

Seating the Divine Image Session 10 Summary

WHAT WE'VE BEEN DOING and WHERE WE'RE GOING:

In the August class, reviewed and practiced using the 4th, 5th, and 6th Rays of Creation as part of our creation process, and we used triangles for our creations & to remove anomalies.

To the process we had done before in Mastering Alchemy, we have now added the 7th dimensional creation template which involves bringing in the Love and Unity from the White Star Tetrahedron, the 7th dimensional Template of Light which we compressed in the 6th dimension, and the Magnetics of Source from the 7th dimension, also compressed in the 6th dimension the Color Codes

Now we are adding in higher level components:

1. We are beginning the process of expanding our knowledge of and ability to work with the 8th, 9th, and 10th Rays of Creation, and we'll utilize the 6th and 7th dimensions.

To use the 8th, 9th, and 10th Rays of Creation, we must be proficient in the use of the 4th, 5th, and 6th Rays of Creation, the 7th dimensional Light and Magnetics, Love & Unity

We must be consciously present in the 5th and 6th dimensions

We must be fully present in the 5th dimension, which means

in the present moment

with an open Heart

engaged in the Sacred Heart Consciousness through the White Star Tetrahedron capable of accessing the Void – the creative Source energy

2. We will focus on and create a personal environment based on the Star Tetrahedrons and the Cube, which will allow us to utilize more complex and higher level thought.

You have been in the process of merging your mind, the Mind of your Soul, and the Mind of your Spirit with the Mind of Source. This level of complexity of thought requires the more complex energetic environment brought to you through the interface of the Cube and the interface of the Star Tetrahedron, which allows you to navigate from that 7th dimensional Light Template. This will allow us to create from that level for our 5th dimensional life on Earth and will create an environment for the body to begin to hold those vast frequencies of Light.

3. We will fill this personal environment of Star Tetrahedron and Cube with the 7th dimensional Template of Light,

the Source Magnetics,

the Love and Unity of the White Star Tetrahedron,

the Color Codes, and

the Ze'On Particles created in our activated Arc of the Covenant.

Seating the Divine Image Session 10 Summary

When we meet again in a physical gathering, we will retrieve and unlock more timelocks that will continue to escalate our consciousness.

THE THREE PLUS STAR TETRAHEDRONS all are the same size and spin in the same vertical axis around you, emanating the Light that you are and your unified state with Source. Remember that the 8 points of a Star Tetrahedron also defines the 8 points of a Cube.

a. Your personal Star Tetrahedron: Notice how unified it is and how unified you are physically, mentally emotionally, and spiritually in the Presence of the Light of this Star Tetrahedron.

b. The luminous White Star Tetrahedron

The vast consciousness held within your Sacred Heart

The Element of Love is present, activated, and usable in your creations

Unification of your Soul, Spirit, and Source

Love has removed all doubt

You are aware of Love of others AND love of self

You are happy, in bliss, in ecstasy

Your emotions are in a more refined state

Thoughts are unified with the Mind of Source

You as a beautiful individual emanation of Light – the Divine Image that you are

c. The deep, deep Purple Star Tetrahedron of Source Energy

Source energy that you have access to at all times

You know you are not and never have been separate from the Source of your Being

You have full access to the Void, that fertile ground of unlimited knowledge & creation, just by directing your attention to this beautiful Star Tetrahedron

It emanates an immense, brilliant Light

It is conducive to complete unification of your entire Being

d. There is also a Gold Star Tetrahedron within the Cube

which holds the Christ Consciousness, the Christed Matrix

+ We have been told that we will be able to utilize in a while, in the Presence of the Magenta Color Coding, a double Merkaba field composed of six Star Tetrahedrons.

Seating the Divine Image Session 10 Summary

THE CUBE is composed of

Star Tetrahedrons

vast Sound frequencies and vibrations

Undifferentiated Light and Love

Color

Light

the Magnetism

The Element of Love is prime & necessary in this Cube and Star Tetrahedron environment

THE RAYS all contain Undifferentiated Light and Love, which is the foundation of creation

7. 7th Ray of Creation is a channel to return to Source energy when the body is dropped.

It was created for great Avatars and Teachers coming to the Earth plane to help

We and They both must use the 8th Ray to clear all anomalies before using the 7th Ray

Five years ago, we did not have a level of consciousness where we could access this Ray

Now, we have a level of consciousness that allows us to access the 7th Ray of Creation

to return to Source energy when we are ready to drop the physical body!

And this process is assisted by the Presence of the Magenta Color Coding

8. 8th Ray of Creation is a vast creative and clearing Ray

Contains Sound, Color, and light in multiple frequencies

A library of Light frequencies that can be applied in form

and can be drawn from many dimensions

We will return to this vast Ray time and time again to learn how to work with it

This month we add many components to the 8th Ray creative function.

