

Metatron on The Luminaries

Post Conference 6-13-2017

Greetings it is I, Metatron. I am the collective consciousness of *The All That Is*. I am the Overseer of this Earthly realm in which you are presently engaged. As you are coming to realize, you have a heritage beyond what was conscious previously and that each one of you emanates from the vast Source regions as do we. You are part of a community of Luminaries from the vast regions of your Source Realm. You have spent eons of Earthly time since the fall of consciousness both in and out of various embodiments. It is important for you to start now to remember the origins of who you are and the lineage from which you originate. This is significant for you now, so that you lead the human collective consciousness. You have been called to Earth service to assist in the clearing of the crystalline grid through your individual interface through the axiatonal lines, the star gates, and the inner Earth communities. These interfaces are important so that you might be more productive in your service.

First and foremost, you as the leaders, as the facilitators and wisdom holders, you are evolving at a massive rate. We are with you. We are assisting you in retrieving those memory codes. Granted you will not remember all of the vastness of you. But you are being given an inroad into those realities. It is a process that you through your body and your consciousness are experiencing and integrating that provides such a value to humanity because you are the example in a human form. This will stimulate many to start to remember themselves at that vaster level.

Because of your presence and the energies, you are allowing Light energies to come through your body. You use your knowing, your remembering, your voice, your energetics, and your field of energy to make significant inroads into the denser planes of human consciousness. There is a lot that is said just within your field. There is a lot that is said to the collective through tele-thought communication channels that you have very little awareness of, other than that it exists. So we are very pleased at the results of this conference and the willingness of each and every one to take on the duties that they agreed upon when they took this embodiment. So, let us begin this session with discussing some things that you have questions about. Questions that in your discussions today that we want to address some of these things so that we can move on into specific teachings that will assist in the further expansion of the consciousness of a this group.

John: Will there be a 2018 conference?

Met: Yes, there will.

Metatron: You did an excellent job within a three-day time sequence. You were assisted by many to bring forth certain teachings, energetics, and certain things that had to be put into place. But it is not finished because of the massiveness of the seventh dimensional template that you were able to open.

John: So we should have three more days?

Metatron: No, because this collective consciousness, you included, were saturated. So you must now allow for that integration of what took place. You must allow for more of your consciousness to increase before we can go further. The channels of communication are now open and will be expanded. As we have told you previously, this next year is very important in that integration, in your ability to move forward in a more refined state of consciousness.

John: So it is going to be more of an expansion of what we just completed without opening more time locks, is that correct?

Metatron: That has not yet been decided. There is an interface that has to be energized with that Crystal of Knowledge because it has to do with each and every one of you from that lineage and the knowledge of self as that divine essence.

John: Ok, I understand the changes. But is three days OK?

Metatron: Yes, these individuals working at those multi levels of dimensions, including yourself, cannot hold the attention that is needed for any longer than that. We would not push you or ask you to go beyond your capacity. We would not want to put you in any kind of state where you perceived that you had failed.

John: Any idea about location?

Metatron: Yes, it is advisable to return to the Talimena Ridge because it was so beneficial to each and every participant.

John: Why?

Metatron: Because of the isolation, because of the opportunity to connect with the land, the quietness of the land itself, and the presence of that etheric crystal and the original shards of the Blue Crystal. The environment is conducive to the duty at hand.

John: We could not imagine finding another spot like it.

Metatron: Well, it would take some research, of course, but it's not necessary. This is the perfect atmosphere, the perfect location, the perfect environment to move to the next level.

John: OK. Any suggestions on time of year? Does this seem to be ok?

Metatron: It seems to be comfortable for most of you. So we will leave that to your discretion.

John: I just wanted to ask if there was flexibility in the timing.

Metatron: And you have plenty of time. And because you have had all the arrangements this year, it will be with ease because much of it can be duplicated.

John: Just a phone call.

Melainah: Find out what dates are available.

