

Greetings, beloveds. It is I, Jeshua. I have come to talk with you this evening about the sixth dimensional template that was retrieved from a time lock that has existed for eons of time. You are aware and have been told, that the sixth dimensional template is a transitory template that allows you to access seventh dimensional information and energetics, compress them, and make them applicable in your fifth dimensional life experience. And this is so. But there is a more to the functioning of that sixth dimensional template.

First of all, you know that it has a compression factor. When you take a more refined frequency of light and you are wishing to apply it in a denser situation, you have to compress it to make it compatible with the frequency range that you wish to apply it in. And you have great experience with this, using the 4th, 5th, 6th Ray of Creation and also using the second triad. So it is nothing new for you to compress light. You know about that. You have done it on many, many occasions. And you are becoming very proficient at it.

The sixth dimension also has an energetic that helps you to direct this compressed state of light very proficiently. So that it is built into that template that was retrieved, the compression aspect of it and the direction of that compressed light to be applied in the fifth dimension.

Now there is another aspect of that this that I wish to tell you about this evening. That is this magnetic piece. Many of you know that there was another time lock opened in this Crystal Conference that allowed the beginning access to Source magnetics, which will be completely put in place now through this wonderful collective consciousness of Kryon, the magnetic Masters. This magnetic piece is a very important piece in the evolution into this multi-dimensional state of consciousness and the multi-dimensional functioning of your body because it is the magnetics of Source.

You have known for some time that Earth's magnetic field has been altering. The magnetic field of the body has been altered, as has the electrical component of the body, because your thoughts are constantly being refined and altered. So the electro-magnetic field has been altered substantially in the last several years of your time. This magnetic piece is a very, very important piece, because it enables you to start using the magnetics more efficiently of that 10th ray of Creation, that we have touched on some time back in your teaching.

This magnetic piece has a flow to it. There is a flux line attached to it that enables you to attract like to like. So you attract light to the light that you hold. And it is enhanced and magnified in the presence of these magnetics.

In addition to bringing a more functionality to that 10th ray of Creation, it also provides another function. It is this stability piece that we've been talking to you about and how important to stabilize the fifth dimension. That does not mean dear ones, that it is rigid as is the third dimension, but that there is a fluidity to it. There has to be fluidity within that stability built in for it to function properly, so that you have unlimited potential to create effectively and precisely.

So you can see that the function of this sixth dimensional template that you now have access to, is equally as important as the fifth or the seventh. It's not just a pass through dimension. It has very real energetics embedded in it. So as you create the stability of your life experience in the fifth dimension, in your body, in your consciousness, you must apply it in that stability, the sixth dimensional templates that you now have and are in possession of.

When I walked your Earth, your beautiful, beautiful Earth, as Jeshua, I came into that embodiment in a fifth dimensional body. And so it was very important that I had access to this sixth and seventh dimensions, and those frequency ranges, those light templates, and ways in which I could apply these frequencies and these templates within my fifth dimensional body.

And it took me quite some time to get that fully seated within my body. I could not come into a full teaching venue until that happened within my body and where I could make it usable and applicable in my walking around state, regardless of the throngs of people that were around me daily, and that had variances in their energetic fields, so that I could maintain that 100% Light. It took awhile and many initiations within my community.

So too beloveds, you are in a community, a collective consciousness, that helps you refine and integrate these fifth, sixth, seventh dimensional templates, and make them very usable in your day to day life. So it's important that you be patient with yourself, and you allow this progression to occur.

You are under the guidance of Source, of all of the realms of Creation. You cannot fail. You cannot do it wrong. We are here to guide you, and to love you into that space so that when you create, you create from the foundations of that fifth, sixth, seventh dimensional template, which are Unity consciousness, and using the element of Love. Everything that you create comes from that base.

So now you can create from the seventh dimension, the sixth dimension and apply it in the fifth dimension, in a very stable yet fluid state.

I would like you to let me guide you through a process, so that you become familiar with this sixth dimensional template. Allow me review before we begin.

The sixth dimensional template is a format by which you compress refined energetic templates to make them usable and applicable in fifth dimension. It creates a fluidity within the stability of fifth dimension.

It brings forth an influx of magnetics of Source energy.

And allows you to begin using the 10th ray of Creation more proficiently.

Attracting light to you, attracting Source energy to you consistently and completely, so that you function within your Merkaba field and can more consistently hold that 100% Light regardless of the situation.

Let us begin this process.

Take a deep breath.

Become centered in your heart, your Sacred Heart.

Call forth that consciousness of the Sacred Heart.

Notice how your Merkaba field is spinning at that 100 percentile rate.

The balance in your personal field between your Masculine and your Feminine attributes, operating coherently.

That luminous White tetrahedron spinning and functioning coherently.

And that beautiful deep, deep Purple Source energy, spinning also within that field, all operating in the Unified expression of pure 100% Light.

Now, as you sit in that fifth dimensional template, notice how firm the foundation of that template is based in Unity and the element of Love. You have created it well, and it is a very stable foundation.

Now, I ask you to come with me and access that seventh dimensional template that is very refined. And it has multiple expressions. But we are only concerned with the light frequency at this time, the very refined light frequency of pure love, Undifferentiated Love and Undifferentiated Light energy. This is Source energy.

Now let us bring that into the sixth dimensional template. We will compress it and with our intention of using the Undifferentiated Light and Love, and make it usable in that compression. Differentiate it, so it is applied in the fifth dimensional everyday state.

Notice how it is compressed, and it begins to take on a certain level of form. It has a magnetic field. But it is a very pure magnetic field, because it is consistently drawing in the Light of Source. It is completely accessing Source energy. The magnetics of Source energy draws in light, because you are light. So in that sixth dimensional template, you have fluidity. You have the magnetics of Source and you have the compression of pure light into a differentiated state of form that can be applied in the fifth dimension.

So apply that light now into fifth dimension. As you apply it, notice how that stable foundation is still there. But there is a fluid movement that is also present, that allows unlimited potential for creation in the world of form within that fifth dimensional template, within that fifth dimensional time sequence of present time. There is no linear time present. You have entered a different time sequence and will continue to function in that time sequence.

Now, with this compressed differentiated light template and the magnetics in hand, and the fluidity of unlimited potential, you can use the 4th, 5th and 6th ray to create with precision, with a specific intention, and paying attention.

You have variations in the way in which this template of sixth dimension is applied, according to your intention. But because we have added the dimensional frequencies of sixth dimension, you have much more power at your command, than you did if you were just using the compressed light of the sixth dimension.

You have the magnetics of Source. You have unlimited fluidity of and you have the potential to create as Source, in the presence of those magnetics. Experiment Creators! Experiment with the many ways that you can create with that 4th, 5th, and 6th ray and alter your reality.

In the presence of this magnificent Light, you are capable of being gentle with yourself as you learn and you experiment. You are in the presence of great Love. And in that presence, it will help you use the more refined levels of your emotions, and be directed under the guidance of your Christed Oversoul. You cannot fail. This is not an experiment. It is a Reality that you have entered. And it will alter you significantly.

Surrender into the influence of Source energy. This is the environment that you will cultivate for yourself. I thank you for joining with us in this beautiful Collective consciousness. Blessings beloveds. Blessings.
