Ballistic knives pdf

A ballistic knife is actually a blade attached to a hollow handle that fits inside another hollow handle, containing a coil spring. Editor's note: This article is an excerpt from the 2004 book KNIVES, but the information is still relevant. Howbers, or automatic knives, may attract the most attention, but reforms in recent years have calmed restrictions in most U.S. states. The country's most banned knife remains the ballistic knife. Here's a look at what ballistic knives are, how they became banned and why those bans should be repealed. What is a ballistic knife? Federal law defines a ballistic knife as follows: advertisement for united states code, section 15 section 1245 (d) a defined ballistic knife. As is done in this section, the term ballistic knife means a knife with a detox blade powered by a mechanism triggered by spring. Pub. Amended November 18, 1988. In plain English, a ballistic knife is actually a blade attached to a hollow handle that fits inside another hollow handle, containing a coil spring. The binge spring compresses inside the handle, and the latch holds the blade of the knife down against spring pressure. When the latch is released, the knife and the launch of the attached inner handle go crazy. Federal law on ballistic knives is very similar to federal law on penknives, except that the penknife law for an outstanding 1,000 flick for possession, and transport on their person, of any spring knife with a blade 10 cm long or less by any person who has only one hand does not apply to ballistic knives. It means that one-handed people are forced by federal law to throw their knives in the hand just like everyone else! ¿como esta? Asks Arnold Schwarzenegger in the 1985 film Commando, when he fires a ballistic knife into the chest of a bad guy, which astonishingly causes immediate death. Hollywood never misses an opportunity to help fuel a misguided gun ban, and a ballistic knife was no exception. In May 1986, Francis Ford Coppola's son and Ryan O'Neal's son were involved in a car accident in which Coppola's son died. O'Neill's son was charged with reckless driving and possession of a ballistic knife. Hollywood elitism and hypocrisy are nothing new. What has made the ballistic knife so terrifying to professional politicians, talking media chiefs and a variety of hopophones (those who irrationally fear a weapon) is that it's a knife that fires! Why are ballistic knives illegal? Hype and politicians, the ballistic knife helped fill the gap between guns and knives. This allowed knife-haters to join rows with gun haters, and both had a common, new object and shoham howled and ceckered at him. Certainly, a year after commandos were released, the Ballistic Knife Prohibition Act of 1986 was signed federally By then-Republican President Ronald Reagan, as part of the Anti-Doping Law of 1986. In addition to the ballistic knife being vilified and falsely linked to drug use, it was the newest national attack on knives since the Federal Penknife Act of 1958. Republican Sen. Alphonse M. Damato held a news conference in which he pressed for the proposed ban. He announced that a ballistic knife is a preferred weapon used by drug dealers. Another declared: ballistic knives are at least as dangerous as penknife knives that have been banned since 1958. A vintage poster from the Councils Gregor shows parts of a ballistic knife. Note the picture of the weapon used to indent the blade. The hype RussianLegacy.com around the ballistic knives didn't help. The knives were put up

for sale in tactical magazines with the pitch to the Communists had it. We stole it. Now you can buy it!!!! Ballistic knives have been published as capable of killing quickly and quietly. San d'Amato claimed a ballistic knife was a dangerous weapon, a terrorist weapon. Another stated: Ballistic knives do not have a legitimate sporting purpose. They are wanted by professional criminals because they are easily hidden and able to stack a policeman's bulletproof vest. Democratic Rep. Mario Iagi (a well-known anti-gun politician and spencer of the so-called bullet ban of a cop killer) appeared at a news conference arguing that ballistic knives are the latest in cop killer technology, and that the ballistic knife can... Shoot his blade like a bullet and penetrate police bulletproof vests. Best Buys for Blade Readers: He stated that he bought his ballistic knife through a mail order from the Florida Knife Corporation by placing \$79.95 on his credit card. Iyagi said... No questions asked. I could have been anyone. The ballistic