

Greetings, it is I, Lord Melchizedek.

It is important for you to recognize what is occurring within your body, the transformation that is taking place within your chakra system. The Triadic system is now functioning in a more consistent, refined vibratory level, because of the activation of that 4th Triad. As I have said before, it will take some months for that to be fully integrated, but you are well on your way.

You are understanding the function of that 4th Triad and how it impacts the 3rd Triad, the 2nd Triad, and the 1st Triad, all of the chakras, this expansion of the Unified Field functioning in a unified, harmonic way. You are noticing how anomalies within the mental/emotional body, especially the emotions, and also in the mental body, of the body, of the consciousness of the body is now shifting, when the emotions rise, where there is grief or there is anxiety. And you are relaxing into the influence of that refinement of that 4th Triad, where there is calmness. And you are allowing those feelings to surface and just release them without having to understand it or to do anything with it. You are just releasing it from the body.

The release from the body is a key component in the changes that must be made within the body. As you all know, the denseness of that body was severe in the 3rd dimension. So, releases will come in the Presence of that refined vibratory level of the 4th Triad, as it comes through the 3rd Triad and expands that Triad, and the functioning of the Triad itself, the 3rd Triad. The Crown remains open all of the time, not only bringing in the Undifferentiated Light, the vibrations of harmony, peace, the vibration of that calmness, but it also becomes a generator of Light. You in your walking around state, in that new 5th dimensional body that you are creating, are emanating a Light frequency, a vibration that impacts the world, the Earth that you walk on, the humans that you interact with, whether they be friends or just acquaintances or total strangers. And you influence the world in this state of consciousness, as the body takes on more Light, takes on a refinement of 5th dimension. And yes, embrace that calmness, Beloveds!

Soon you will begin to experiment with various Light vibrations, by bringing in more of that 11th chakra Undifferentiated Light and differentiating it as the creator, making it applicable in the body to assist the physical body in coming into that 5th dimensional state. Much conversation took place this evening about the Color Codes, about Sound Templates. These are all very valid pieces and parts that you are charged with bringing forth and using at an individual level to bring forth a larger integrated state of that 5th dimensional physical body in that transformation.

[6:42] As you transform your own personal bodies, at that individual level, and then gather together in the Collective at the Collective level, at that Collective level it helps you hold the energies of that 5th dimensional body, because you are the Collective Consciousness that is part of that body. And it helps you maintain what you have achieved in each session, in each meeting.

And as you work individually with your body, with your chakra system, you have much here to work with in the coming months. Many of you have started to go back and review. And, as you will discover, we have continually brought forth the need to look at the chakra system, to look at the Triads, to look at the mental/emotional body. And you are doing this.

One of the key components here, that we first began with at the very beginning of these sessions of Seating of the Divine in 2016, was that Sapphire Blue Star Tetrahedron, where you brought Unity into the 14-chakra system. And you altered the vibration of the chakras, so they began to work in more harmony and Unity.

The Color Codes are key in this, not only in altering the effects of the mental/emotional body and each chakra as you express yourself in the world but also in revitalizing the organs, using Color and Sound. So there is a wealth of tools, information, vibrations, energies that you have at your disposal to upgrade your body significantly.

Continue to work with that 4th Triad, because it influences to a great extent the three Triads that you have been working with for some time. It alters those significantly and therefore it alters the function of the 14-chakra system.

So, with that said, Beloveds, I would like to engage with you in a conversation. And we will use the same format as you have been using earlier this evening. So please, now, converse with me, ask your questions, and let us have a discussion.
