

So, if you will take a deep breath,
center yourself in the consciousness of your Sacred Heart.....

And notice the Presence of the Divine Mind, Universal Mind.

Notice the Presence of your OverSoul.....

Notice the Wisdom and the Knowledge that is within those parts of you,
within that consciousness of your Sacred Heart.....

So, now, direct your attention into your 3rd chakra, that individual power center,
that had been – notice past tense here –
had been orchestrated and dominated by the fallen ego, to help you survive,
but unfortunately, at the expense of instilling fear within your consciousness.

As you have risen into a state of consciousness, of 5th Dimension,
also notice NOW the Presence of that personal will and power
and how it is used not to dominate but to direct your creations
through your mental-emotional body.

The power of the emotions puts the movement into the creation.....

So, as that 3rd chakra is now operating in more coherency,
notice how it's spinning and spinning... in that coherency...
and the brilliant Yellow that reflects Christ Consciousness
that is derived from that state of awareness of Universal Mind
as it relates to your physicality, the Wisdom of that Mind.....

Now bring that 5th Dimensional Will, personal Will and Power, into the 4th chakra
and merge it with the Undifferentiated Love that is present there.....
so the Will is continually influenced by the Element of Love
and it empowers it even more so.....

Now move into the 5th chakra, the Throat chakra
and merge it with the Divine Will of Source –
pure Christ Consciousness, pure Christ Creativeness.....

Notice your ability in this merging state, in this merged state,
how you are able to see the overview in many relationships and many interactions.

And you are able to see the Truth of what is exhibited in your life experience
from the perspective of the Divine Christed Consciousness of Source
that only Wills that you have that consciousness for your very own
as you experience your individual Divineness on Planet Earth
as you create with Power and Strength, tenacity and precision
and the Truth is always fully available to you through that merged state
of the 4th and the 5th, the 3rd, the 4th, and the 5th chakras.....

[6:30]

Sit in this state of consciousness and receive the energetics of the chakra system:

Through the 1st Triad... that is based in Love...

Through the 2nd Triad... that is a creative Force...

with the ability to use the Undifferentiated Light streaming from that 11th chakra.....

And the 3rd Triad, where the Crown remains open and receptive

but yet transmits the purity of Christ Consciousness.....

where your 3rd Eye and the Pineal and the Medulla Center

are connected and part of that 3rd Triad as well as the 2nd and the 1st –

ALL contributing to the coherency of your energetic system.....

And that 4th Triad,

which helps you create a different electro-magnetic field of your physicality.

This also affects your mental-emotional body.

But, most importantly, it affects the neurology:

the ability to process and understand the complexities of Christ Consciousness,

the ability to co-create with Source in precision.....

And most importantly, as we close,

See your beautiful Image of the Divine

and the Light that is so brilliantly visible within your energetic system:

the Beauty of YOU.

Never forget to notice the Beauty of YOU as that Divine Image.....

Blessings, Dear Ones, Blessings!
