

Greetings, it is I, Michael. I come as an archangelic presence as well as a Lord of Light as we meet to prepare the vast energetics that you will be receiving into your body. I would like to talk to you this evening about The Element of Love and the importance of that creative element. As you know, it is present in every creative movement through the more refined dimensional sequences. So keep this in mind as I continue to talk. It has been quite difficult for many of you to fully understand what that element is. For a long time you have equated love with an emotion. And you have learned over the last few years that there is so much more than that emotion or that feeling. That there is power in this element, not to dominate but to create as Source creates.

So I would like to go back to what has been happening to you in the last months in activating the Light Packets, the 4 Light packets that you have activated. These are important concepts that I need to remind you of before we proceed in our further energetic activation. First of all, let's talk about this first Light Packet. This is significant here because that Light Packet was placed in your fourth chakra to stimulate self-love and self-value aspect of yourself in that chakra. Also, at that meeting you activated that fourth strand of DNA. The first Light Packet holds a fifth dimensional Light Template that you retrieved from the time locks in 2016 and 2017. It brings that fifth dimensional consciousness to the body. It does this through the fourth chakra. It begins to activate that awareness of love. Most importantly, the importance of love for self, the love that you are, the love that you were created in.

The 2nd Light template was placed in the Sacred Heart and it activated the fifth strand of DNA. This light packet contains the 5th, 6th and 7th dimensional Light templates that were retrieved. You can continually draw from that 5th, 6th, 7th dimensional Light Template through Universal Mind in the Sacred Heart. So when the second Light Packet was placed in your Sacred Heart, it provided the ability for you to consistently draw from that 5th, 6th, 7th dimensional Light Template that was retrieved from the Time locks. Understand, that this fourth and fifth strand of DNA work together. They work together in the Element of Love to stimulate that fourth chakra to function in the Element of Love in your awareness of that through an acceptance of yourself as Love and respecting that. This 4th chakra works with the other 3 chakras in the body. As you know, these four chakras create your reality in a body. But we're bringing this up now to another

Pre-Conference Call 1 Archangel Michael 1e May 22, 2018

octave. We're bringing it up to that 5th dimension because it is imperative that you now are able energetically to function in the mid-range of 5th dimension in order to hold these massive Light Templates of 6th and 7th dimension that you will be retrieving when the conference is in session.

This 3rd packet was placed in the 3rd and 5th chakras. These two chakras have to do with creation through will and power. In the presence of that third Light Packet these two chakras function in a unified sequence. This is important. That will and power has to be drawn from the will and power of Source into your third chakra, your will and power center. In the presence of the three Light Packets, these two chakras function in the unified sequence as I've said, but the packet also transmits a consciousness of 5th 6th 7th dimensional templates and brings them into the 3rd, 4th, and 5th chakras. This helps you to use the Element of Love in your creation, powerfully.

The third packet of Light was placed in the 6th strand of DNA. This helps you to maintain equilibrium in your energetic field. This is very important. You have to have equilibrium in your energetic system so there are no variances when you start working with these powerful Light Templates - that they are consistent, and that they flow through your chakra system, most importantly, those first 4 chakras because that's what's going to impact your body and your daily life, your consciousness.

The 6th strand of DNA also assists you to travel interdimensionally between 5th.6th.7th dimensions. This DNA strand continually brings change to the electro/magnetic field of the body and also to the Earth. So you can see how important this exercise was that Melainah led you in today, always taking that back into the Earth, receiving from the Earth, from the Earth Star, the Soul Star of the Earth, the original state of the Earth as a Christed Planet. Just like you draw from your Soul Star, your soul/spirit as that Christed Being. So this exercise that you are being asked to do every day until we meet in the conference is an important one. It is basic in a lot of ways but actually it is much more dynamic because of the consciousness that you now hold, the awareness that you now have.

When this 6th strand of DNA is fully activated, and in the presence of the third Light Packet, the heart chakra is kept clear of misaligned energies. That is very

important. Wouldn't you think? The filters of the third dimension in the heart chakra are dissolved. The doubt that you might have about loving yourself. The third Light Packet also provides information and energetics to the cells of the body, regarding transformation both physically and etherically.

The 4th Light packet was placed in the 7th strand of DNA which was activated in the presence of the fourth Light Packet. The filters in the heart chakra and also in the Sacred Heart chakra are altered. Creative action is taken through the Element of Love. So whenever you have an impetus to create something that element of Love is there. There is equilibrium in the energetics to help you use that Light packet in the Sacred Heart consciousness. The 6th and 7th strand of DNA work together and the fourth Light Packet was also placed in the eighth chakra in the Third Triad. That was covered in our last session.

As you know, that 8th chakra holds Universal Mind and this particular iteration of the eighth chakra is used to create without limit. It is not affected by time or space. Great benefit to having this chakra operate in both positions is very important. The chakras in the 3rd Triad must be functioning in order for the fourth triad to transmit the electrical charges relating to the creation of Ze'On particles of thought. The third triad must receive these particles and transmit them through the body system so they can be used to create and manifest in complete Christ Consciousness. So you can see here how important these steps that you have taken are. Just in the last few months of activating these Light Templates, activating the Light packets, activating the DNA strands. I want to bring your attention again to the streaming from Universal Mind so that your thoughts are always in alignment with Universal Mind. That you use the Element of Love. You have it at your disposal at any time. By streaming that energy out of the eighth chakra, Universal Mind both in that 3rd triad and also in your power center, you begin to create efficiently in Love very efficiently and you never doubt that you love and value yourself. So that 4th chakra begins to work very efficiently and it is continually cycling through all of your chakras.

Every chakra in your body is dependent on the chakra before it. If there is limitation in the 1st chakra, the second chakra cannot function perfectly. It cannot function adequately enough to build the energy needed for the third chakra to function and same for the 4th. But now that you have these Light packets, you have the ability to start streaming from these vast Light Templates that you

retrieved out of the time locks. All of the chakra system in the body - those 7 chakras in the body began to function very efficiently because you have taken the time and the energy to remove the anomalies. But you also have access to these Light Templates that are very powerful. So the energetics of each and every chakra starting with that 1st chakra are very potent and they allow a flow of energy throughout the entire seven chakra system. They also are stimulated through these Light Packets, through the Light Templates that you retrieved but also through that Sapphire blue Star tetrahedrons that you placed in each and every one of those seven chakras. And when you did that you began to spin those chakras so that they would mimic the rotation and the energetic spin of the higher seven chakras that are above the body so the entire 14 chakra system is functioning in a unified way.

So now, with the creation of this grounding cord and sending it into the Earth Star where you begin a streaming affect up the chakra system and then back down the chakra system back into the Earth Star so that you begin to receive from the Earth the vital elemental energies that are needed for the body to transform at a cellular level in your body at 5th dimension.

This all will build up, step by step, and culminate in the retrieval of a complete 6th and 7th dimensional Light Template that provides you the opportunity to not only be in the beginning stages of fifth dimension but to be in that mid-range and maintain that mid-range without wavering.

Before we close our session this evening, I would like lead you in another energetic movement so we connect all these pieces and parts that I have been talking about. But energetically begin the flow of them through the body and drawing from that Sacred Heart. Streaming that Sacred Heart energy, the Element of Love, from the Sacred Heart, in through the body and in through that fourth chakra so that it is imbued with a more refined aspect of love, the Element of Love. And is made usable within your first four chakras which is how you manifest your experience of life in a body in form. And create that refined experience in Christ Consciousness.
