

SEATING OF THE DIVINE

LEVEL ONE- SESSION FIVE

Good evening! We are very happy to be with you live this evening, because we have a lot of information to share. The next few sessions will focus on expanding your Merkaba field. These sessions will be under the direction of a collective consciousness that will express itself through a tetrahedron emanation from the Realm of Source. This is important for you to recognize so that you get the full impact of the energetics that are being transmitted through these great beings of light. The tetrahedron is composed of Michael, Metatron, Melchizedek, and Uriel.

Michael is an Archangel as well as a Lord of Light. He oversees all of the undifferentiated light emanations that come from the Source of your being in its perfection.

Metatron is also an archangel as well as a Lord of Light who oversees the ascension process of all of the fallen realms that have form. The power that emanates from this great being is extensive.

Melchizedek is a Lord of Light that is in charge of all light emanations at a physical level that raise humanity into its more refined state.

Uriel is also an Archangel. His influence is that of pure light. This undifferentiated light pushes you into your interior so that you can discover your full expression as a Divine Image of Source at your vaster level. Some of you know of this particular emanation from prior teachings. We were asked to remind you of this so that you can pay attention to the energetics that will influence you in the coming teachings that are under their guidance.

Tonight's session will start with a centering meditation led by Archangel Gabriel. Next we will have a group discussion about how you used and experienced the last four sessions and then a brief review. This will be followed by a channeling. If you have any questions, please hold them for the Q & A period after the channeling. Once the Q & A is completed there will be a special energetic meditation by this collective and then our session will be concluded.

Now, let us call forth Archangel Gabriel to guide us in a centering meditation and prepare us for what is to come.

Thank you Gabriel.

Now, let's have a discussion!

If you would like to make a comment, press star 6 on your phone and then the number one. This will put you in the queue and you will be called upon in the order that you call.

After discussion

Now, for short review:

In our first sessions, we learned how to create a crucible of love in our number one center, the Sacred Heart and combine that with the second center which is the pineal. In this center, we can pull in the Undifferentiated Light of Source. We next learned about the Luminous White Star Tetrahedron which is perfectly balanced with the feminine and masculine of the Divine and that is also placed within the Sacred Heart. All this together forms the crucible of love which is the foundation of our transformation.

During the next two sessions we discussed the importance of the Sapphire Blue Star Tetrahedron. It is much more than the bridge that assists in joining together the 14 chakra system so it functions in unity, but it opens up the opportunity to begin to activate a 21 chakra system. Our last session concentrated on the merging of the 1st, 2nd, and 3rd triads to form a triadic configuration, that works together.

With the addition of the third triad, you have opened up your entire system to the cosmos which is unlimited.

In tonight's session, we will teach and expand concepts about the Merkabah field. Once you have activated this field, it is always active and spinning whether you pay attention to it or not .

What alters it is your inability to keep those rotations at 100% the speed of light. You influence the vibratory rate of the Merkaba field whether you are conscious of it or not.

The things that cause a drop in the rotations are your separated thoughts and emotions and your inability to maintain a balanced masculine and feminine state because of the wounding that has occurred in these two parts of you. This is why the last two sessions were designed to refresh your memory of some tools that are important to use, so that you can maintain the 100% speed of light rotation. Each time that you fall into any type of separation consciousness through the use of your thoughts and emotions, or you cannot maintain that feminine/masculine balance, you create a wobble in this field. The vibrations then fall in some part of the Merkaba field, and it becomes unbalanced.

This is why the last two sessions were designed to refresh your memory of some tools that are important to use, so that you can maintain the 100% speed of light rotation.

As our guides are speaking to us this evening, they have asked that you listen to the concepts that they will present, but most importantly, pay attention to the energetics that are being created. Pay attention to how you are feeling, how your consciousness is expanding, and what is happening in your unified field.

Next we will welcome the collective consciousness of Lord Michael, Lord Metatron, Lord Melchizedek, and Archangel Uriel

Then, they will hold a Q &A session. Please make your questions about the subject matter that was covered this evening and not about personal issues. When you have a question, remember to push the star 6 and then #1 on your telephone to be put into the que.

Lastly, they will conduct an energetic guided meditation.

After this meditation, our session will be concluded.

PS: Please take note, that we plan on being with you all, live again on May 16th, so we can complete the full activation of your Merkaba Field.

Now, please take a deep breath and let's assist Joan in bringing forth the collective consciousness.
