

Good Evening, Beloveds, it is I, Lord Metatron.

I would like to address what has been transpiring in the last several months of your time. A massive transition is taking place within this Collective group. Since January of 2017, you have been receiving substantial energetic Light Templates to stimulate your consciousness and to evolve it into a more multidimensional expression.

This has made a great impact on your physical body. And sometimes, this human body of yours struggles to accommodate such refined energies. It struggles to process the complexity of thought that you, each of you, are thinking, as well as the process, the concepts that the Triad, the Lords of Light, have been transmitting to you on a regular basis. This is all designed to elevate you to your original state of Being, in a body.

Now, understand that you came into this embodiment with a lot of restrictions because of its 3rd dimensional nature. But you have altered that substantially. And now, that 8th chakra resides within the body, that Higher Mind, that Universal Mind, resides in your Sacred Heart Consciousness. Your OverSoul is present and operating very proficiently at this time. So, a lot has transpired in just.....

The Conference was no exception. The energies were massive. And you, Beloveds, co-created these energetics with us. It was not a one-way creation. It was a Collective creation that occurred in that Gathering.

So, as the last months of your time has transpired, and you began to use some of these energetics, you began to realize that you need some quiet time, a little down time. The body is struggling to accommodate these massive energies that you are creating. So, this time is not only desired, but we are telling you, now, it is required. The body has reached a saturation point and what we are going to create this evening are clear energetic expressions that will also contribute to changes in the consciousness and changes in the physical body.

So, after this Gathering, it is very necessary for you to take some quiet, individual, private time, for yourself. The time is now to realize who you are at that Masterful level and get in touch with the Imprints that we discussed in our last session: that you came to this embodiment with certain Master Imprints that are now being activated in the Presence of the great waves of Light that you have been receiving. So, this quiet time will help you bring more into a fuller conscious state.

The individual Imprints that you carry – you will not remember all of them. But you will begin to become aware of some of them. It's time to play with the Light Templates and how they relate to you personally. This is so important, because we have been so focused on the Collective Consciousness of humanity and the Earth that it's now time to focus on you, personally.

[6:05] Begin to look at the effects that you have created on your DNA structure. In the last session, we reminded you of those Packets of Light that were placed in the DNA structure, especially in those first three strands of DNA. And so, a transcription was provided to each and every one of you, so that you might remember that you have those Packets. And they are not fully activated yet.

They also relate to your 14-chakra system. And they, as well as when you placed them uniquely, according to you personally, within your DNA structure, you also placed them in certain chakras to amplify the chakra system and bring it more into a fluid functioning.

So, this is one of the reasons why we are stressing to take this next month of your time for you personally – to nurture yourself, to reawaken those memory codes of yourself, to begin to observe the changes that might be occurring in those first three strands of DNA, the changes that are taking place in your chakra system, in your ability to hold the very coherent, stable expression of you, personally, as that Christed Being.

Quiet brings balance. It takes you out of that push-push-push and that constant searching. Rest in what you know.....

This is a time of reflection and how you can begin to create differently or more precisely.

In the next few weeks, be in a receptive mode. Be open and receptive to the energetics that are infusing the Earth. Open your 14-chakra system. Use the energies that you are receiving to create higher frequency and vibrations within your body and within your chakra system. Do this gently, especially in the body. Do it to help you create the receptivity of the body into these higher frequencies with Ease and less trauma to the body. Spin all of the 4 Triads. Create a massive spiral of Light energy, with the intention to receive the Light that is emanating from these vast regions of the Cosmos. See the massive opening in your Crown. This is needed to receive the Light Templates on a regular basis.

Take a deep breath, here..... and notice that that Crown, that elegant Crown, is very expansive. It is open wide..... ready to receive..... It's important for you daily to visit your chakra system, to spin the Triads, but most importantly, to open, just by your intention, open yourself to receive all of the Light that is now available to you.

This is a very auspicious Gathering that we have come together this evening to celebrate. It is the Lion's Gate. And I will be talking to you a little more about that in a few minutes. But right now, I'd like to invite you to a group discussion. And talk about what has been occurring since the Conference, what you've noticed, what you've experienced, how you have been able to connect with these Inner Earth communities or to some of the Star Beings in the Star Gates that were opened. Voice your questions and invite others to comment. So let's now begin this conversation.
