Easy worship 2009 background video format

Modified on: Tue, June 2, 2020 at 9:25 AM In this article:What is a video set-top box? When you play a video or sound file via EasyWorship, it must know how to decode that file. A codec or set-top box is software that tells EasyWorship how to decode the video or audio file. If you haven't installed the appropriate codec on your computer, EasyWorship won't be able to read your media file. EasyWorship requires a QuickTime player to play MP4, M4A, M4V and MOV files. See the instructions below to find out how to install the QuickTime player. EasyWorship also requires the DScaler 5.0.0.8 set-top box to play DVDs. The DScaler set-top box download and installation instructions are also provided below. Install QuickTime for MP4 and MOVClick files Here to download the Quicktime installer file. After downloading the QuickTime installer, open it. Then click on the welcome page and Yes on the licensing agreement page. Then click, and uncheck install Shortcuts.Click Desktop Install.After the installation ends, restart your computer. EasyWorship is now able to read MP4, M4V, M4A and MOV files. Install DScaler 5.0.0.8 for DVD PlaybackClose easyWorship program. Click here to access the DScaler download page at sourceforge.net.The download should start automatically. If not click on the direct link option provided. Don't click on other links or buttons on this page. Allow the DScaler5008 file.exe to download, then open it to start the installation. If you get a message that an unknown editor's app is trying to run, click Yes.There are no special options to select during installation, use the default settings to complete the installation by then clicking on each window and install on the Ready to install window. Open EasyWorship 6, click Edit then Options.Click Advanced and make sure you've checked the box next to use your favorite DVD codecs and click OK. Install K-Lite Codec Pack for H.264, MP4, MOV, and other formatsClose your EasyWorship program completely. Click on the following link to go to the download page. Click on the latest Download K-Lite Codec Pack 13.x.x LIEN BASIC (DO NOT DOWNLOAD the full version). Click here to download some browsers can block this file and can't allow you to run it. Chrome users must tap Ctrl-J to view downloads, and then click on the option to retrieve the malicious file. Other browsers should have a similar option. Click on the K-Lite installer file and follow the enumerated instructions If you get a message that an unknown editor's app is trying to run, click Yes.Select Normal Mode on the installation mode screen and tap Next.On installation preferences, there's no need to change anything, just tap Next.On the Hardware Acceleration page, click Next.On the favorite languages screen, just click on the audio setup page. , click Next.If it asks to install additional software, click Decline.Click Install on Ready to install the screen. On the fact Page, click to run codec tweak tool and click Finish. Close the web codeguide.com that opens at the end of the installation and minimize your browser. On the Codec Tweak tool window, click the Favorite Decoders button at the bottom left. Under 32-bit set-top boxes Select LAV Video under the following headings H.264, XVID, DIVX, MP4V, DVSD, MJPEG, AAC and LATM AAC. (You don't need to change anything under 64-bit set-top boxes)Click Apply and close and then click out. The K-Lite codec pack is now installed and ready to use with EasyWorship.NOTE:EasyWorship will support WMV and WMA files without the use of additional video set-top boxes. Back to Top kdeal@vbchurch.ca Posts: 4 Joined: Sat Feb 18, 2017 4:16 pm Postby kdeal@vbchurch.ca Sat Feb 18, 2017 4:43 pm Hello! We just bought EW6 on our shiny new W10 Pro 64bit with 8GB ram and an 8something NVidia card with 1GB VRam. So we imported the 2009 profile/song/slides into EW6 and things look good, but..... no video backgrounds. The words are there on a black background. I've been trying to read the help files and a few say the same about black backgrounds. I suspect it's a theme problem, but does that mean I edit every song, let alone every slide to include video backgrounds? Just to clarify, these are a simple movement/video background of clouds or rain drop type thing, not a movie. In addition, we manually downloaded and installed Quicktime (somewhere in your help file, it mentions on Install Quicktime drop down, it doesn't show up in any of the dropdowns). Anyway, we are now able to play MOV, but not MP4. One would hope that all this would be built in ... Any ideas how to get the mp4 to work as well as being a continuous background across all the slides? In the 2009 edition, it was simple. There was even a Bottom button when editing, I noticed that the button has now gone with