Melainah: So our conversation this morning, I'm sure you're aware of, we have this discovery about the Elementals and this connection to what we refer to as the Earth Goddesses like Lillinoi and Pele. Are we on the right track with that?

Metatron: Yes, you are. You are discovering more about the Earth. It is a Christed Planet. Even though you have this denseness that has been part of its physicality for a very long time. The beauty is very stimulating for the expansion of consciousness. However, there are layers upon layers upon layers of levels of the creativity stemming from Source Energy all the way down into the dense configuration that you now are part of. So yes, there is a huge creative flow and complexity to many levels and not just channels of communication, although that is a huge part of it. There are levels of refinement within various realms that operate simultaneously within the whole and that are responsible for the whole of Earth's energy as a Christed Planet.

Melainah: So, we have our awareness of the elementals, and then this year we made connection with those twelfth dimensional elemental kingdoms, beings like the White Fire Dragon, and Winged Ones. So that's a level of refinement that we were not aware of.

Metatron: Yes.

Melainah: So now with the Earth Goddesses--is that a direct interface from those twelfth dimensionals to them? Is there something in between that? That's where we're not quite sure how all these things...

Metatron: Well, there is some confusion here because the interface that was present in your 2016 conference was mainly the interface with the Sirian star gate, number one, and with the whales and the dolphins that carry that energetic imprint. They carry that very strongly. The whales and the dolphins hold that fifth dimensional template for the Earth. They can also emanate into the sixth and seventh dimensional template according to where they exist and what they are interfacing with. The White Fire Dragon and the Winged Ones are a new. You became consciously aware of them because of the energetic imprint that came from this 2017 conference. This was because the collective consciousness of the group opened the fifth and sixth dimensional time lock and provided an avenue for the expansion of the fifth and sixth

dimensional templates. And through that interface they assisted the consciousness of this group to enable them to retrieve and open that seventh dimensional time lock.

John: Quick question. I know the question- I can feel it- from the group is –they’ve made an obligation to take on this seventh dimensional template and they are going to work with it. Give me an example that I can give to them so they know when they’ve been successful. I know this is a silly example but say, all of a sudden, by May of next year they can levitate. But what would that something be...

Metatron: Something that you know is a very tangible, tangibly felt energetic within their bodies. Is that what you're asking for?

John: I'm saying... some of these questions were asked: what physically can they see that's changed in them so that they go, "Aha! I think I have at least a partial grip on this, because I can now..."

Metatron: Yes, well the main thing will be their stable state of consciousness where they will notice very directly that they do not react. They notice that they do not get into those the lower ranges of the emotions, but that they use their emotions very precisely and that they live in a state of joy 89% of the time. This is huge, because the emotions then, the fragmentation of the mental emotional body has begun to be eliminated and the result of that will be a clearer state of unity consciousness. It will be a tangible feeling in the body, their thoughts and in their emotions. This state of feeling it in the body will no longer be illusive but will be consistently present in the body 89-90% of the time. When they have a brief interlude of space where this unified expression of themselves is limited, they will immediately notice and bring themselves back to their center.

Metatron: When they leave the body, they will leave the body with that seventh dimensional state of consciousness, the completeness of it intact. So when they leave the body, if they choose a new incarnation they will come in with a (just like Yeshua, Mary Magdalene, Mary came in) with a very direct fifth dimensional body. They came in with a state of consciousness through the seventh dimension in that body. And many miracles were performed. Now these individuals will perform things that they can't believe that they can do.

John: OK that is a quick answer to my question.

Metatron: Yes, and some of them will tap into that tele-thought process, to the knowing that comes with it. It will go beyond light language. Not all of them, but some of them who are very proficient in the use of light language will begin to allow their languaging to drop away and the tele-thought communication to be very real and present. And they will trust that implicitly.

John: What bothers me is that if we were in need of a shift in mass consciousness, we're going to need a lot more people than we have now...and what you're saying is we're going to have

less. That's kind of depressing because we have to have—we can't just sit with two or three people.