Next month we focus on the 9th Ray and add in Sound.

9. 9th Ray of Creation is mainly Sound vibrations and frequencies utilized in every creation

whether audible to the human ear or not

It also contains Color vibrations

When we use these Sound vibrations, we magnetize Source energy to us

10. 10th Ray of Creation contains the magnetism of Source

It also contains Sound, light, Color, and Geometries

It encompasses all the undifferentiated creative energies of Source

It is based in pure Source energy

Its contents are made usable through the Magnetic Field it holds.

Seating the Divine Image Session 10 Summary

THE COLOR CODES are a very important part of the energetics of the environment of the Cube and Star Tetrahedron and part of the expansion of the 8th Ray process. All creations include Sound, Undifferentiated Light and Love, and the Element of Love. The Color Codes make this process more precise.

1. GREEN COLOR CODING:

This stabilizes the Element of Love in our creation

The Element of Love is not an emotion but a very real creative element

It is more powerful than any other element that you use – Do you hear this!?!

The Green Coding is a vibration, a frequency present in your creation – a vast vibratory state

It brings coherence within the environment through the Element of Love

It helps you formulate a confidence in yourself as a creator

It helps clear away those little fragments that attach to you periodically because it brings Unity

When you're using the 8th Ray of Creating clearing application, inject this Green Coding!

2. BLUE COLOR CODING:

This brings in the emotions, which put the creative thought into motion in order to create

It uplifts the thoughts and well as the emotions (and the lower levels drop away)

It gives you the feeling of certainty and the mastery necessary to create effectively

The Blue elevates the environment

3,4. YELLOW and GOLD COLOR CODINGS:

When we first worked with the Yellow, it refined our thought

Now it's transforming our thought into the Gold of Christ Consciousness Thought

We are now capable of using our Christed OverSoul and Christed Mind in the Cube interjecting Thought from that Christed Consciousness

The Christ Consciousness, the Christed Matrix is held within a Gold Star Tetrahedron that is also part of the Cube.

Seating the Divine Image Session 10 Summary

5. THE MAGENTA COLOR CODING

This Coding contains all the Colors, all the Color Codes

The most important of these are White, Blue, Purple, and Gold

Use the other Color Codings for specific application

The Magenta amplifies the effect of other Color Codings

The Magenta upgrades your ability to create from the Unified Source perspective and it allows the creation of a double Merkaba field of six Star Tetrahedrons

The Magenta is more than a gateway into higher consciousness that brings Earth back up into its Christed nature

It is a cosmic gateway through which you both receive and transmit vast energies

It further facilitates the activation of your Light Body

and access to all of the gifts of the Holy Spirit

It gives you greater access to the 7th Ray of Creation when you are ready to drop the body

6. THE WHITE COLOR CODING

This is the Purity of Source Thought and Magnetics

so that you have that balance in your electro-magnetic field

7. THE PURPLE COLOR CODING is the Source Void creative energy

the fertile ground from which you create

8. THE INDIGO COLOR CODING

This elevates the consciousness and affects the mental-emotional body powerfully raising your thoughts and emotions

It upgrades the 2nd Triad by bringing Unity between the Heart and the Head

between the one flame in the Heart and in the Pineal

It brings about more Christ Consciousness' and makes it available in your environment

It further activates your Christed Mind

It is composed of the Colors of Purple, Blue, and Gold

The Indigo creates an environment to use the Ze'On Particles of Thought more proficiently.

Seating the Divine Image Session 10 Summary

THE ZE'ON PARTICLES OF THOUGHT: an electrical component of the Arc of the Covenant

[Ze'On Particles are created when you consciously breathe Light into the medulla, which is the Ascension chamber at the base of the brain

This creates Ze particles of Light

which are combined with the On Particles of Thought coming from the Christed OverSoul

They are combined into Ze'On Particles of Christed Thought available for use in the body]

In the environment of the Cube and Star Tetrahedron

the Ze'On Particles unify your Christed Mind and make it available

They create the electrical component within the neurology of your body that impacts the

functioning of the brain

THE ZE'ON PARTICLES PLUS THE 7TH DIMENSIONAL TEMPLATE OF LIGHT CREATE THE MAGNETICS!

