

Greetings, it is I, Melchizedek. I have come to facilitate this first session of this level 2 teaching. It is important that you, in this teaching, pick out three or four significant energetic and conceptual parts of 2016. And this is what we will focus on at the beginning of this session - asking them to re-visit those energetic templates that they have absorbed both consciously and also in various levels of their physicality.

This is important to recognize because - not only is this a year of new beginnings, of new creations, but it is also a year of many changes in the physical body. In the coming months, we will go more in depth to the Light body activation. This Light body activation has been influenced to a great degree by the absorption of the energetics that were brought into being through these participants in 2016 - also the retrieval of the 5th dimensional light templates as well as the 6th and 7th dimensional light template. These are beginning stages of great change in the consciousness as well as the physicality.

So as we focus more in-depth on the Light body, it will assist these individuals as we progress through this year and in preparation for the 2nd Crystal conference that will be held in June. A preparation is now in process for this service that will be provided by the participants of this gathering. It will also be supported by those individuals in this group who will not physically attend, but who physically embody the energetic elements that are required for the next retrievals.

So in the beginning it is appropriate that we begin to look at the Light body, which is the energetic system of a 5th dimensional physical body. Understand that humanity and these individuals who now operate in physical form are not to the juncture where the Adam Kadmon body can be activated, or even begin that activation because the Adam Kadmon body is a 12th dimensional body. What you are creating at this time is a 5th dimensional body. And this is a significant upgrade, even though you are very anxious to move on through the dimensions and create this Adam Kadmon vehicle.

Focus now is needed on this 5th dimensional body transformation and transfer out of the density of that 3rd dimension. You have worked very diligently in this last year creating unity within the system, within the consciousness, the mental, emotional body, and the physical body. You have altered significantly the beginning strands of the DNA which will assist you greatly in manifesting that 5th dimensional body.

5:11

You have at your disposal the first templates of that 5th dimension. And that is the Love and Unity template and the energetics that go along with that. You also have the magnetics of the 6th dimensional template that you have access to. And you have access to the beginning stages of pure creators that are embedded in the beginning stages of the 7th dimension. So these are significant roles that you have begun to embody. And it would be advisable for the individuals to review what has been gained in these areas in this last year, what has been expanded by the presence of these templates. The Rays of Creation - access to a more in-depth functioning of the Rays of Creation has increased dramatically. You need to recognize this. So my advice at this time is to make this recording available to this collective group before the meeting.

We desire, from the Collective consciousness, to have an in-depth discussion with these individuals. And they should prepare for this discussion - not just to ask questions, but to converse with all the Masters, the Lords of Light and most importantly, the Archangels who have been guiding you for some time now. So it's important that not only that you have a discussion about what you have noticed about the changes - not just in your consciousness, but how that was applied in the actual functioning of your physical body. And then most importantly the part of that physical expression that has to do with the unification of the mental, emotional body.

So this is the progression that will take place in our meeting. It will be a discussion, and within this discussion we will ask these individuals, as they make their comments, to also ask questions about any confusion that they might hold. Now understand these questions should be formulated - not from points that you have forgotten through a review, but points where you have focused your attention on clarification and are in need of some further guidance.

We are not here to discuss what has already been taught and given. But we are here to communicate with you more fully in a unified way, and also address some of the questions where you are desiring to expand in certain areas such as the Light body, such as the unification within the physical body, the alterations, further alterations within the mental, emotional body, so that you create very precisely with that body and also consciously. So let me pause here and ask you if there are comments that you would like to make, or if there are questions that weigh heavily on you at this time.

9:52

Q: I'd like a little advice on the first part of this session, which you suggested that we take three or four very important parts of 2016 class and have a little review and of course re-visit. Could you give me some ideas on what you think would be those particular subjects?

A: Yes. The installation of the Blue Star tetrahedron was a very significant piece that we covered in the first part of the Seating of the Divine, where a unification was established in the fourteen chakra system and a significant alteration in the functioning of first three chakras where they became part of the Triadic system, through an operational vehicle of the First triad, and also a more defined look at the Triadic system. That's number one.

