

## Ascended Master Kuthumi's Message L1S1 01-17-17

Greetings, dear friends. It is I, Kuthumi.

I am honored to be presenting to you this evening. I am delighted to be part of your collective group. This is a very important foundational session. Everything is built on your recognition of yourself as that divine image so that you never ever waver from that consciousness and that you always, always operate from your Sacred Heart and that you use your transformational crucible often.

This evening I would like to talk to you about a specific geometry - a star tetrahedron. Not just any star tetrahedron - it is a luminous white star tetrahedron. It has all color codes, all sound, all expressions of light. It is perfectly balanced with the masculine and feminine of the divine and it too becomes part of your Sacred Heart. This energetic vehicle is much more than an energetic vehicle. It has physical attributes to it. It is through sacred geometry that energies are brought into manifestation into the physical realm.

It is a little different than the crucible that you have just created. That crucible also sits within your Sacred Heart and this beautiful star tetrahedron encompasses that whole energetic center of you. This tetrahedron moves. It spins and as it spins, it generates more energy, more light, beautiful luminous white energy of Source Energy, unified Source energy that can be brought into your life experience very directly. So let us engage it now together.

So take a deep breath and this time I asked you to draw your attention to the 11th Chakra. At this point in time you have a 14-Chakra system and I ask you to draw your attention to the 11th Chakra. The 11th Chakra holds the pure undifferentiated light of Source. It has always been there from the very moment that you took a breath in your physical body. Early on, many of you were not aware that you had access to that light energy. Now when we say undifferentiated, we mean that it has no limit. It has no differential. It is when you bring it in to your pineal and then into your sacred crucible that applications are made within your energetic system and within your physical expression which you manifest into your life experience. So this undifferentiated light it's a vast potent, potent light energy of Source.

So take a deep breath. Connect with that undifferentiated light and begin to create a most beautiful vehicle for your physical expression in the geometry of

a star tetrahedron. It is a luminous, luminous white. Begin to spin it and spin it and spin it.

The frequencies of light create a spin that is very dynamic. And it begins to radiate undifferentiated light. It's within that radiation that the whole complexity of that luminous white star tetrahedron is filled with the undifferentiated light of Source. See it spin. Notice how it begins to glow and radiate. It is so luminous that is beyond your description like nothing you've ever seen with your physical eyes is so brilliant white and luminous now with your intention to draw this white star tetrahedron into your Sacred Heart and this white star tetrahedron encompasses the entire space of your Sacred Heart including your crucible of transformation. It brings such vast Source energy with it that that infusion of light begins to radiate within the Sacred Heart within the crucible at a very, very refined level.

The radiation of that light is like nothing you've ever experienced as potent as it is, it's calming and harmonious and your body begins to resonate with the energies that are emanating from that star tetrahedron. It is designed to begin to alter the vibration of your physical body.

Sit within this luminous white star tetrahedron recognizing the vastness of the light energy of Source that is available to you and that is present at this very moment within your Sacred Heart. Completely balanced draws balance within you, your feminine and masculine attributes raising them into a more divine expression regardless of your body type. This is your energetic expression - a balanced divine masculine divine feminine This is also held within this luminous white star tetrahedron so that your body begins to associate itself not with its gender, which is designed to keep separation in place. But this energy is designed to bring unity into your body, into your consciousness so that you operate and use your divine qualities, your divine feminine and your divine masculine qualities.
