

Questions may be abbreviated when appropriate and non-essential parts of the conversation such as “hello”, “thank you”, etc, are usually omitted.

Responses from Lord Michael are word for word.

**Question 1.** [62:37] As you were talking, I was going out really galactic and beyond the galaxy and I was seeing all these different ways that the holographic projections are stepped down or focused or almost differentiated. And I was seeing an image of projections coming through the center of our galaxy. And then I was seeing the Andromeda Galaxy, not the Andromedans as an ET race, but the whole Andromeda Galaxy as a consciousness, and the way it's positioned in the Universe as being fairly close to the Milky Way and that being important in not just stepping down but kind of tweaking or refining or altering how the projections are coming into our Galaxy, for specific use in our plane, and then coming in through the center of our Galaxy and the projections being further refined and differentiated as they came in, then through the center of the Sun into the Earth.

And I also saw this picture going even beyond Andromeda how the different Galaxies are positioned in space. And that positioning itself – there's kind of a harmonic and a geometry there which shifts how the energies are felt within our Galaxy.

I don't know if that's way off but that's the image that I was getting.

**MICHAEL:** You are very accurate! So you can see how important this 4<sup>th</sup> Triadic system is and also your awareness of the existence of holographic projections and how vast they are. Of course, you know that we will be working with the Andromeda Collective Consciousness in this conference. So, you are seeing very clearly. And thank you for sharing your mastery!

**Question 1, cont'd:** And another image that I saw even before this call that -- as we all know we lots of times are doing the work ahead of time -- that I was interacting with some of the Ultraterrestrials: the Sirians, the dolphin intelligence. And they were showing me how they create. When we speak of saying “I want an apple” and it appearing, they don't do it as individuals. They do it at a much more smaller level, because we're not at the level of galaxies here, where their positioning in space -- you maybe have ten dolphins or twenty dolphins or Sirians – and their positioning in space and the geometry of how they bring the sound in from different directions and the rhythm that they move the energies is how they actually create from an image and bring it down from the holographic image and have it coalesce into form.

[66:42] **MICHAEL:** Yes! Correct! Correct!

As you know, part of our quest[?] in these teachings is to alter the frequency and vibration of matter, to bring it into a more cohesive state of multi-dimensional frequencies, bringing it out of the denseness of 3<sup>rd</sup> and 4<sup>th</sup> dimension. So this is just the beginning.....  
And your vision is very accurate.

**Question 2.** [67] Thank YOU! And I want to say thank you to Charmaine for sharing her incredible vision with us. That was just awesome.....

But, I have a question. I believe you stated on last month's call that with the 4<sup>th</sup> Triad it folds down inside of the body and it brings the 3<sup>rd</sup> Triad with it. I've been experimenting with that in a couple of ways. One of the things that I've been doing is overlaying the 11<sup>th</sup> chakra directly over the pineal gland and drawing the Undifferentiated Light directly into the 2<sup>nd</sup> Triad, creating the Liquid Light, the Nectar, things like that. I wonder if you would like to comment on that and expand on that.

**MICHAEL:** Yes. This is an excellent exercise in the use of Undifferentiated Light.

Undifferentiated Light, as you know, is pure Source Light. And it is to be used to create with. In order to create, you have to bring it into that 2<sup>nd</sup> functioning Triad: the pineal, the 3<sup>rd</sup> eye that gives you vision, and also that medulla oblongata, which stimulates the neurology to accept more complex thought and to communicate it through the body.

Now, when it is brought into the pineal, that in itself is used to compress that very refined Undifferentiated Light and to make it more applicable within a denser form. So that is what you are doing when you bring that into that pineal, where it is compressed and then applied to significantly alter the vibration and the frequency of form. And you can do that through the Liquid Light in various ways. It is very instrumental in creating health and wellbeing within the body.

The Nectar has a function that alters the neurons in the cells. But that nectar has another function where it, because of its consistency, it is able to overlay certain frequencies that are not applicable in more refined states. And as it does that, it alters those frequencies that are used in the mental-emotional body and the mental body, the neurology of the body, where that mental body consistently produces fragmentation through its thoughts. So, when you apply this Nectar, it shifts and changes the neurology in the cells and overlays those fragmented thoughts, so that you can begin to alter those thoughts and bring in that Light into this neurology, into the thought system, that is more coherent with the Christed Mind, which is part of that 10<sup>th</sup> chakra.

