Super eco-friendly DIY and for different use. DIY For summer feel at home DIY natural style for your four rooms. Food Let yourself be inspired. There are several ways to express the idea of both in Spanish. Most of the time, both simply means two and function as an adjective or pronoun. In such cases, both can be translated as both (both female) or both (both female). The two terms are almost interchangeable; both is something more formal. Here are some examples: The two embraced. (They both hugged.) Letters written from Calabria such as the one found numb. (Both letters written from Calabria reflect the same kindness.) We both have a headache if we're hungry. (We both have a headache if we're hungry.) The two most wanted Al Qaeda I deres in Iraq were killed during a military operation. (Al-Qaeda's two most wanted leaders in Iraq were killed during a military operation.) They both thought they could prove God's existence. (They both believed they could prove God's existence.) I'd like both books very empty. (I would very much like to read both books.) They both said never to go back to Per after this bitter experience. (They both said they would never return to Peru after this bitter experience.) Both options are good, and sometimes I don't prefer any. (Both options are good, and sometimes I don't prefer either.) Note that in each of the examples above, both or both might have been translated as two or both. There are many cases both is not the equivalent of two, usually when used to emphasize. There is no established way to express the concept; it is necessary to look at the sentence to determine the context and develop a translation in this way. Here are some examples; Note that the translations given are not the only possible ones: Learning is an association in which the teacher is like the student play a dynamic role. (Learning is an association in which both the teacher and the student play a dynamic role. Here, both add emphasis, indicating that the teacher, as well as the student, play a role.) We want to buy a big house and also cheap. (We want to buy a house that is big and cheap. The use of both suggests that the two qualities usually do not go together and therefore adds emphasis. Here, moreover, which usually means also, it performs a similar function.) Paul and Raul have two bruises that are more treated. (Paul and Raul have bruises that are being treated. Both are used here to clarify that each of the victims, not just one of them, is bruised. Sendos is an always plural adjective often translated as respective or yours and is used here to provide a similar meaning. Twos or paths may also refer to more than two.) There were mistakes on both sides of the conflict. (There were errors on both sides of the conflict. Both is used to emphasize the existence of a contrast, which one and the other also does.) It's not possible to lose weight and eat what you like at the same time. (It is not possible to lose weight and eat as much as you want. Both here suggest that two actions are being done simultaneously. At the same time it means at the same time.) At least English phrases or expressions with both have Spanish equivalents. Both parts, when referring to the opposite sides of an argument or position, can be translated languagematically with the two bells, which literally means both bells. I always hear both bells before I make a trial. (I always listen to both parties before making a trial.) I don't think our public servants hear both bells. (I don't think our public servants are listening to both sides.) The best of both worlds can literally be translated as the best of two worlds or freely as the best of each house (literally, the best of each house). This vehicle offers the best of two worlds, the sportsmanship of a coupe and the space of an SUV. (This vehicle offers the best of both worlds, the sportsmanship of a coupe and the space of an SUV.) Brazil is in a multicultural country that has the best of every house. (Brazil is a multicultural country that has the best of both worlds. (We learn Spanish!). Terry Vine / Getty Images Want to know more about the Spanish? Here's 10 facts to get you started: With 329 million native speakers, the Spanish ranks World Language No. 2 in terms of how many people speak it as their first language, according to the ethnologist. It is slightly ahead of English (328 million) but far behind Chinese (1.2 billion). Spanish has at least 3 million native speakers in each of the 44 countries, making it the fourth most spoken language behind English (112 countries), French (60) and Arabic (57). Antarctica and Australia are the only continents without a large Spanish-speaking population. Spanish is part of the Indo-European family of languages, which are spoken by more than a third of the world's population. Other Indo-European languages include English, French, German, Scandinavian languages, Slavic languages and many of India's languages. Spanish can be further classified as a Romelda language, a group that includes French, Portuguese, Italian, Catalan and Romanian. Speakers of some of them, such as Portuguese and Italian, can often communicate with Spanish speakers to a limited extent. Although there is no clear border that defines when the Latin of what is now the north-central area of Spain became Spanish, it is safe to say that the language of the Castile region became a distinct language in part because of King Alfonso's efforts in the 13th century to standardize the language for official use. By the time Columbus arrived in the Western Hemisphere in 1492, Spanish had reached the point where the language as spoken and written would be easily understandable today. For people who speak it, Spanish is sometimes called Spanish and sometimes Spanish (the Spanish equivalent of Spanish). The labels used vary regionally and sometimes politically. Although English speakers sometimes use Spanish to refer to Spanish in Spain compared to Latin America, that is not the distinction used among Spanish speakers. Spanish is one of the most phonetic languages in the world. If you know how to spell a word, you can almost always know how it's pronounced (although the opposite isn't true). The main exception is recent words of foreign origin, which usually retain their original spelling. The Royal Spanish Academy, created in the eighteenth century, is widely considered the arbiter of standard Spanish. Produces authorized dictionaries and grammatical guides. Although their decisions have no force of law, they are widely followed in both Spain and Latin America. Among the language reforms promoted by the Academy has occurred the use of the inverted question mark and the exclamation mark ('y'). Although they have been used by people who speak some of the non-Spanish languages of Spain, otherwise they are unique to the Spanish language. Similarly unique to Spanish and some premises that have copied it is the year, which was standardized around the fourteenth century. Although Spanish in the Iberian Peninsula as a descendant of Latin, today he has many more speakers in Latin America, having been brought to the New World by Spanish colonialization. There are small differences in vocabulary, grammar and pronunciation between Spanish from Spain and Spanish from Latin America, not big enough to avoid easy communication. The differences in regional variations in Spanish are roughly comparable to the differences between American and British English. After Latin, the language that has had the most influence on Spanish is Arabic. Today, the foreign language that exerts the most influence is English, and Spanish has adopted hundreds of English words related to technology and culture. Spanish and English share much of their vocabulary through cognate, as both languages derive many of their words from Latin and Arabic. The biggest differences in the grammar of the two languages include the use of the genre in Spanish, a more extensive verbal conjugation and the widespread use of subjunctive mood. Humor.
