

Michael: Our time is now drawing to a close, Beloveds. This has been a very productive gathering, and we are delighted in what you are co-creating together with us. So before we close, I would like to lead you in an energetic merging and escalation of vibrations within your Triadic system.

In this new system, you begin with that 4th Triad. In the beginning, you always began with the 1st Triad, because it contained the Sacred Heart. Your Sacred Heart, Beloveds, is in a very unified state within your energetic fields. And it is part of that entire field and its consciousness is also part of the Triadic system. It is connected to and merged with that 4th Triad, 3rd Triad, 2nd Triad, and of course the 1st. So we will begin, and we ask that you do the same when you are working with it privately – begin with that 4th Triad, and see the magnificent Light that is contained within it..... [Short Pause]

The 9th chakra: the Collective Consciousness of you, the Lords of Light, the Elohim, the Source of your Being, the I AM Presence.....

The 10th chakra: the Christed Mind, the Christed OverSoul, and the most refined state of Source Mind that you are capable of receiving at this very moment.....

And the beautiful Undifferentiated Light that is present.....

And as that Triad spins, very coherently, the rotations are immense. And they spin and they spin, creating a vortex. And it merges with the 3rd Triad: the Crown, the SoulStar, and the Higher Mind that pertains to Source in form. As it merges with the spinning vortex that is already present in that 3rd Triad, it increases the massiveness of the 3rd Triad rotation and the spinning and the frequency and the vibration is substantially altered.

Allow that vortex to enter into the spinning Triad, the 2nd Triad, where creation in form takes place: the vision of the 3rd Eye, the application of Light in the pineal, which is very unified with that Sacred Heart, and the medulla oblongata is spinning and spinning, now coming into that unified expression of the 4th Triad, the 3rd, and now the 2nd. And the rotation is immense, the vibration is accelerated ten-fold. It enhances your ability to create consciously, precisely.

Now, allow it to merge with that 1st Triad, which encompasses all your chakras. And as it merges, the rotation is accelerated and increased. And as it spins and it spins, it anchors in that Earth Star. And as it anchors there, you begin to transmit the purity of Christ Energy into the Earth. A merging occurs in that Christed Matrix within the Earth and the Christed Matrix within your Heart. And they become one huge Christed Matrix, all unified within that Triadic system and within your Unified Field.

None of these energetics are outside you. They are one with your full expression of your Christed OverSoul: the Beauty of this expression of you as the individual Christ, simultaneously being the Collective of Christ Consciousness, unified in this vast field of energy.

Flood it with the Undifferentiated Love of Source and the Undifferentiated Light.

The luminosity of this energetic unification is beyond description. It is multi-colored. The luminosity is beyond description.....

You are beginning to see the Beauty of who you are..... [Short Pause]

Blessings!