So, this Cubic environment now has a potent electro-magnetic field that contains the electrical Christ Mind Energy

that allows the 7th dimensional Light Template to interject the Source Magnetism creating a balanced electrical-magnetic field

This draws to you the Source energy in its full expression in an Earthly environment

The electro-magnetic field is altered substantially, shifted into 6th and 7th dimensional functioning

MISCELLANEOUS POINTS:

1. The Rays are not really consecutive, but have been numbered only for our ease in learning to use them. The Rays are always used en masse, together.
2. The mental-emotional body is our creative mechanism. It was split and fragmented very deeply in the fall of consciousness, and we will continue to keep our attention on re-unifying it and raising it to higher frequency levels.
3. The merging of our individualized Soul and Collective Spirit takes place in the 6th and 7th dimensions.
4. You can't skip ahead in the dimensional frequencies. There is value that is obtained in every dimension.
5. Your personal fragments and anomalies that remain are tiny, like dust particles. Clear them as they come up. Also be aware you will be picking up fragments and anomalies from the human collective consciousness, and clear these as well.
6. Accessing the 6th and 7th dimensional Light Templates has put those Templates in the DNA and supports the physicality into coming into full expression as a Light Body.

Seating the Divine Image Session 10 Summary

EXERCISES AND APPLICATIONS TO PRACTICE THIS MONTH:

1. Spend this month reviewing these recordings and transcriptions and putting what you have been given into practice in your everyday life on Earth.

Review the notes provided to you on the dimensions and on the Color Codings, including the two messages from Lord Metatron on the Color Codings.

2. Maintain yourself in your full 5th dimensional consciousness:

Your Heart is open

You have the presence of the Element of Love

Your mind creates the Ze'On Particles through the activated Arc of the Covenant

Feel the Unity Consciousness of yourself as SoulSpirit, an individual Divine Image expression in the Collective Consciousness of Source energy.

3. As you navigate in the world around you, you will pick up fragments from the collective consciousness of humanity from time to time – Use the 8th Ray as well as the other clearing techniques you have been given to clear these fragments.

4. Continue practicing with the triangle for creation and to remove anomalies, adding in the 7th dimensional Light compressed in the 6th dimension, Source Magnetism from the 10th Ray of Creation brought into the 7th dimension and then compressed in the 6th dimension, Color Codes, and the Love and Unity from the White Star Tetrahedron in your Merkaba field. Remember you can clear anomalies you discover through the 8th Ray clearing mechanism and through surrounding them leg by leg on the triangle with a sphere of Violet Flame Light and sending them back to Source.

Use this template of creation for everything in your world; nothing is too mundane for this application. Work on your belief system also with this triangle method, as you can only create what you believe you can create. You may find you want to create a series of triangles built on each leg in order to get to the root cause of anomalies and false beliefs and to make your creation more precise and know how to put it into effect in your daily life.

5. Explore the 6th and 7th dimensions

Seating the Divine Image Session 10 Summary

6. Spend time exploring each of the three plus Star Tetrahedrons in your Merkaba:

a. Your personal Star Tetrahedron:

Notice all the alterations in this Star Tetrahedron. There is color, depth, and a very brilliant Light. There is a state of wholeness, congruency, Unity, and a great Love for self.

b. The Luminous White Star Tetrahedron remains very, very luminous White.

It The consciousness is even more expanded to that multidimensional expression. The primary Love Element shines brilliantly. Your Heart is full. There is only Unity.

c. The deep, deep Purple Star Tetrahedron:

This is the Void, where there is Silence and the fullness of creative energy in perfect balance. It is being brought into from through the environment you are creating with the Star Tetrahedrons and within the Cube. This environment is balanced, calm, and filled with Undifferentiated Love and Light. There is only pure, creative consciousness (no need).

d? The Gold Star Tetrahedron of Christed Thought?

7. Spend a lot of time creating and living in your Cubic environment.

Notice that you are becoming this environment that you are creating.

You are magnetizing through the Cube and drawing to you everything that you hold within.

Inject into this Cubic environment

the 7th dimensional Template of Light compressed through the 6th dimension

the Source Magnetics through the 7th dimension and compressed in the 6th dimension
all three (four?) Star Tetrahedrons

including your unified personal Star Tetrahedron

Love, Unity, and the Element of Love from the White Star Tetrahedron

the fertile infinite creative ground of the Void of Source energy

from the deep, deep Purple Star Tetrahedron

? the Gold Star Tetrahedron of Christed Thought?

The Color Codes: White, Green, Yellow, Gold, Indigo, Magenta, Blue, Purple, ?Red?

Inject these Color Codes into the Cube and into your Merkaba field

The Ze'On Particles of Christed Thought from your activated Arc of the Covenant

8. Be aware that the combination of Ze'On particles plus 7th dimensional Light Template

brings in the Source Magnetics from the 7th dimension

and creates a balanced electrical-magnetic field

contains the Christed Mind in the electrical portion

and drawing to you through the Magnetics Source energy for use on Earth

This raises the electro-magnetic field to 6th, 7th dimensional functioning
raising the thoughts and emotions
