

Greetings, Beloveds, It is I, Metatron.

I come from the Collective Consciousness of the All That Is.

You are doing an exemplary job of absorbing all of these vaster components of who you are at a Spirit level. There is much to remember, dear Ones. And we are here to show you the way.

Now, many of you, as Master Kuthumi has said, are remembering: there is something more to this Flower of Life than you have ever seen before. And that is so true, dear Ones.

The Flower of Life is the blueprint of everything that exists. It is that Source blueprint that we talk about in the 1st Ray of Creation. It is everything that is in existence, from Source, as part of Source. That means anything physical, as well as nonphysical. And there is no limitation to this Flower of Life pattern. Sometimes you may think of it as spheres within spheres. You've heard of us speak of that before: spheres within spheres.

I would like to talk briefly about the history of The Flower of Life as this will give you a more in depth view of its purpose.

At the beginning when Earth was first created. Source and many Creator Gods gathered their energies with the intention of creating a Christed Planet that had some semblance of form. This planet could then transmit the Christed imaging energetics to the entire Milky Way Galaxy. It was also a creative environment where many great beings could come and create in the perfected image of Source as an individual Divine Creator. After the intention for their creation was cast, the next step was to create a blueprint. Yes, that blueprint was the Flower of Life.

Earth began to take on some semblance of form as the creation proceeded, always in full alignment energetically to the original blueprint of The Flower of Life. It was a beautiful Light Emanation and could reflect to the entire galaxy the energetics of Christ consciousness. Many great beings of Light came to experience themselves as individual creators in form. Many had never experienced form. This beautiful planet existed in its original form for eons of time.

When the creators began to experiment with form, they veered away from the original blueprint to create denser replications. This began to create anomalies in the creations. A decline of consciousness followed and the rest you know.

The blueprint of the Flower of Life was removed from Earth at the final cataclysm and was held in three locations. The Pleiadian star of Alcyone, the Sirian star system, and the Andromeda Galaxy. It was gradually returned to Earth during the ancient, ancient times by star beings of the Pleiades and Sirians. Even though these star beings vacated Earth they left the blue print image in stone as a reminder to Earth and humans who they were.

Because of the dense environment of the Earth and a 3rd dimensional consciousness of humanity, the energetics of the Flower of Life could not be recognized. As humanity began to evolve, eventually some human's consciousness was stimulated. This brings us to the present time. It is now time for you to know a little more about the Flower of Life and how it can stimulate your conscious awareness.

Here are some basic concepts about the Flower of life. First, there are 13 informational systems within the Flower of Life. And as time goes on, we will be showing some of them to you. Some of them, you are aware of already. The first one, there is a sector of the Flower of Life that's called the Seed of Life. It is the emanation of the first 6 spheres of Source, that emanated from Source. Some of you call it the Genesis pattern. And in your Sacred Bible, it speaks of the six days of Creation. These are those 6 spheres within the Flower of Life. And they form a 6-petaled flower. The first one, the central sphere, of course is Source. And the second sphere as it emanates from Source creates movement within the sphere. And within that movement, Light is created! And that is how those spheres emanate into that Seed of Life. It's when Life began.

In the inscriptions that are seen of the Flower of Life, there is a double sphere around the exterior of that Flower of Life. It is now time to remove those spheres, because that creates one of those protective mechanisms that was needed at the fall of consciousness, because humanity was not ready to enter that unlimited space. So when you remove those two outer circles around the Flower of Life, and you continue with creating the spheres around the Flower of Life. You complete, at this particular juncture of evolution, that Flower of Life, adding and completing more spheres.

The second emanation of the Flower of Life was the Egg of Life which consists of eight spheres stacked together in a 3rd dimensional way. If you connect the centers of each sphere, you would create a cube. These 8 spheres correspond to our 8 original cells. This shape is the morphogenic structure that creates your body.

When you remove the outer circles of the Flower of Life and complete the incomplete spheres a subset of the Flower of Life that is called the Fruit of Life is created. It is composed of 13 spheres shaped like an X with a vertical line down the center. When you connect the center point of the 13 spheres with straight lines, Metatron's Cube is created.

