

JOHN: Now, let's move on to a short review of our last session. Our host last time, as a representative of the Lords of Light, was Michael.

He opened the evening with a discussion of the holographic projections. As he told us, they come from the vast regions of the Collective Consciousness and other various regions of creation. He explained that these holographic projections are not well known in our scientific community today. He explained that these projections are energetic projections that are multi-layered and contain massive amounts of Undifferentiated Light, Color, and Sound. They also contain various levels of geometric progressions that are intended to stimulate alterations to dense form. Examples of some of these are crop circles and the Flower of Life, which we're all familiar with.

Crop Circles contain three to twelve multi-dimensional layers. Each circle has a purpose in stimulating a change in consciousness and an alteration in the frequency of dense matter. A simple holograph focuses the attention on a specific layer that is needed in a particular time sequence.

The Flower of Life has been perceived as coming from ancient times, but actually it was created at the fall of consciousness to help us create our original state of being. The Flower of Life contains sixteen layers of geometric progressions. It is designed to facilitate Ascension, but most importantly, it holds all the original templates of Earth as a Christed Planet and humans as Divine creators.

Another specific holographic projection is the 4th Triad, which carries multi-layered projections from the vast refined Creative Realms. This Triad is intended to alter the dense form of the human body and of Earth.

Many of these massive holographic projections come from the Creative Realms of Source. These holographic projections have been facilitated and implemented through the Elohim and the Lords of Light.

Michael then moved on to the 4th Triad, which is very, very important to our Ascension process. Now, the 9th chakra is where we become unified with the Lords of Light, the Masters, of which we become one, the Elohim, and all realms. It helps us become unified in that consciousness. In the 10th chakra, we begin to create a space within our Unified Field, within our chakra system, and within our body. With these two chakras unified in the chakras of the body, an upgrading of the mental-emotional body takes place, which puts us on a very straight path to Ascension. Then, of course, there's the 11th chakra, which contains the Undifferentiated Light: Source Energy.

Through the merging with the 2nd Triad, the pineal, and the 2nd Triadic function, we begin to use that Undifferentiated Light. We compress it; we create differentials of that Light to be applied in ways that express our Christ Consciousness.
