

Inductive Head Poles

Safe, Efficient Way To Test And Locate Out-Of-Reach Cables

Fiberglass foam-filled pole has Inductive Head Clamp Adapter permanently mounted to one end and male ferrule at the other end.

Use with Inductive Head Clamp in manholes or on poles. Access cables without climbing a pole or exhausting a manhole.

Foam core prevents moisture build-up inside pole and adds extra hoop strength and rigidity.

Inductive Head Pole With Adapter Permanently Mounted On Pole

Removable Inductive Head Clamp Adapter Connects to Jameson Extension Pole

Part Number	Inductive Head Poles
FG-4MC	4' Inductive Head Pole - FG Pole with Permanent Adapter
FG-6MC	6' Inductive Head Pole - FG Pole with Permanent Adapter
FG-8MC	8' Inductive Head Pole - FG Pole with Permanent Adapter
FG-10MC	10' Inductive Head Pole - FG Pole with Permanent Adapter
IHA-2	Removable Inductive Head Clamp Adapter - Use with FG or JE Extension Pole or Base Pole

Note:

FG poles are batch tested to 100KV per foot for five minutes.

JE Poles are individually tested to 100KV per foot for 5 minutes to meet requirements of OSHA Subpart R 1910.269(j)(1)(i)
