

Greetings, It is the Collective Consciousness of the Lords of Light, in a specific configuration of a Triad of Collective Consciousness of Lord Metatron, Lord Michael, and Lord Melchizedek.

We are very pleased with the direction that has taken place in your consciousness, the openness and the receptiveness that each one of you has adopted with great excitement and anticipation of what you are able to achieve, as you move forward in these teachings. And we are delighted to see the coherence within this Collective Consciousness.

This evening, we wish to talk about the axiatonal lines and the importance of their activation and usability. You have had some teachings around this subject some time ago, and we wish to expand upon that information.

As you know, the axiatonal lines are Light channels that originate from the vast Creative Realms of the Collective Consciousness of All That Is. They carry templates of Light, Color, and Sound. And they are designed to stimulate a more extensive consciousness of individuals in form to know themselves as the Divine Individual state and remember that they are Divine Collective Consciousness that creates in the realms of form.

These lines also connect to other star systems, galaxies, and universes. They are nonphysical channels that contain information as well as energy templates. Your physical awareness was stimulated when these lines were shown to you as lines above the meridian system of the body.

The meridian system is not the same as these axiatonal lines. But the meridian system is also a nonphysical energy system that communicates with the physical body. When the meridian channels are operating coherently, the body is able to maintain a state of health and wellbeing. When there are blockages or anomalies, there's a breakdown in the energy communication within the body that causes disease.

In a 3<sup>rd</sup> dimensional state of consciousness, there's no communication available in either the axiatonal or the meridian system, because the individual is in a state of total separation. There's no conscious awareness of self as being a creative Being, having choice or the ability to create extensive communication with the body through the meridian system, or to create communication through the axiatonal lines with vast Cosmic Realms of Collective Consciousness, of which they are a part.

[3:49] When the restrictions of belief and thought are changed, the awareness of self is altered. As you open your consciousness to the level of 4<sup>th</sup> dimension, which you have done, these Light channels within the body's meridian system begin to activate.

Communication first begins with the individual Soul that's present in your body. The Soul begins to communicate its Wisdom to you, so you begin to see that you have choice in your creations.

The axiatonal lines begin their activation and interface within your Soul when you enter into the 5<sup>th</sup> Dimensional consciousness. Through the activation of the axiatonal lines, you create a direct interface with the OverSoul. These lines are your 5<sup>th</sup> Dimensional circulatory system, which uses Sound and Color to draw from the OverSoul Body the basic energy for the renewal of the human body. The OverSoul then begins its transition from being outside of the body, doming over the physical body and stemming from the 8<sup>th</sup> chakra. The 8<sup>th</sup> chakra, which holds that OverSoul Body, is also outside of the physical body. It then begins its descent into the body and is unified with the seven chakras of the body.

There are lines of communication that begin to open from the Soul Star, which is still outside of the physical body. The Soul Star holds the fullness of your Soul experience, as well as the fullness of your Spirit, which is the Divine Image of Source.

The activation of the axiatonal lines begins in the Pineal center of the 2<sup>nd</sup> Triad system; it begins there first, because this is where your active aware consciousness begins to flower, from that 5<sup>th</sup> Dimensional state of consciousness.

The axiatonal lines are extended into your Sacred Heart center, where the consciousness of the Holy Spirit Shekinah, as well as your Holy Spirit, resides in the body. Your entire 1<sup>st</sup> Triad starts to light up and connect into those axiatonal lines. When this direct interface is made, your OverSoul directs you to create the axiatonal interface with the 7-chakra system and beyond.

The memory codes and wisdom of your SoulSpirit are held in your Soul Star until you are ready to retrieve them. They are transmitted through the axiatonal lines. More Light begins to stream into the body, because of these first openings and communication.

The meridian system is further activated through the axial spin points of the axiatonal lines, which then connect to the spin points of the meridian system. When these axial spin points are connected to the meridian spin points, there's a lot of information that is relayed into the body through these massive communication channels of the axiatonal lines.

[8:08] The human body can be reprogrammed by the information and the Light that streams into the human system from star systems that have retained an evolved biological system. Your meridian system and OverSoul were cut off from this communication when you descended into 3<sup>rd</sup> dimension. And the axiatonal lines and the axiatonal spin point communication was disconnected. As you were able to re-establish these direct connections and communication channels, and also establish them within the OverSoul Body, the physical biological system began to receive the communications from other star systems.

The energetics and the information flow into all cells of the body, into the cellular spin points of each cell. The cellular spin point begins to rotate in faster rotations. And these rotations are continually stimulated by the electrical and magnetic charges that are now received in a coherent manner from the energy channels that connect with more evolved star systems that hold the perfected biological blueprint of the Adam Kadmon body type.

