

Lord Melchizedek:

So now I join with the Collective Consciousness of the Lords of Light, and I also ask you to merge your consciousness, at this moment, as that individual, as the Collective Consciousness of this group. And let us merge into one unified expression of a Collective Consciousness. [Short Pause]

We would like to now take this opportunity to bring forth into your consciousness, into this Collective, a Light Emanation that will bring further conscious awareness of you at that vaster state.....

So take a deep breath.....

See yourself as that individual Divine Image immersed in this massive Collective Energy.

Within this Collective Energy, there is an energetic resource that would be very helpful for you to have at this time.....

It is an energetic resource of an expansion of the Triadic system. You have merged the first three chakras into that Heart Center, creating a unified expression of the 1st Triad. The energetics were increased dramatically with the interface of the Blue Star Tetrahedron within these chakras, so that they now function in a more refined frequency and are part of that 1st Triad. They hold the functioning of the 2nd Triad, which is the center where much is created in the physical. And then the 3rd Triad, which begins the connection with more refined energetics of your nonphysical expression, opening a flow that is now taking place where you have a unified expression of the energetics of a 14-chakra system.

There is another Triadic system that is now available that we will help you engage in this moment. It is a Triad configuration of the 9th, 10th, and 11th chakras, spinning in a unified field of a Triadic configuration. And this configuration also folds into the 1st three Triads.

There are specifics within this Triadic system that formulate an Ascension Triad. You have the interface and the consciousness of a Collective Consciousness unified with the Lords of Light, the Archangels, the Ascended Masters, and the Elohim. You have an opening of another level of the Mind that not only relates to your physical expression but relates to the vaster Collective Consciousness of the Creative Realms of Source Energy, through that 10th chakra. And then you have the beautiful spinning 11th chakra which contains the Undifferentiated Light and Love of Source.

This Ascension Triad, when functioning as a unit, has such energetics, massive energetics that are created within that spin. As they are folded into the first three Triads, there is a movement, a spiraling movement up and down the center column of the body and the unification of a now four-Triadic system. Eventually, there will be five.

[7:28] But let us focus on this chamber of the 4th Triad that brings Unity. It brings higher dimensional frequencies of 5th, 6th, 7th dimensions into play. It brings a consciousness, a Collective Consciousness that you now have access to, and it brings more Unity into the system. These energetics are important energetics that you are beginning to initiate into your system, into your Unified Field.....

So, take a moment here. Focus your attention on the 1st Triad, as it spins and spins and spins and creates the foundation that holds all of the Triads in one unified expression.....

Recognize the activation and Presence of the 2nd Triad, the spinning individually of each of those chakras..... And as the 2nd Triad spins, it folds into the 1st, becomes one unit, a spiraling vortex of energy, creative energy.....

And then the 3rd Triad: the Crown, the 8th chakra, and the Soul Star..... spinning in one unified vortex, folding in to the other two Triads, creating a Unified Field of energy..... physically, individually, collective energy..... powerful, collective energy.

And now, the 9th chakra is engaged, spinning and spinning. The Presence of that vaster collective energy..... the 10th chakra, an opening and Presence of the Christed Mind..... and the 11th chakra, the Presence of Undifferentiated Light and Love of Source Energy, creative energy..... that is yet to be applied by you as an individual creator.

As this Ascension chamber spins and spins and spins, it becomes one dynamic unified Triadic system. And it is folded into the other three Triads, forming a beautiful unified expression of you as the Divine individual creator and as the vast Collective Consciousness, operating in unification, in massive unconditional Love and as pure creative force..... altering, changing, creating, expanding.

And as these Triads spin in unification..... as a service to Mother Earth..... anchor this swirling vortice into the Heart of Mother Earth, creating an energetic opening within Earth to receive a vaster expression of Christ Consciousness.....

Now, see the Light that is emanating from you as that individual within the Collective Consciousness, unified in an energetic vortice..... [Short Pause]

Take the opportunity in the coming days to be conscious of this Triadic system: four Triads now functioning in Unity within your energetic system. That Ascension chamber is open and energetically potent and functioning.

[16:54] The energetics must be taken care of at this increment of your evolution, so that you never waver from the consciousness of a Collective Consciousness of what you are a part and also as yourself, being an individual expression of that Collective Consciousness. This 4th Triad energetically supports that consistent conscious awareness that is ever present and never wavers. It is a knowing of your state of being..... [Short Pause]

We ask that you use these energetics daily. They are quite extensive and will take some integration..... Notice subtle changes as they occur. Document them. Sit in quiet contemplation..... And in your musings, and your wondering, experience the wonderment of your vastness..... [Short Pause]

In our next gathering, we hope to have further conversations, so that we might expand the energetics and guide you further in the unique expressions of these new energetics.

Blessings!
