

Greetings, Beloveds, It is I, Gabriel.

If you will take a deep breath now....

Get very centered in this moment....

Be aware of yourself in your Merkaba vehicle...

 filled with the Light that is emanating from every part of your Being...

Notice that all that was needed was to place your attention there.

You are automatically centered in this vehicle,

 and it is spinning at 100% Light.

As you have gathered, each one of you in this Collective Consciousness,

 in your Merkaba field,

you are gathered in a beautiful Crucible of Light...

Feel the Love that is present within this Crucible...

The Light that is present is luminous...

 It is brilliant...

Each one of you contributing to the brilliance of Light within this Collective Crucible...

It is fertile ground from which we will explore Divinity,

 the Divine Essence of which we ARE...

Each one being unique in that expression of the Divine...

Feel the power that is present, the creativeness that is present in this Crucible,

 unlimited potential,

Each one contributing to the creativeness of the Whole... [Pause]

A Collective dynamic expression of creativity... [Pause]

Now, take another deep breath

 and allow this state of consciousness to prevail throughout this Gathering time...

Another deep breath and be very present in this moment.