the sign to add slides to the schedule. Miss these, things were so much simpler in 2009.Most of our audio people are volunteers and not as computer scientist like you folk, so not sure if you can dumb down the interface to the way it was in 2009 - like bringing back the top left scheduler sign to add a song instead of slipping and dropping, as well as a background button add. Thank you, God is Good! PS- this is Tom, the volunteer computer guy who hacked the pastor's account;-b We found this guide to choose file formats on. Fortunately, we know some people there, and have agreed to share the post with us as a guest blog! This is a great resource to use if you are new to love the media or thinking about changing programs. If you run from the watch - it doesn't work at all. I would like to suggest my NewsBrain app in the News category. Utility gps download. Check it out: On there are three different types of files to choose from. This is designed to eliminate any need for conversion. Once you download our clips, it should be ready to in your video editing or presentation program! The question is: which file format is right for you? We have set up these easy ball points to help you find the file format that is good for your software. WMV files are compatible with. Easy cult. Powerpoint. Pro presenter. Screaming from the media. Song Show Plus. The files. AVI Windows MovieMaker are compatible with. Easy cult. Pro presenter. Song Show Plus. Love it.MOV the files are compatible with. Pro presenter. Keynote. Imovie. Media Shout Some software is listed in multiple formats, but it simply means that your program is versatile! When this happens, you'll usually want to choose.wmv files or.avi files if you're working on a PC and a .mov file if you're working on a Mac. Are you still not sure what software to use with certain files? Here's a closer look at today's most popular cult presentation programs to help you get acquainted with what's available: Easy Worship Easy Worship is a multimedia tool that has been designed specifically for cult presentations. It allows you to easily incorporate Bible verses and song lyrics without ever leaving the app. Easy Worship works best with.wmv and.avi video files. PowerPoint PowerPoint is a slideshow tool that comes with the Microsoft Office suite. It is available for PCs and Macs. Although it has no specific bells and whistles designed for churches, its wide availability makes it a popular choice for churches. PowerPoint works best with.wmv files. ProPresenter Similar to Easy Worship, ProPresenter was created specifically for church media. It has excellent features like allowing you to edit upcoming slides without disrupting the slide displayed on the projector. ProPresenter is available for macs and PCs and is compatible with all file formats offered on! Media Shout Media Shout is a very user-friendly church worship software that is designed to create slides, host videos and present countdowns. It is available for Mac and PC and is compatible with.wmv and.mov files. Song Show Plus Song Show Plus is especially good at presenting the lyrics of cult songs thanks to its easy-to-use interface. They offer several additional plug-ins and features so you can customize the program to meet your organization's specific needs. Song Show Plus is compatible with .wmv and .avi files. Windows Movie Maker Windows Movie Maker is a simple video editor that comes standard on most PCs. It will allow you to add text music and transitions to your presentation. Windows Movie Maker works well with.wmv files. Worship Him Worship Him is an affordable but emotional presentation tool designed for church use. Different licensing agreements allow your organization to customize the software and pay only for what you need. Worship Him only works on the Windows computer and is best compatible with.avi files. Keynote Keynote is the Apple version of PowerPoint. It allows for simple slideshow presentations and has customization features such as animations and video integration. Keynote works best with.mov video files. IMovie iMovie is the Apple version of Windows Movie Maker. This program is standard on all Apple computers and is very user-friendly. iMovie will allow you to edit simple videos, as well as add text, music and transitions. This program works best with.mov files. If you have more questions, they would be happy to answer them. Just leave a comment below or hop on them. And don't forget to do that too. They have tons of great movement bottoms that are all available for free. VideoBlocks has motion backgrounds, too! In thanks for visiting our blog, here is a free movement background for you to download. button link-color:#2216a7 size:3 style1 dark-0 radius-auto target-selfDownload Your Free Blue Looping Background/button.