knife is completely accessible to anyone who wants it. A button or switch in mid, seen here in red, is commonly used to release the blade. (By Jerryk50 on English Wikipedia) At the press conference, the typical dog and pony show was hosted by a New York city police officer who fired a ballistic knife from 30 feet toward a shadowy target of a man. Of course, there were no known cases at that time of anyone ever being killed by a ballistic knife, not least any reported cases of a police officer being shot by a drug dealer or a terrorist (or anyone else for that matter) with a ballistic knife. Furthermore, I found no official survey conducted by drug dealers who questioned whether a ballistic knife was their preferred weapon of the 1980s, but somehow I doubt that given the readiness availability of cheaper and more efficient weapons on the black market. The Florida Knife Company released a statement that their ballistic knives don't penetrate. Vests, but noted that any ice pick can penetrate a bulletproof vest. Bulletproof vests are not ice-proof, but a ban on ice spikes is not political currect or grabs headlines. A ballistic knife has a sporting purpose like any thrown knife. Since when does the sporting purpose test apply to knives, anyway? What sporting purpose does a 2.5 cm chef's knife have? On the other hand, why do female employees have to go down the path of banning a feel-good knife? The latest cut to the ban: Throwing knives there are many books to deal with the issue of knife throwing for fun and fighting. A knife can be thrown with far more power and precision than can be achieved by firing a ballistic knife. This fact alone makes the ballistic knife ban absurd and patently useless. Any decent fixed blade knife can be thrown (though throwing your handmade, Damascus, ivory and Bowie handle is not recommended). But why should facts and logic stand in the way of any headline-grabbing politician pushing a gun ban and a day at a press conference? KaBar Throw Knife Set \$21.99 smkw.com Spyderco SpyderThrowers Big \$84.00 smkw.com So What? Who needs a ballistic knife anyway? Okay, the law is ridiculous, so what's the problem? Who even has to have a ballistic knife, right? Well, here's the problem: Banning the ballistic knife is a knife ban, and just because it's not your bull being rammed doesn't mean you have to ignore it. This ban paves the way for more knife bans. The politicians see our knife rights as a crime. They can look like they're doing something about crime, terrorism or drug trafficking, when in reality it's just another hit on our knife rights. Ballistic knife bans lay the groundwork for further knife bans, and active courts must be legally dishonest and ban knives and other legal weapons are not ballistic knives. You don't believe that? So obviously you haven't read Florida State, Applenet, v. Faria Driani, Apple, 4th District, File No. 4D99-4172. In that case, the Florida court previously banned automatic/olear knives under the guise of Florida's ballistic knife ban. The case is a classic example of the bias against a knife and against our knife rights that banning a victim knife can cause. Modern heads used as archery remain legal, although they function similarly to ballistic knives. New Jersey's ballistic knife ban has even more potential for abuse. New Jersey's ballistic knife ban was signed into law by then-Republican Governor Thomas Keane, who declared: We must limit the flow of knives that serve no useful or legal purpose. If the rabbit huggers wanted to push it, New Jersey's ballistic knife law is so big, archery and bow hunting are threatened and banned. Chapter 39 of the New Jersey Criminal Code for Firearms and Firearms 2C: u. A ballistic knife means any weapon or other device capable of lethal use, which can propel a knife blade. Bows and bows can all shoot wide-head arrows. Wide heads are and/or contain razor sharp knives. Is a composite arch with a wide-head arrow a weapon or other device capable of lethal use and which can propel a knife blade? Of course it's him! True, it wasn't the New Jersey Legislature's intention to ban archery and bow-siding, but it wasn't the Florida Legislature's intention to ban olarias/automatics, and yet the Dariani Court did just that! Staying sadly alert, knife enthusiasts were not organized, ready or ready for the ballistic knife fight in the mid-1980s. We were never warned about the future impact and consequences of ballistic knife bans on our knife rights. We lost dramatically on the ballistic knife issue and now we're paying a price.