So, as you work with, in the coming times, this 4<sup>th</sup> Triad, and you merge it into the 3<sup>rd</sup> Triad, into the 2<sup>nd</sup> Triad, into the 1<sup>st</sup> Triad, and then you begin to work with it in creative ways, such as you have done with the various Light applications. But also notice the shifts and changes that occur in specific chakras, shifts and changes that you can create in the mental body, in the emotional body, by applying various Light frequencies.

Does that expand a little on what you are experimenting with?

**Question 2, cont'd.** Yes. That will be very helpful and especially the part applying the Light to the fragmented mental body and those fragmented thoughts that come in. I think that will be very helpful. I will work with that. Thank you very much.

**MICHAEL:** Yes, and this..... Let me add this one thing, where you can begin to notice those fragments, because many times they are hidden, especially when you have worked as you have worked with various Light emanations. And you don't.... those Light emanations come to the forefront and they are, in the most part, in play in your life, which is a wonderful thing. But, where you can notice if there is fragmentation and where it is, in times when you are triggered, where an emotion rises that you hadn't expected, and so you're having to look at the thought. And sometimes it will be a sequence of triggers, and then you won't be triggered for a very, very long time, because everything has righted itself and is functioning in a coherent manner, because you're working with the chakras, you're working with the Triads, you're working with Light, pure Light!

**Question 2, cont'd:** I'll work with that and then I'll report back to you. How is that?

**MICHAEL:** Very good, very good!

[75:54] **Question 3:** I have a question relative to Andromedan energy. You have said that the energy of the Andromeda Galaxy is very high consciousness. I'm wondering if that energy is already impacting individuals here on Earth. Is it impacting already the planet?

**MICHAEL:** Yes, it is impacting. These holographic projections have been occurring for some time now. And so it is altering the vibration of the planet. But it is also increasing the frequencies, the more refined frequencies, within the Milky Way Galaxy. So, it is a vast system, an ally, shall we say, although when you think of it in terms of the Collective Consciousness of the All That Is, you are ALL unified in that state. And each one of you, whether it be the Andromeda Collective Consciousness or the Milky Way Collective Consciousness are operating in significant roles at this time, as individuals.

So yes, these holographic projections have been occurring for many, many years now and have been very successful in creating more refined states of consciousness, thus, in some ways, creating the chaotic energies that are occurring now, because, at the very core of the human Spirit, you are calling for drastic change, so this Ascension can move forward very very swiftly.

**Question 3, cont'd:** Thank you!

**MICHAEL:** You are very welcome and we thank you for your gifts that you give to the Collective.

**Question 4:** [79:20] I've been having some experiences on and off in the past year(s). And it seemed that when I have had acupuncture treatments and I felt a raise in consciousness, an image would appear. And that image has appeared in different times. But then when we activated the 4<sup>th</sup> Triad, the image of the Triads, for me, formed triangles, not necessarily equilateral triangles. And the 4<sup>th</sup> triangle was huge and it just slid right down, uniting the others and just locked in. And the basic point of that 4<sup>th</sup> Triad in that image that happened when I meditated on it, when we activated that 4<sup>th</sup> Triad, was in the Sacred Heart center. And then the whole image that had appeared before was the Sri Yantra. And it was one of those larger triangles that was the 4<sup>th</sup> Triad that just slid in and locked in to the other three, uniting them. Could you expand on that image. I now realize that it is a holographic image or projection that keeps coming to me.

[81:38] **MICHAEL:** Yeah. The Sri Yantra is a holographic projection. It is a very valuable layered projection, coming from the vast regions of the Collective Consciousness. It, too, has specific layers that are intended to awaken humanity and bring forth a firmer state of Christ Consciousness, not only on Earth but throughout the Milky Way Galaxy, all regions. So it is a vast holographic projection.

And the reason that you are seeing it -- each one of you, Beloveds, on this call will have very unique experiences of these holographic projections. Some of you will be very, very aligned with the Flower of Life. Some of you will see how related that Sri Yantra is in your energetic system. That's that individual expression coming to the forefront, that Divine expression of you. So, as these holographic projections come more into the state of form in various geometric progressions, they facilitate a more harmonious Ascension process.

So, we suggest to you that you continue to work with this projection and see how it correlates with your chakra system and within this Triadic system that is now being expanded within your Unified Field, because each one of those geometric progressions, the triangular progressions, has a purpose.

And when your consciousness is ready, it will be divulged to you, just as you have seen it in that 4<sup>th</sup> Triadic system and how it unifies the entire Triadic system. So continue to work with it, because this particular progression you are very aligned with, as you know.
