

Greetings, it is I, Michael.

I am delighted to be gathering with you this evening and presenting this very valuable information and this very valuable energetic explanation of the things that are occurring in the present time and that many of you are unaware of.

I wish to speak with you this evening about holographic projections. Now, I think in a previous conversation, holographic images were talked about within your Collective. So, I want to explain to you that holographic images stem from these holographic projections that come from vast regions of the Collective Consciousness and from the various realms of creation, whether they have form or they do not have form. Holographic projections are not very well known in your scientific community. And holographic images are somewhat relegated to a certain theory. And so, we will be using both terms. Although they are vastly..... they have variances.

So, let's just talk about what a holographic projection is. First of all, these projections are energetic projections. They are multi-layered; they contain massive amounts of Undifferentiated Light, Color, and Sound. And they emanate from the higher dimensional regions of the Creative Realms. When holographic projections are brought into denser dimensions, they come through gateways that then create holographic images that can be made usable in denser states of form. These holographic images contain various levels of geometric progressions that are intended to stimulate alterations to dense form, bringing it into more refined and evolved states. Examples of these holographs are crop circles and the Flower of Life.

Crop Circles – let's talk about that. Crop circles contain three to twelve multi-dimensional layers, depending on the complexity of the geometry and the geometric progression. Each crop circle has a purpose in stimulating a change in consciousness and an alteration in the frequencies of dense matter. Even the simplest three-layered geometric progression holds the whole geometric progression of the original holographic projection at its origination.

A simple holograph focuses the attention on a specific layer that is needed in a particular time sequence.

The Flower of Life – let's talk about the Flower of Life. The Flower of Life contains sixteen layers of geometric progressions. Even though it is perceived as coming from ancient times, it was created at the fall of consciousness. It is designed to facilitate Ascension. But most importantly, it holds all of the original templates of Earth as a Christed planet and humans as Divine Christed Beings.

The Flower of Life is significant because it is a massive holographic projection that was compressed in various planetary gateways to be utilized in denser dimensions as a physical image, even though it may appear as one image, it is multi layered and contains the whole original holographic projection. When the layers of it are discovered and deciphered, a great change in consciousness and an alteration in the frequencies of matter occur.

A specific holographic projection is the 4th Triad. And others are designed to alter the consciousness of the chakra system and the mental-emotional body. The 4th Triad carries multi-layered projections from the vast refined Creative Realms that are intended to alter the dense form, bringing it back into its original state where all states of consciousness are present simultaneously. Creation can take place in any one state without depleting the state of the whole. There is no cross contamination and the original remains in its perfected state. Simpler, denser creations always follow the original projection of creation but allows for many variations to be created and exist. This alone alters and changes the direction of your Ascension process and also the danger of fragmentation in bringing cross contamination, such as what occurred during the final ages of Atlantis.

So, as these massive..... many of them coming from the Creative Realms of Source. These massive holographic projections were created and then facilitated and implemented through the Elohim and the Lords of Light.

It is not desired that you focus your attention in the coming two weeks on the specifics of holographic projections or holographic images but to begin to see the overall vast picture that we are giving you this evening, so that you can better implement this 4th Triad, knowing that it is a vast iteration of these beautiful projections coming from Source Energy to help you step further into that Divine Image and to walk in that Image constantly and consistently every moment, as you experience life in that beautiful, beautiful human form.

This 4th Triad is very, very important to your Ascension process. It allows you direct communication with all Realms of Creation. And we will expand upon that in the coming weeks, because it brings in those axiatonal lines that we've talked about with you on many previous occasions. But this chakra, the 9th chakra, where you become unified with the Lords of Light, the Masters, of which you are becoming one, the Elohim, all Realms. It helps you become unified in that consciousness.

In the 10th chakra, you begin to create a space within your Unified Field, within your chakra system, within your body, for Christ Consciousness to exist through the Christed OverSoul, using your Christed Mind. That, too, is such an expansive chakra that we will visit that often. With those two chakras unified in the chakras of your body, upgrading continually the mental-emotional body, your path on the Ascension is very straight. It allows you to see much larger perspectives of yourself from that vast Collective Consciousness of which you are one.

And then, of course, the 11th chakra, which contains the Undifferentiated Light, that Source Energy. And through the merging with that 2nd Triad, the pineal, and that 2nd Triadic function, you began to use that Undifferentiated Light, compress it, create differentials of that Light to be applied in ways that express your Christ Consciousness.

So, that said, we would like to take a few minutes here to invite you to converse with us for a few minutes, discussing what we have just related to you and asking any questions where we might expand upon it. Here again, do not allow yourself to move into your rational mind but see it from that bigger perspective and how it will help you integrate this 4th Triadic system.
