

In our last session together some very important energetic templates were opened and brought into your consciousness. These templates have many components and are so immense they cannot be fully set in place at one time. You could not begin to receive and integrate these templates until you had opened some of the time locks. Now that the beginning stages of the opening of the 5th, 6th, and 7th-dimensional templates have been received and integrated into your energetic system, you are ready to receive an infusion of these new immense and transformative energies. These energies affect our physical bodies as well as our consciousness and our energetics.

These new energetics bring a new conscious awareness and interior focus. You begin to discover that nothing is outside of you. The body is being prepared to possess a complete Unified Field of energy. The body's vibrations and Light frequencies have gradually been upgraded and will continue to be upgraded in the coming months. As your SoulSpirit begins to take sovereignty within the various bodies of your energy system, you begin to remember yourself as the Divine Image.

The activation of the 14-chakra system that took place at 12-12-12 now begins to take hold as the 8th chakra is recognized as being within your energy bodies. Your 8th chakra resides in the 1st chakra of your OverSoul body. It interfaces with the Etheric body through the expanded and more conscious mental-emotional body. The mental-emotional body starts the ascension of its consciousness so that it can be the interface between all bodies and levels of your physical expression and your energy system that holds your physical experience.

This one aspect of conscious awareness -- that nothing is outside of you but is within you -- begins an energetic conversion in the matter and consciousness of the body and SoulSpirit's ability to fully use the body as a vehicle of expression in the world of form. The Triadic system is now being expanded because of the presence of these immense Light templates. The 1st Triad was composed of the heart chakra, the high heart, and the throat chakra. This Triad was expanded when the transformed first four chakras were merged into this Triad. The 1st Triad is fully anchored into the Earth. It incorporates both the physical and non-physical functions of you as a Spirit in a body. The spinning of this Triad has also been influenced and spins at a higher and more refined velocity. This was an important upgrade, because the 1st Triad must be able to merge with all of the Triads and be part of a massive Unified Field that is being created.

The 2nd Triad is composed of the 3rd eye, the pineal, and the medulla oblongata. This Triad began to be upgraded when the liquid Light, the Light nectar, and the laser Light functions became usable in the body.

The liquid Light altered the vibrations of the entire cellular system. The nectar Light bonded with the neurons of the cells and altered a more coherent function of the cell so it could replicate from its original perfected state. The neurons in the brain began to function at a higher and more refined frequency range and substantially altered the communication within the brain and body. This added coherency within the neurology of the physical body.

The 3rd Triad is composed of the 7th or crown chakra, the 8th chakra, and the Soul Star. The crown chakra must be open and functioning before you can begin your ascension out of 3rd dimension.

The crown chakra is the chakra that opens to receive a constant flow of Undifferentiated Light from the Source of your being. When you are able to receive this Light on a continuous basis, you learn to use it to transform your consciousness and the consciousness of the body.

The 8th chakra is the vortex of Universal Mind, which pertains to your physical experience and guides you to transform the lower densities of the 3rd dimensional body. The Soul Star is a holding energetic crucible that contains the fullness of your SoulSpirit in its original state. The Soul Star also contains your memory of your Collective Consciousness and your various Monadic iterations.

The 3rd Triad, when fully unified with the first two Triads, resides within your physical energy system. The descension of your SoulSpirit into the body begins to take place. The 5th dimensional Light Body begins to be activated.

The 3rd Triad was also expanded and amplified by the presence of Undifferentiated Light. The 7th chakra became a transmitter of Light as well as a receiver. This enabled the 8th chakra to make its descension into the body and the Unified Field. The Soul Star consciousness is now available to remember and incorporate into the body's Unified Field. The remembrance of self as a massive Collective Consciousness as well as an individual consciousness that operates simultaneously has already begun.

The first three Triads have begun to spin at a higher velocity and refined spin. This opened the Ascension chakras so you began to function within a 14-chakra system. When this happened, you were impregnated with an immense Light template so that you could access and use a 4th Triad.

The 4th Triad is composed of the 9th, 10th, and 11th chakras. It is an Ascension Triad. The 9th chakra is your access to the Lords of Light, the Elohim, the Archangels, and the Ascended Masters. The 10th chakra is another level of the Mind of Source. The 11th chakra holds the pure Undifferentiated Light of Source.

This Triad has an immense spinning field of expression which alters the first three Triads' spin and velocity. When it merges with the first three Triads, the impact on the physical body is extensive.

The 4th Triad transforms the energy system of the body. It alters and transforms your consciousness into Christ Consciousness. It activates the Light Body to a fuller expression. The 4th Triad further alters the DNA structure and activates more strands. You then can have more conscious use of these strands. This Triad begins the transformation of the 3rd dimensional physical body into a 5th dimensional physical body.