Metatron: No, you cannot. However, these individuals will take that out and they will teach others and they will alter group consciousness, very dramatically. When Yeshua walked the Earth, wherever he was, something was changed. Not just the healing of bodies, but there was a shift in consciousness. He brought in a different level of consciousness and he helped individuals. One embodied master helped individuals see realms of the cosmos that they had no awareness and then they were able to absorb that at every level of their being and go out into the world. And those that were ready then impart that into their consciousness. So even though your numbers are small, the possibility of the expansion is immense. They will work with the elementals, with the Earth itself, the fabric of the Earth itself. They imprint the consciousness of all humanity, of any one that's embodied in a body on planet Earth at the same time at whatever level their capacity happens to be.

John: That sounds great, but look what happened to Yeshua and Mary Magdalene. They might have had- Mary and Joseph and couple of others that caught on

Metatron: They had many they just were not written about. Most of it was taught by vocal teachings and it was lost.

John: Ok, but say they had many, but look what happened.

Metatron: Yes:

John: Christianity happened- not what Mary Magdalene and Yeshua were sent here to do.

Metatron: Yes, you are accurate.

John: So that's depressing. That's why I was saying that I understand that we can influence other people, I try to do that daily but I don't know, I just feel like without a lot more numbers... I just don't know.

Metatron: There is a technology that is misunderstood that is in play in all of this. Part of it has to do with your time space continuum awareness and time sequences. So what you think is the span of say 2000 years, in the scheme of eternalness, it is a moment. So the seeds that were planted 2000 years ago and the number of beings that now exist on the planet are able to take those seeds and bring it to fruition. So it is magnified. We use a term "hundred-fold" but it's just so you have some sort of understanding.

So it's nothing for you to be concerned with. We understand the limitation of this time sequence that you happen to be in and your ability to comprehend the vastness of what is transpiring. Just because you perceive a year, a hundred years, a thousand years, does not mean that in the scheme of the vastness of reality of Source that that is just a momentary event.

So that 2000 years ago your perception of these seeds were planted and levels of consciousness were seated and a minute group of people absorbed it, used it. When they passed it on, it couldn't be held and why? Because of the templates that were in play and the denseness of the environment couldn't resonate it at a continual level and all of these time locks were still closed. So there was no way for the fluidity and the connection with the elementals to take place so that you, as that Christed master could reflect to the elementals who had totally forgotten what the plan was. And so they kept creating the denseness. They created minerals that were quite lovely but they didn't hold the frequency. That is yet to be discovered.

Do you realize that there is another aspect of the evolution of humans that is occurring despite the limitations of the third dimensional body? Even though you perceive that it is taking a long time to see the fruition of Yeshua's gifts of a seeding of a new consciousness, there are things occurring in the present time that are uplifting and instrumental in shifting the consciousness into a more evolved state. More individual's soul has taken a descent into the body. It is present to guide and direct you to create more consciously. More humans are paying attention and have a desire to make their life more harmonious. They are seeking a path that is not in chaos. This changes the environment and contributes to the energy of a Christ Consciousness. Humans are slowly coming into a resonance with their original state as a divine Christed Being.

It wasn't until these Luminaries that are now present within some of these inner earth communities could descend into the Earth. They are massive beings of light. They could not come into the earth at all previously. They hovered around it, above it in that vast ethers until 2012 of your time, when that Christed Matrix actually came on line and began to emanate a certain frequency. Then there was this descent where these Luminaries hovered deep within the earth around that matrix, because it was open and they could refresh themselves, so they did not lose any part of their consciousness. The 12th dimension was the lowest state in which they could compress their collective consciousness. They are such advanced beings beyond any dimensional concepts. There was no way in the time of Yeshua that these great beings were present and there was not much interface from the star beings other than certain light emanations that were periodically sent or implanted in some way.

John: I understand. You have answered my question. Another one because I'm a little confused. You looked at Melainah and me and said that we have this connection with the Luminaries but the other day, you said that we were Telosians, that we had a direct connection with them.

Metatron: Those are all iterations of that vastness of who you are.