Now, let me back up a little bit, because in this Flower of Life, you see no straight lines. You only see spheres. And this is the feminine aspect of Source. It is the creative, unlimited Source energy. When you connect the center point of 13 spheres of the Fruit of Life with straight lines, you create Metatron's Cube, which is the masculine, the divine masculine aspect of Source, creating ways in which to direct that magnificent, fluid, unlimited, female, divine feminine Source energy, and direct it in specific ways, most specifically, the one that relates to you as an individual expression of that Source energy.

So, this Metatron's Cube, that is part of that Fruit of Life, begins to unify the divine masculine and divine feminine expression and creates that individual expression in form.

Now, sometime back, we spoke to you about the merging of the divine feminine and the divine masculine. And we told you that in the presence of the divine feminine, the divine masculine surfaces. And they merge as a unit in creation. And this is so. And it is very exemplified in the Flower of Life and in the Fruit of Life, as you create the Metatronic Cube.

The Metatronic Cube is a significant piece in utilizing the 8th, 9th, and 10th Rays, and bringing it into form. As you all know, there are 5 Platonic solids, and they are all contained in the Metatronic Cube. And those solids each have an element connected with them. So the elements, the fire which is the tetrahedron, and the Earth element, which is the cube. Then you have the air element and you have the water element.

So, the elements come into play in Metatron's Cube through the 5 Platonic solids. It's important for you to recognize, as you start working with the 8th, 9th, and 10th Ray, this Metatron's Cube becomes a very significant role in that, because of these solids and the

presence of the elements, the various elements, that create an individualized expression in form.

We will not go in great detail about the Flower of Life this evening, because we have presented you with a tremendous amount of information again in this session. Our intention was to give you a most important blueprint of human Christed Consciousness. The energies of this blueprint will stimulate your consciousness of who you are as a Christed Being of Light. The Source energetics of this blueprint are that powerful. It is something that you need to sit with, review, and you do nothing with it. Sit with it and let the energetics of it stimulate your consciousness as well as the consciousness of your body.

Understand that what you put into the Collective Consciousness of this group affects each and every one of you. So, when you are triggered, when you get frustrated, pull away momentarily from that Collective Consciousness, until you can re-align yourself in your Merkaba field. And then enter back into the Collective Consciousness of the valuable group energy.

With this element in play of Metatron's Cube in conjunction with the Flower of Life, the expanded Flower of Life, it will create some upheaval in many of you in regards to this divine masculine-feminine piece. What we touched on some months ago in regards to the divine feminine-masculine, and seating that in the Earth, was a very important piece of work that we did. However, it continues to evolve.

The wounding in that divine feminine and masculine was very extensive in the mental-emotional body, as you can imagine, when consciousness fell to the 3rd dimension and the body was re-created into that 3rd dimensional configuration. So there was a lot of wounding during that time frame. Not only that, there was lot of wounding in each and every one of you, your genetic lineage patterns, and the programming that you received. So it may surface.

I'm telling you this now, because with the fuller implementation of the Flower of Life and the Metatronic Cube, the influence of those energetics is very extensive in your body as well as your consciousness. So, if some of the wounding arises, take care of it immediately. You have the tools. It's just creating what is needed in the configuration that is needed and drawing forth the tools, the Color Codes and those Light templates that were retrieved, in your configuration. And it will re-align that masculine-feminine influence.

[Editor's Note to summarize/clarify the geometry of the Flower of Life & Metatron's Cube:

The first emanation from Source from the central sphere leads to 6 spheres around this central sphere, and these 6 spheres and the 6-petaled flower they create are known as the Seed of Life or Genesis Pattern.

The second emanation from Source creates more spheres around the first emanation, and 8 of these spheres are stacked together like a Cube and create the Egg of Life, which corresponds to the 8 original cells each individual has.

When the two containing circles are removed from the usual picture of the Flower of Life and the partial circles are completed in the third emanation from Source, this image includes a subset of the Flower of Life called the Fruit of Life. It is composed of 13 spheres shaped like an X with a vertical line down the center.

When the center point of each one of these 13 spheres is connected to the center point of each of the other 12 spheres, it creates a geometric figure composed of straight lines in the form of a Cube, and this is known as Metatron's Cube. Within Metatron's Cube all five Platonic solids are found – tetrahedron, cube=hexahedron, octahedron, icosahedron, dodecahedron – as well as the star tetrahedrons.

Please also see the separate summary of the Flower of Life Joan provided with pictures of the above geometries attached, as well as a link to a very good and brief video showing the geometries being formed step by step.]
