Free physics books websites

With Louise Balle A flip book is a flash-based e-book that allows visitors to your website to convert pages to the screen, similar to elevating the pages of a real printed book. It is a convenient way to display directories and online books, and practical if you do not want the user to take the content with him, as is the case with a basic PDF file. You need special conversion software to make a flip book. Choose a flip book software program. There are online and offline versions. Popular options such as Page-Flip.com and FlipCity.com. Download the software to your computer (offline versions) or upload it to the browser (electronic versions). Prepare your book document and convert it to PDF format. You can use CreatePDF.adobe.com, Adobe Acrobat, or a similar PDF creation program. If you want clickable links to appear in the flip book, use Acrobat to be safe. Upload the PDF file to the software and click Convert or similar. The program will save each PDF file as a SWF (Flash) file and combine them into an HTML document. Place the HTML document in the browser to check the flip book. Upload the HTML document and any corresponding folders that the software program submits to your computer to the web server. Then you can simply link to the HTML page on your website so that visitors can see the flip book. With Matthew Schieltz Informational websites, online digital content stores and educational sites for colleges are some of the places that use e-books to deliver content and useful information to website visitors. The PDF file (portable document format) is one of the most common e-book formats used for the Web. Using this e-book format for your Web page, most visitors are able to read the document using a free PDF reader, such as Adobe Reader or Foxit Reader, or built-in Internet browsers. Download a free PDF converter software program to convert your document to PDF e-book format. Programs that contain this conversion feature include cutePDF writer from Acro software, doPDF from Softland or PrimoPDF from Nitro PDF (see resources). Install the software on your hard disk. Open the word processing document you need and it becomes a PDF e-book format. Click Print from the File menu. Select the software program PDF from the Printer name drop-down box. Click OK in the Print dialog box. Select a folder or computer directory location from the Save As drop-down menu. Click Save to save your e-book as a PDF document to your hard disk. Open your Internet browser and go to the administration page or control panel of website hosting. Enter the appropriate user name and password to sign in. Click the File Management or FTP section of the Web hosting control panel. Highlight the appropriate folder or index location.html to which you want your e-book to be sent by clicking once on Click Upload or the specific button used to add new files from your computer. Click Browse to search for files on your computer. Find your e-book document file and double-click it to add it to the list of files to be sent to your website. Click Finish or Send to the Web hosting file manager or FTP utility to send your e-book file to your web host's server. Copy the full directory file name of the e-book you uploaded to your site. Click View for your e-book file in your site control panel. Highlight and copy the full URL of the e-book. The location of the e-book file, when loaded correctly on your website, starts with http:// and ends with .pdf. Navigate to the HTML master part of the Web site page to which you add text and images, because this is where you want to add your e-book file. Paste the URL of the e-book into the appropriate place on your Web page. Save your changes when you're done. Try the e-book file you uploaded to your website. Sign out of the Control Panel of the Web site. Enter the URL of your site in your Internet browser address bar and press Enter. Find where you uploaded your e-book and click the PDF file. If sent correctly and assuming that the browser contains a PDF reader, a browser window opens and your e-book appears. While many may prefer eBooks for the convenience they offer (or prefer paper books for sentimentality), discovering that it's cheaper isn't as black-and-white. Get Rich's personal finance blog slowly shows us how to save the most money when buying books. Photo by Pen Wagener.All other preferences aside, it looks like eBooks are cheaper than books are extremely new or extremely old: E-books are great for new releases. For new books, the online version is almost always the cheapest way to go. At a friend's house the other day, I noticed that he had paid \$29 for John Grisham's latest book. \$29!!! That's crazy. That John Grisham book costs \$16 on Amazon, and the Kindle version costs \$10. In fact, most e-books cost between \$10 and \$12. When cost savings are combined with space savings, electronic is the clear winner for the new releases. E-books are okay for classics. Anything that is in the Public