

**John:** Now let's have a short review of Metatron's Message from our last session. In our last session, Metatron discussed the two 5<sup>th</sup> Dimensional Color Codes of Magenta and Olive-Green.

As you will remember in our June Conference, that 7<sup>th</sup> Dimensional Light Template was Magenta, within a Diamond shape and surrounded by Archangels. A Color Code of Magenta was covered some years back in some of our teachings, but it was at a very basic level. What makes this different now is in the way in which this Color Code acts and performs in the physical realm.

On the color spectrum there are seven colors in the rainbow that most of you are familiar with. The Magenta Color is the eighth color and brings the linear rainbow expression into a circular expression, because it is 5<sup>th</sup> Dimensional.

The Magenta Color Code operates in a creative flux and flow to enhance creation. In its circularity, it brings the body into Unity in a 5<sup>th</sup> Dimensional state. The Magenta Code flows through your entire cellular system as well as your energetic system. It's a very powerful code.

Full use of it is not given until your consciousness can receive it – in full. It was talked about previously, but it did not then enter into the body in a significant way to make the alterations in the body's consciousness as well as your consciousness. So, it has great value at this particular time in your evolution. It brings the body, the Mind, and the Spirit together in one unified expression of a 5<sup>th</sup> Dimensional level, in a circular and concise way. There is no beginning and no end, as it's implemented into the physicality of who you are.

The Magenta Color Code is in your Soul Star as well as your Sacred Heart. So the Consciousness is being enhanced by the Presence of this Color Code. The Magenta Code affects the spiritual body, because it enables you to have the closest connection to the Godhead that is possible at any given moment.

When you bring quality and care to the little things in your life, you open the door to a more complete Undifferentiated Source Energy. This helps you to manifest the most precise and ideal representative of Source Energy.

The Magenta Coding affects the coherence of the mental-emotional body, because it has both electrical as well as magnetic properties. This Coding also has an autonomic capability to engage other healing Codes, especially when you consciously use the mental-emotional body to do this.

So, for instance, when there are fractures, you may be operating in the lower frequency ranges of an emotion. You notice that immediately. And, because of this massive Magenta Coding, it will automatically draw in that Blue Color Code that lifts that emotion up to a higher, more refined resonance.

This vast Magenta Coding mechanism enables you to cultivate a sovereignty in your physical body as well as in the Unified Field of Energetics that surrounds your body. This Coding contains precise imprints from all of the 6<sup>th</sup> and 7<sup>th</sup> Dimensional Light Templates as they are retrieved from the various Time Locks. When your consciousness evolves and your body transforms, this Coding is used multidimensionally.

**There is another complementary Color Code to the Magenta and it is the Olive-Green Color Code.**

It too, carries both electrical as well as magnetic energetics in the chakra system, where the Solar Plexus and the Heart chakra meet. It is at the point between the ascending and descending energies within the chakra system. Of course, the first four chakras are ascending and the upper chakras are descending in their influence within the body's chakra system.

The Olive-Green Color Coding is a vital Color bridge between the physical and the nonphysical. There is another bridge, if you remember, that we talked about: the bridge of the Sapphire Blue Star Tetrahedron as a bridge between the first seven chakras and the upper seven chakras. Well, this Olive-Green Color Code combines Love and Power, and it is a bridge between the physical and the nonphysical. It's made up of the Yellow and the Green Color Codes. These Color Codes reflect Power in the 3<sup>rd</sup> chakra and Love in the 4<sup>th</sup> chakra.

This Color Code facilitates a re-awakening of Self as a creator Being having sovereignty in the human body. The Olive-Green Color Code facilitates a more coherent mental-emotional body by clearing away any polar opposites that are not in alignment with the paradigm of Love and Unity.

This makes way for a fuller expression of the Magenta Color Code and the implementation of the 6<sup>th</sup> and 7<sup>th</sup> Dimensional Light Templates that you retrieved from the Time Locks. It symbolizes hope and rebirth through Love and Power of the Divine Feminine as it merges with the Divine Masculine. An important point here – it's not about the gender of the body: it's about the expression of the Divine Feminine and the expression of the Divine Masculine as they are merged in the creative process.

The main purpose of the Olive-Green Color Code is to continually make you aware of any polar opposites that might affect your ability to function in full Christ Consciousness. This Color Coding helps you to maintain a coherent energetic state in your mental-emotional body.

So, it's soooooo important that you use it to help you take note of any polarity that might surface or any judgments of yourself that might surface, when you notice that the polarity has surfaced....

It will help you change that polarity into a more coherent expression in your mental-emotional body, through the Presence of Love and that Green Color Code and the Power of your Will as it's merged with the Divine Will. It's continually redefined in the 4<sup>th</sup> Chakra as your consciousness develops. Your 3<sup>rd</sup> chakra is continually enhanced by the clarity of thought, because it has been merged with the Will of Source Energy. There is a continual Power that is maintained in your 3<sup>rd</sup> chakra and also in your newly activated Solar Center.

Your clear awareness is enhanced and helps you tremendously through this Olive-Green Color Code as well as the Magenta Color Code. Both of these Codes develop an automatic function the more that you use them to transmute polarities within your mental and emotional body.

**When you use the new Grounding Process often, this alone will engage all the aspects of the Magenta and the Olive-Green Codes.** When this happens, you will be able to integrate the new 6<sup>th</sup> and 7<sup>th</sup> Dimensional Light Templates more easily. These vast Light Templates and Color Codes cannot exist in the Presence of any polar opposites. It is up to you to pay attention and make the changes necessary as a human creator.