John: So we can be at all those things.

Metatron: You could be in all those levels simultaneously.

John: Even though some of them are twelfth dimensional.

Metatron: Yes.

John: You answered my question. Thank you.

Melainah: So what I understood in what he said in that, John, was that Luminary connection is the beginning of recognizing our cosmic consciousness, if you will.

Metatron: Yes.

Melainah: That great lineage beyond. That's part of our origins. We are getting closer to finding out who our origins really are. So that's in that Luminary connection.

Metatron: And so you can understand why that in the beginning teachings, it is so important to learn about your bodily genetic lineage so that you could disengage from it. It had certain qualities that helped you to navigate in this embodiment, in this consciousness. But it does in no way define you. So it had to be disengaged from, and thanked for the gifts that it brought. The discrepancies that it brought had to be eliminated. You helped refine and clear a portions of the genetic line so that any other beings that use that embodiment or that iteration of themselves for a specific purpose did not have those fragments and anomalies to obstruct them. It will take a while for this to integrate, dear one. You have to accept that you have vast iterations in the monadic configuration of your soul star that holds a composite of certain iterations of you. These various parts of you assist you in understanding that you have many iterations of you at several different levels and several different dimensions. An iteration of you can exist in the Earth environment but also possibly on all these other star systems. You have iterations of you at that vaster level in many realms. And it's very hard to get the physical mind and the consciousness of the body to come to an understanding of this.

It has to be experienced. And that's what we are engaged in now. We are helping you to create that experience for yourself. Now that these templates have begun to come online, you were able to activate the axiatonal lines and direct them specifically in place. You have created spin points in specific star gates. The connection to the Andromeda galaxy that operates at 15th dimension becomes accessible. So you have a lot of support here which changes everything.

Melainah: One of the things you said was in this conference we interfaced with the great winged ones and the White Fire Dragon in a much more direct and personal way. And so, this particular interface this year created a major imprint.

Metatron: Yes.

Melainah: I mean like, when that White Fire Dragon came along so many people, including me...I wasn't aware of any connection to that community until the night before, until Saturday and it was WHAM, big and huge in multiple people in our group, all of a sudden, I mean that was just front and center for them in their awareness.

Metatron: Yes, and because of your ability to receive that presence in your body, then you generated that energy into the collective of the group and they all grabbed it immediately. They were open and receptive to it because of refined energies that were present, even though they don't fully understand the functioning yet of that fifth and sixth dimensional template, it opened them up to their vaster state of consciousness. And so there is a level of tele-thought communication even though you personally didn't understand it fully, you knew the immenseness of it. And so that was transmitted into the collective consciousness because the group was sequestered. The energies were not scattered. They were held and contained within the bubble that was created by them at the beginning of the conference.

Melainah: Love that bubble and all those great beings, yes. But just on a personal note, that was a huge surprise for me—to have that White Fire Dragon consciousness come in. It was the last thing I expected to happen. And now that it has. I am open to opening more of those channels for myself. Any suggestions how to do that without it being a trying situation?

Metatron: Well there is a refinement that has to take place. Now that you are so open and that you have many who are with you including Lillinoi, including the consciousness of the Great White Fire dragon and others. It will take some time, not in integration but in developing your own personal processing or utilization of that energy and the refinement of whatever process is comfortable for you. But the two main things here are the trust factor of yourself, do no harm to yourself in judgment. And to allow that presence in your field and feel it. Then when you feel ready accept it in, invite it in and allow it to use your body, whether it is spoken or written or known. By allowing the White Fire Dragon consciousness to come through your body and your body to be used as a vehicle for further implementation, further education, and further imprints. More information becomes available. Information that is needed in any given moment and it won't be given without preciseness. Sometimes it will be for you personally and there will be ways which you will use your mastery to see how it can be applied to the group energy. Sometimes it will be specifically for the dynamics of this beautiful collective. That has now become so coherent and we are so pleased.

Melainah: We are a beautiful thing to see.