Domain (published before 1923) can generally be downloaded to your e-book reader for free. Sometimes the formatting is silly, and usually there is no complementary material (such as essays and notes), but you can get books at no cost. (Looking for free Kindle books; here's Amazon's list of free eBook collections, and here are their best-sellers at the Kindle store, including the free books on the right.) Of course, these books can usually have been for cheap (or free) in their dead tree versions, so there isn't a huge saving here. E-books suck for most titles published between 1923 and, say, 2008. Books from the last century are still priced between \$5 and \$10 in Versions. That's ridiculous. You can borrow these for free from your public library. Or you can go to a used bookstore, a garage sale, or a thrift store to get them for less than cost in digital form. Moreover, tons of popular books are not uniformly electronic. (A real-life, typical example: Cry, the beloved country costs \$12 for the Kindle. A brand new paperback copy from Amazon; \$9. Mind boggles.) G/O Media can get a commissionit's a rather interesting pattern, although good to know if you don't particularly have a preference for one over the other. Of course, if you find eBooks are just too darn convenient and instantaneous (or you prefer to have the physical copy for emotional, ease of borrowing, or other reasons), you can always stick to your preferred media and won't yell at you. G/O Media can get a committeeNote that the above also doesn't take into account the cost of buying an e-reader, which only pays for itself if you read a lot of books, so if you don't use it for other things anyway, you'll want to keep it in mind as well. Click the link to read more, and if you've noticed a similar patter, share how you manage your book by buying in the comments below. The iPad is able to 3D games and complex mobile applications, but if you prefer to return to a ... Read moreAre E-Books cost-effective? The pros and cons of e-books [Get Rich Late] Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! You can find free Kindle ebooks listed in 40+ categories in Hundred Zeros. This website is refreshingly simple and not full of a bunch of useless information – just click on the book you want and it will be taken directly to Amazon for instant download. You are able to browse for books in categories for classics, drama, children, comics, history, romance, and psychology books all in just a few clicks, as well as search for any book by the author or its title. Something to remember about books in Hundred Zeros is that some of them may not be free anymore because they were only free for a day or two when they were first added to the site. You should pay close attention to prices on Amazon, even if the book is listed as free in Hundred Zeros. There are three ways to find free ebooks in Hundred Zeros: Click through the various topics to find books in a genre or category that interests you, look for a specific book or author name, or subscribe e-mail notifications when new titles are added. Some of the genres/topics you can browse for ebooks at Hundred Zeros include History, Crafts & Hobbies, Classics, Computers & Internet, Biographies & Memoirs, Sex, Reference and Sports. The Fiction section has others like drama, romance, short stories, and Fantasy Kindle ebooks. The Nonfiction category is where you will find books on philosophy and psychology. Every ebook you click to download in Hundred Zeros gets gets directly to Amazon to order the book. You don't have to go through any other step, sign up for a Hundred Zeros account or anything else. Just click on the free book you want and you will immediately be taken right to Amazon.com to download it to your Kindle. But before you leave the Hundred Zeros website, you can see the book's star rating, which is useful as you browse through the books - to be able to take a look around the highest rated ebooks. Unfortunately, though, you can't sort the books by score, and not all books seem to have a score. Also on the Hundred Zeros website, below each book, is a link to the items that the ebook included, as well as the author. Click on these links and you will get a list of all the other Hundred Zeros ebooks written by the same person or that are cataloged under the same topic. While this can be really useful, it is often the case that books added a long time ago are no longer free to download. It is recommended to subscribe to the Newsletter in Hundred Zeros - you just need to enter your email address. This way, you can get instant email notifications every time new free ebooks are added to the website. This is definitely an easier way to stay on top of fresh content rather than checking the website every day. The Hundred Zeros link above is in the American version of the website, but there is also a UK, German, Italian, French, Spanish, and Canadian version that you can find on the right side of the Hundred Zeros website. Website.