So you see, dear Ones, this Adam Kadmon body type is not just for humans on Earth. It is in other star systems that have semblance of a human form. They are also aligned with that perfected blueprint of the Adam Kadmon body. Your human body is a microcosm, or the small space-time field that is within a much larger field of the macrocosm. And I think you're beginning to see that from what we have just said to you.

The more the axiatonal lines are used, the more communication becomes available, and you are no longer isolated from other star systems. You become an active participant in the retrieval of your creative abilities. At a Soul level, you begin to petition the vast creative consciousness for more axiatonal lines to become available, active, and usable. When the axiatonal lines are usable, the OverSoul wisdom and memory is seated in the body. You come under the direction of your OverSoul and eventually under the direction of your Christed OverSoul, which contains the entire Christ Consciousness.

When the OverSoul consciousness is available on a consistent basis and the axiatonal line communication increases, your gifts, your spiritual gifts, begin to be more usable. Many of you are already seeing this and are able to use some of them, such as clairaudience, clairsentience, clairvoyance.

Dear Ones, when the OverSoul and the 8<sup>th</sup> chakra descended into the body, there was no big announcement to you. This is what is going to happen. It just happened.

[12:22] Your consciousness was flowering. You were able to implement and use the Light Templates of 5<sup>th</sup>/6<sup>th</sup>/7<sup>th</sup> Dimension that you retrieved from the time locks. And when all of that was incorporated into your physicality and into your consciousness, it was an automatic descent of not only Spirit, SoulSpirit, into the body, but the vastness of who you ARE that's held in that 8<sup>th</sup> chakra, the OverSoul, and the beginning stages of that Christed OverSoul.

And so, all of the experiences that you have been communicating in the last two meetings that we gathered are a direct result of this descension of the 8<sup>th</sup> chakra and the OverSoul into the body. So, you are experiencing a fuller state of consciousness, but a fuller part of you, both physically and nonphysically as well as spiritually. You are starting to experience that. We cannot tell you these things. You MUST experience them for yourself. That is how you know them. But we are just giving you, at this time, specific knowledge, terminology that you can then relate to, because you had that experience. You know that your body is changing. You feel it. You know that your ability to hold great amounts of Light in all parts of you is occurring, at a cellular level.

So, when we talk about these axiatonal lines being connected and the OverSoul coming to the forefront to direct you further, you already know that. You've experienced it. We're just kind of putting this in an order, so that as we progress and connect these axiatonal lines further, you are very open and receptive. And you create them, these axiatonal pathways, communication channels, for yourself, just as simply as intending it and directing your attention to it, to those areas where you want more interface.

Once there is communication through the axiatonal lines with the Soul Star and the communication is stable, full awareness of self as a Divine Image begins to occur. And that's occurring in each and every one of you. The line of communication is extended into your Spirit Consciousness, which is the Source of your Image. The similitude of who you are at a Spirit level returns and it also descends into the body and merges with the OverSoul.

You now have the ability and the consciousness to extend these axiatonal lines into your entire energetic Unified Field and Merkaba vehicle, strictly through your intention and your focus. Once these lines are fully established within your personal field, you can extend them into the Earth's Ley lines, as well as the longitude and latitude lines. This creates the beginning stages of a coherent communication with you as a human and the totality of Planet Earth, a real interface between humans and Earth is then possible, each supporting the other in the evolvment of Christ Consciousness.

[17:17] You know, Beloveds, you did the beginning stages of this work when you connected with the Elemental Kingdom and you developed a relationship with the elements of the Earth, the Elemental Kingdom. You built a trust within that community of elements. And you began to share from your Sacred Heart in great Love. And it was elevating to the elements of the Earth. So those beginning stages have already occurred. You have connected with the Elemental Kingdom.

And now, through these axiatonal pathways and lines of communication, you are actually connecting at an energetic level to Earth energy, which your body comes from. So there is a more coherent interface energetically between the body and the Earth energy. And one supports the other.

The axiatonal lines are now functioning from your Soul Star, your entire 14-chakra system, through your body, your entire Unified Field, and your Merkaba vehicle into multi dimensions. When you activated the 4<sup>th</sup> Triad, the Arc of the Covenant, the four Seed Crystals, you became ready to extend the axiatonal lines to other star systems that operate in well-developed states of consciousness.

Two-way communications with these specific star systems opens. So, it's not just one-way: "Oh, we need this; we need this; give this; give this." NO! YOU are a Christed Being of Light. You have much to transmit. So this is a two-way communication system.

Many in these star systems possess technologies that are both physical as well as nonphysical. These technologies are helpful to humanity to stimulate your evolving consciousness and the consciousness of Earth. But it also stimulates the perfected blueprint of the human body.

With this information presented, let's now open to have a conversation and a question and answer period for further exploration. I think this could be a really exciting interface that we will be able to open within our Collective group. So, please, let's begin. We are very interested to hear your comments and, most importantly, for you to ask your questions, so we can expand on this topic.
