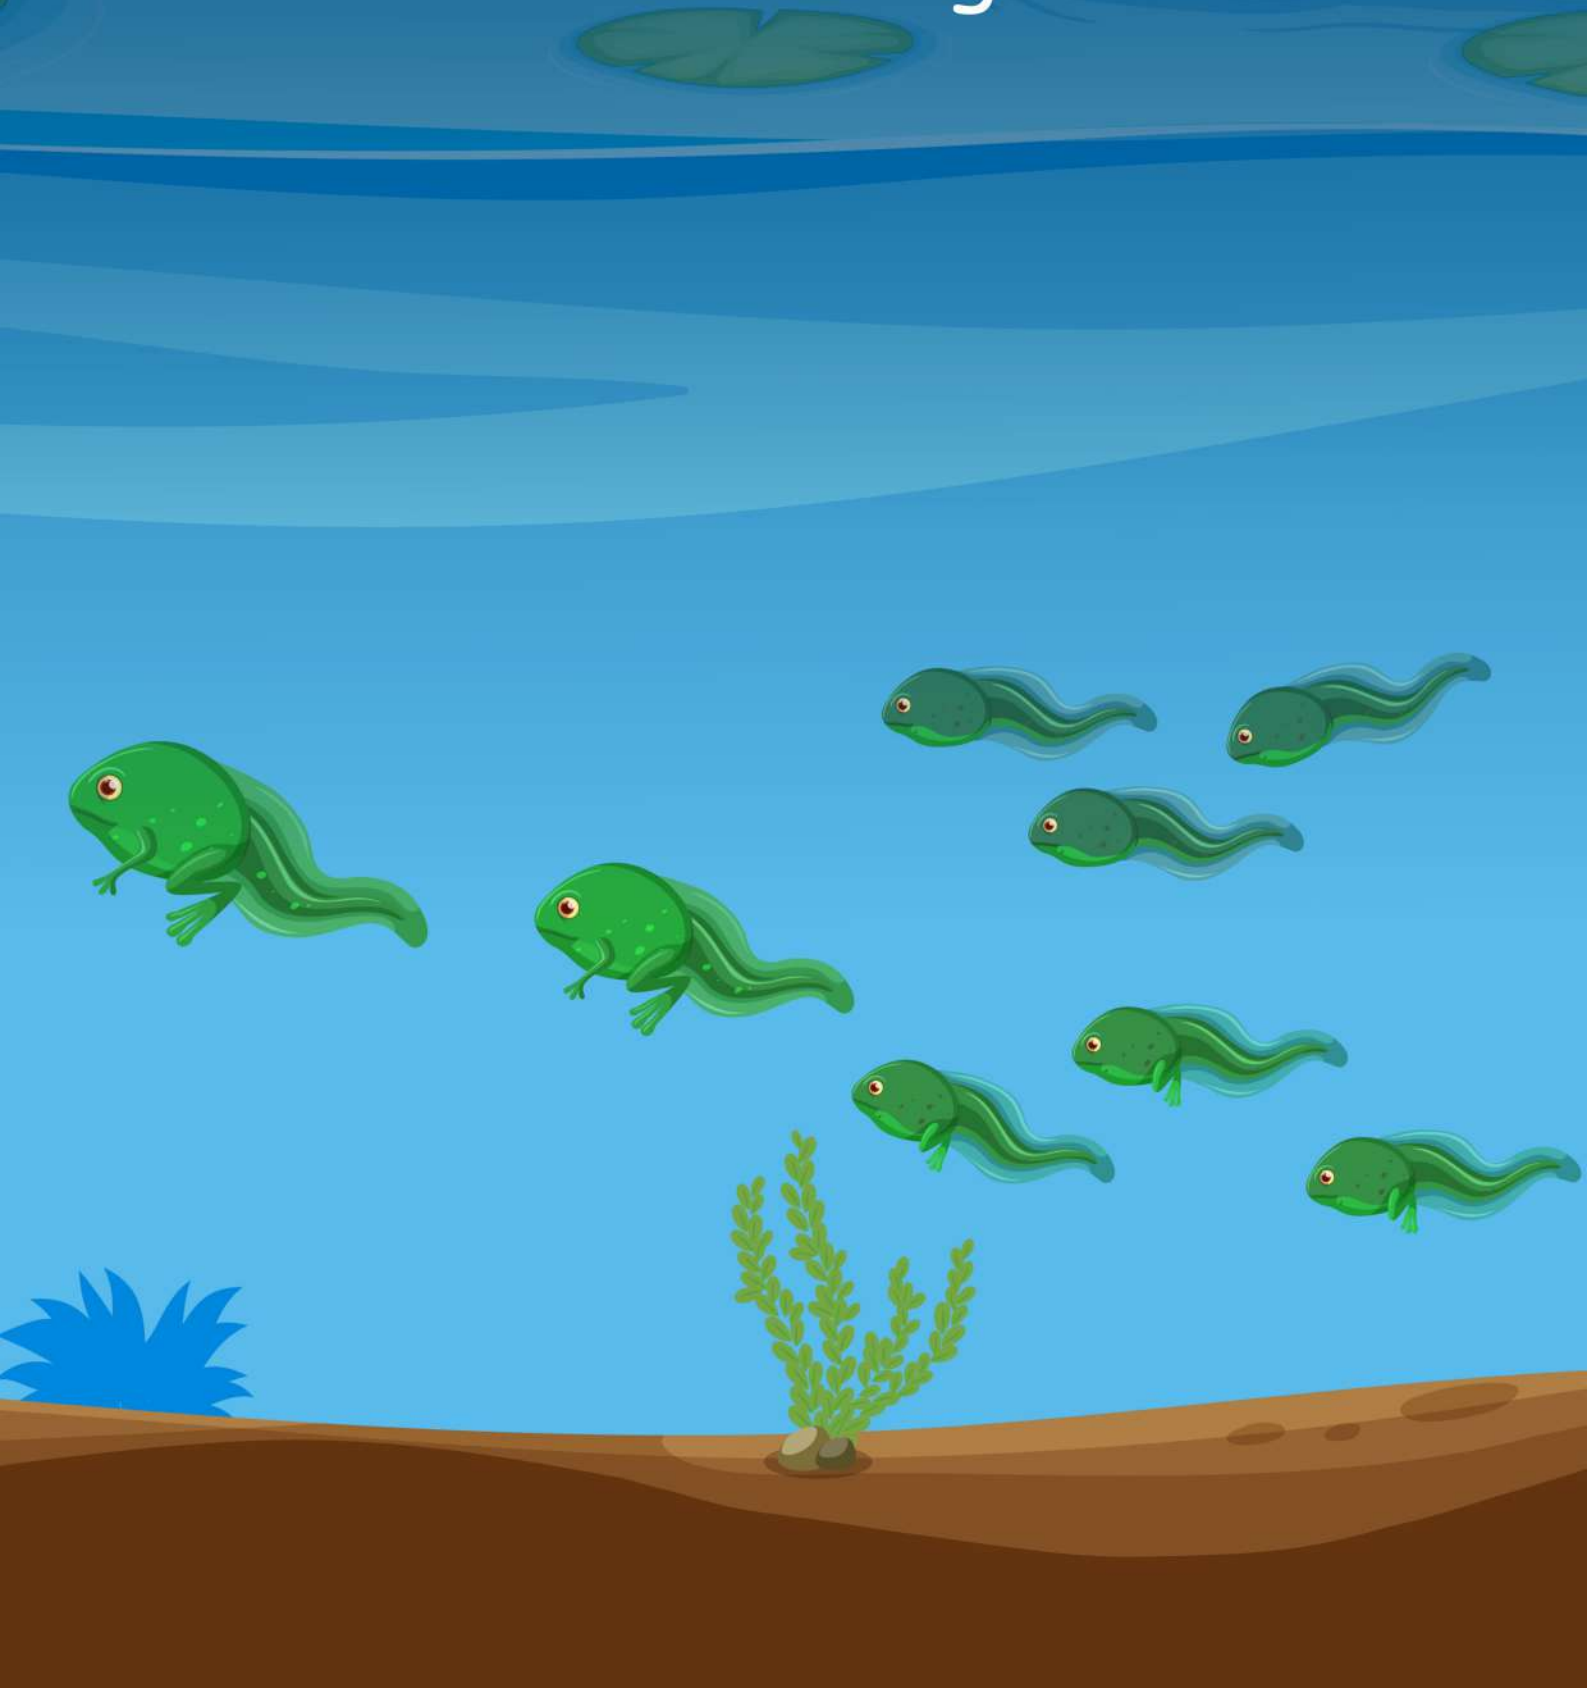

# Tadpoles

Tadpoles are frog babies.

They are born in the water,  
I love to see them  
swimming.

# My Friends Are Everywhere

I have many friends  
Some fly in the sky,  
They fly so very high.

Some jump, some walk,  
Some can even talk.

I have many friends,  
Some creep, some dig deep,  
Some slither, some even  
crawl.

Some even sleep on the wall.

I have many friends  
Some are big,  
some are small.  
I really love them all!