The second most significant thing that needs to be recognized is the activation of and the full Merkaba field and the upgrade of light that became available as the practice was embraced and connected in through the Sacred heart energy and consciousness. So that is a second piece.

The third significant piece was of course the retrieval of four Light templates that relate to that the 5th, 6th, 7th dimension so that you now function in that multi-dimensional state of consciousness.

Sometimes the body has difficulty, especially when you draw to yourself through that 10th Ray and the magnetics of Source which are very present in your field now. You draw to you significant amounts of light frequencies from the Creative realm. And sometimes it is overwhelming to the physical body itself because it is not fully transformed into that 5th dimension.

So I think those are important points - are three key pieces. And of course there was the further applications of how you can use these 5th, 6th, 7th dimensional Light templates and magnetics, and apply them through the use of the creative rays, expanding and making usable the Rays of Creation, especially the 4th, 5th and 6th.

There were a lot of changes that occurred because of working with that 4th, 5th and 6th Ray of Creation and the replacement patterns. Much surfaced in the mental, emotional body that needed to be eliminated.

13:51

There was a consciousness that was established that allowed you to see yourself totally different - as being in charge of your creation, of being more conscious of yourself as that Divine image. The image in your mind of yourself was completely changed in the last segments of this past year.

Q: Sort of a review of what happened last year and make sure everybody's up to speed on all those.

A: I will come forth as a Lord of Light to facilitate this session further. Understand I will be a spokesperson of the collective of the Lords of Light. And this is another point that should be recognized - that you have begun to see and to understand there are individual expressions within the Divine realms as well as massive collectives functioning simultaneously. And as the individual creator, as the individual unique expression of the Divine, you are also beginning to operate more at that collective state, through emulating what you have learned from the Archangels, from the Masters and from we, Lords of Light.

Q: So that's when we talked about 5th dimension, that's the Unity piece that we talked about.

A: Yes. That you are unified at all levels. And it is just bringing forth the realization of that and making the adjustments not only in the consciousness - in the energetics and in the physical body.

Q: That sounds like a full session. A: It will be a very full session.

Q: And just so that I don't misspeak here but – what would you say the two most important things that we will go over this year in this level 2?

A: Well, that depends on the group. It depends on the absorption - not only of the concepts, but of the energetics. This past year of your time was energetically transformative and potent. And you are still absorbing some of those energetics. So as we gather, we converse, and not only do we lead, but you also lead us in what is needed and desired at certain junctures of the teaching - not just through idle curiosity but through in-depth introspection of the energetics that you embody and use consistently and the consciousness that is available to you.

17:27

How would you like to see certain areas of that expanded? So this becomes, as we progress in this Unity consciousness, in the Undifferentiated light of Source, the magnetics of Source, as we progress it becomes very much a co-creative event - not just us teaching you or facilitating, but of you fully participating.

Q: Excellent. Is there anything else that you feel that we should discover to start with?

A: I think this will be a very full session because in addition to having this conversation, which we will allot a certain increment of your time to, but there will also be some energetic work involved.

Here is another point. It's very important in doing this work and this reflection - this is a very reflective month - that you allow yourself to journal and to write your experience, to write your questions, and then sit quietly to see how quickly your answers come, or if you need further assistance.

The only way that you will be fully as part of this co-creative collective consciousness this year is for you to utilize a journal, or at least a pad of paper where you have jotted down questions, concerns, experiences of any kind, so that when we have these discussions, they are fruitful. They are not filled with idle questions, but they are in-depth, which continue then to expand the transformational process.

So in the month between our sessions there is much to do. And you cannot wait until a few days before our meeting to gather productive information together to discuss. So this is where some due diligence is needed and some actual organization on your part - discipline, self-discipline, to daily work with the energetics. And we are honored to be working with such receptive beings. Blessings.
