

John:

This will be a review of the 5th, 6th, and 7th Dimensional Templates that we retrieved during our conference.

The 5th Dimensional Template that we retrieved is an expansion of the Template that we received in 2016. It has more complexity to it and is a valuable asset to each one of us as an embodied Spirit of Light. It will change your life and consciousness so that you can hold the fullness of both of the 5th Dimensional Light Templates that were retrieved.

We merged both the 2016 Light Template and the 2017 Light Template into a unified 5th Dimensional Light Template. The Triad will begin to work with us this evening to help us open our conscious awareness around this template.

The 6th Dimensional Light Template:

The 2017 6th Dimensional Light Template is an expansion of the 2016 Light Template. This Light Template is so much more than just a compression vehicle that brings into form a more refined set of dimensional frequencies. It is more than just Magnetics and has many distinctive function. The 2017 6th dimensional Template has more electrical charges and not only draws from the Magnetics of Source but also draws from Source Thought, which is more complex.

You were prepared for this when you received and started to integrate the 4th Triadic energetics. The 6th Dimensional Template of 2016 was merged with the 2017 6th Dimensional Light Template and became unified in its function.

The 7th Dimensional Light Template is a massive template. The 2016 Light Template that we retrieved was only a small portion of this immense Light Template. It opened a small doorway so we could begin to see and experience a portion of our Divinity. It was a very limited iteration and was folded into this year's 7th Dimensional Light Template.

When we all stepped up to open this 7th Dimensional Time lock, many things changed. Our duty was to take a portion of this massive Template and merge it with the 6th and 5th Dimensional Templates. This enabled us to consistently hold the consciousness of all three Dimensional Templates within the center of our Being and in our bodies in the complete awareness of our Divinity.

Metatron then talked to us about how we would be required to drop many perceptions of ourselves as individuals. The 7th Dimension is all about Collective Consciousness and Collective Christ Consciousness. We had been prepared for this when the 8th chakra was able to take its descent into the body as the 4th Triad was brought on line. Then the 8th chakra descended into the body and it brought with it a more complete function and awareness of our OverSoul.

Many things are occurring and our bodies are required to shift into a more refined frequency range. There is a lot for us to learn about ourselves and remember. As we explore the merged and more massive expressions of the 5th, 6th, and 7th Dimensional Templates, it is important for everyone to know that these three dimensional templates function as a unit.

Many dynamic changes are about to occur in the next three years or our time, as we integrate and use these valuable templates.