Metatron: Yes, so this group can hold their attention point. They can hold the energy, that higher frequency. They are very capable beings.

John: There are a lot of those people who, like me, would like to stand up on a mountain top and shout out what we have been privy to find out to lots of other people, but it seems like the pressure to keep us out of that limelight is increasing. They just opened a new bible museum in Washington DC. And there will be hundreds, many people propagandized going through there. It really doesn't help our cause.

Metatron: It's not a cause. These are states of consciousness. And even though you talk about the critical mass where everybody will be swept along into those higher dimensional states of awareness, some of them are not capable yet. They will not be capable of that for a very long

time. They will come back time and time in other embodiments. But as faulty as some of that is, it's at a level that is productive for them to lead a life differently from the denseness, even though it is qualified through guilt and subservience, it does provide certain benefits and it's one of those things you could go to the mountaintop. You could go to that museum. And teach and try to help them understand what is written and the faulty perceptions that go along with that. There is a stream of truth through all of it, but it was written from a frame of reference of a lower consciousness.

John: In a lower male consciousness.

Metatron: Correct. There is an imbalance there.

John: So teaching a course there...

Metatron: It falls on deaf ears, not because they intend it to be, but they are not capable. They cannot reach the level of consciousness that is necessary. So therefore it engages fear and then immediately they go to the faultiness of the teaching. And begin to perceive it to be from the devil trying to tempt them. So it is not productive for them. It is not productive for you because of the frustration level. So you can only engage with those of like consciousness and then together you band together and you increase that for those that are capable. And even though it seems like minute little pockets of groups of consciousness; there are many throughout the Planet. What you have been able to do since 2012 is a massive imprint in the Earth itself.

There's a huge piece that you have begun to uncover. You have discovered that all of this has to come into the body and alter the body into the fifth dimensional vehicle. This group is capable of doing this at a very conscious level. When the fifth-dimension is stably functioning and the group is stably functioning in a fifth dimensional body which requires taking on the epikinetic body. That stable consciousness is imprinted into the elemental kingdom because the elementals, as we have spoken about earlier in this conversation, have forgotten what they're supposed to do. They have forgotten and they have to get that from humans. Humans are creators in form and so humans have to direct that energy from their body, from their Christ consciousness into the Elemental Kingdom. This provides the pathway of communication within the Earth through these various inner Earth communities into the Christed matrix. The presence of the Luminary communities is present in the Earth. They were not there before. There were many communities of Telosians, many Lemurian communities that were having trouble maintaining that seventh dimension. And all that's changed.

John: Just recently by the Luminaries?

Metatron: Yes, the Luminaries just were able to actually seat into the earth at this time starting in 2012. But it really didn't take on the level that is present now.

John: But that was because of bringing the Christed Matrix back.

Metatron: But understand, that Christ the matrix was back but it wasn't functioning coherently and at the level it needed to be. So each year this group and various other groups have worked with the Christed matrix to bring it on line.

John: Other Groups. How many are there?

Metatron: Many.

John: A hundred? Five?

Metatron: At the level that you are now working, there are less but there are various levels of communities that hold a very coherent consciousness that is elevated.

John: That's encouraging.

Metatron: There are several hundred communities around the world. Many indigenous communities still carry a level of refined consciousness, especially those that have been sequestered and have no written distortion. This knowledge was passed down through the spoken word by very elevated shamans who hold that knowing, that technology within their bodies.

John: So Native American...

Metatron: Not all Native Americans. It depends on the community. Even though these indigenous communities may appear to some individuals as being uncivilized. This is untrue. They live a very simplistic life and they hold to the tenants of their ancient knowledge. They hold the higher consciousness within them that cannot be communicated through a language. It is beyond that.

Melainah: With that interface this weekend, with those Luminaries and the Inner Earth community, it would seem to me now that this group has established that interface this weekend. Their presence will create a more stable consciousness within the more surface communities that were affected by what humans were creating.

Metatron: Yes, and the interface that you created with the Star gates, because many of these Luminaries use those star gates, are dependent on those star gates. And one of the star gates that you have not been able to connect to and will at some future date, is the Orion system, because that is a massive angelic gateway of a very refined state of consciousness. It is very misunderstood, very misperceived.

John: Will we be able to use what we already have to get to them?

Metatron: Correct. Those connections will be made at the proper time.

Melainah: There's another thing we discussed this morning in regards to the elementals is bringing in that Fifth Element of Love. That has to come through our body and it also occurred to us that music comes through the grid that we are building.

Metatron: Correct

Melainah: So that consciousness then is planted into this grid system of Earth.

Metatron: The Element of Love is a much different element than the elemental communities. It is a fifth element of creation. Such as fire, water, air and but within those iterations, there are levels of refinement that bring with it a different state of consciousness, provide the access to the creativity within the more refined states of consciousness. So thus you have these various interfaces with the Earth goddesses. You have the interface with Pele, the fire element, which is the interface when this denseness occurred on Earth and the elements forgot their purpose. They were cut off from the Archangel communities that were sent to help them reconstruct the physicality and they couldn't communicate at that level, so this interface community was able to come into existence to be that interface connection between the Archangelic Realm and beyond.

John: to reconnect.

Metatron: To reconnect them and also provide a connection with humans. This connection was severed when Earth fell to 3rd dimension. When a segment of humans was able to connect with the Lords of Light this was a huge step for humanity because the Lords of Light hold that the energetic piece in a different configuration than you are aware of. We're not going to go into that right now.

We are just talking about these interfaces. Just like you had to have that interface of these three star gates in order to have a better connection with the Andromeda. So it's the same process that it's occurring with the elements. You as humans project the Christed image into the elements to help them remember and then these interface goddesses interface with the Angelic Realms as well as Lords of Light, the Elohim. We have Tara the Earth goddess. We have Pele, the goddess of fire. We have Lillinoi who is a very refined, massive part of the air, the ether. It's a step above the air element. Into the ethers and then you have this beautiful White Fire Dragon. You have the whales of the oceans. They are that interface.

Melainah: There is a lot going on.

Metatron: There is a lot going on and none of this was in place in the time of Yeshua. Can you imagine the difficulty that they had to overcome to maintain that state of consciousness that they maintained?

John: That's why they were around for such a short period of time.

Met: They couldn't stay any longer without being contaminated. So, those seeds got planted. And in the very blink of an eye, here we are.

John: That was so important. So why can't that story be released to the general public now?

Metatron: This new generation coming in is more conscious. The old ones begin to die off and are replaced by a new human expression that is more conscious. They could not come in at that state of consciousness if this group and many others had not prepared the way. Understand I know that you are really concerned about that museum.

John: Oh no I'm just saying that it's another nail in blocking a fifth dimensional consciousness.

Metatron: The old level of consciousness has need of that. Secondly, consider what age, what generation will visit the museum on a consistent basis? They will soon be leaving. These new children come in at a fifth dimensional state of consciousness don't buy into the denser iterations. Why do you think they're having so much trouble filling churches? And what age group is filling those pews?

John: Well, the problem is the younger people, because they see a lot of these things, and they can see through them, are turning into and making themselves atheists...and that's going to be another problem!

Metatron: Well they will rid themselves of this belief very quickly. You came here for a specific seeding. That the iteration of all of you came here for a specific seeding of energies and opening of gateways and opening in the elements. And opening in the inner earth and opening in the star systems. This was your purpose and there's where your focus is, regardless of what's going on outside world.

So perhaps two things are necessary at this time, so that we can do this in progressions. We wish to have a discussion tomorrow about those seven light templates and the DNA.

Let us meet one more time. Before your physical disengagement. The three of you resonate when you are together. You bring forth so much imprinted knowledge just between the engagement of you and placement of your consciousness at that physical level. So before that is disengaged, if we could meet one more time.

Now, all that we have discussed here, please consider having a post conference call and dispersing this information.

Blessings,
Lord Metatron
