

JOAN: Well good evening, everyone. This is Joan.

JOHN: And this is John.

JOAN: We're delighted to be with everyone again in this wonderful Collective that we are creating together for seating the Divine Image.

JOHN: Now as I mentioned just a couple of seconds ago, this series is going to be a little different, but it's orchestrated from the Collective Consciousness of the All That Is. There are many expressions of that vast Collective Consciousness that will gather to facilitate these concepts and energetic foundations during our year together. This will be accomplished through the merged state of the Archangels and the Ascended Masters. Now they have told us that they consider this project to be of major importance as we navigate through these times of change.

These sessions are so unique and important that we as a group are creating a new approach in how they are configured. There will be time allotted for conversation that will be two-way. No more, just lectures, folks. We are now part of the process. If you remember at 12-12-12, Jeshua said: "We stand shoulder to shoulder and heart to heart." Now is the time!!!

Now I know that sometimes I overuse the word "wow," and I apologize for that. So this year, from now on I'll try to be careful about that. So I'll just.... I've changed the word to "unbelievable"! So, hopefully that will help everybody. And don't be surprised when I use that, so....

And also don't be surprised when you ask a question of an Archangel or Master, and their answer is a question back to you. This is what I am talking about when we talk about a co-creative project.

Joan, do you have a couple of comments about this?

JOAN: Yeah! I just wanted to let everybody know, I know many of you have already signed up for our private Facebook page entitled Seating the Divine Image. And it is up and functioning. It's a private page. It's just for this group only, because we want to maintain this very collective, coherent energy. And we ask that you use this page for group communication, to support each other and to give your ideas about how this process is going and how it is affecting you, what challenges you are having, or what wonderful experiences that you are having.

It's not just for posting good links, although you can do that, because there are many of them out there and many of you post some really good information that you want to share. But this is mainly a venue for communication outside of our meetings. You can ask questions about the process, you can make comments about things you've experienced. You'll be surprised how this helps all of us share from your own personal experience. And it just makes it more personal. It makes you more connected. And I know that this is an area where trust is needed, but you can do it. Summon forth the Archangels, especially Michael's Shields of Light and use it for courage, and tenacity, and Love.

JOHN: As I mentioned earlier, our group, our gang, our personal gang are very excited about this new year and the continuation of this overall project on Earth, so that this group's energy can assist the world, the world, in the Ascension process. So at this time, Happy New Year to everybody! Now also, they continue to tell us how important this is in the overall process. We are all very important.

As we have stated before, we need to start, and we need to start by remembering the Love that is present in our Sacred Heart and how to start using it more extensively. To get us started in the right direction, let's all take that deep breath and let Joan bring in Archangel Gabriel to lead us in a centering meditation.

ARCHANGEL GABRIEL CENTERING MEDITATION, THROUGH JOAN: [5:27]

Greetings, Beloveds, it is I, Gabriel. There are many who have gathered with you in this Collective Consciousness that we are meeting in at this time. All of we Archangels are present and very much a part of your group dynamics. Don't forget that. Even though we are in another non-physical realm, we are very much here as equals, as participants, in this energy of Collective Consciousness. For you are That as well as being that beautiful human individual expression in a body. Many, many Masters, some of which you know nothing of, have gathered and are part of this Collective. They bring with them, as do you, experience in the physical realms. So it is a fine coming together of Collective Consciousness, each and every time we meet with intention.

And even when you are experiencing your individuality, that Divine Image that you are seating, both collectively and individually, is a very important service that you are now bringing to Earth. And we support that 100%. And we also bring to Earth our part of the Angelic realms' energetics, not as superior, but as part of this vast Collective Consciousness that are making this Ascension possible.

So if you will take a deep breath now.... and let go of all of the thoughts of the day.... all of the events.

Be very present in the moment. Breathe yourself into your Sacred Heart. Open it wide.

See the energetic configuration of the luminous White Star Tetrahedron that brings that vast consciousness of you as that Collective Consciousness and as the individual expression of Collective Consciousness into the world of form, into the world of the body. This beautiful configuration is an energetic matrix that allows you to access the fuller consciousness of yourself as that vast Being of Light.

So let us sit together in the vastness of this luminous White Star Tetrahedron, filled with Light and the Love of the Divine Expression, the Divine Image that we are going to transmit into the world. But first of all, be very conscious of yourself as that beautiful energetic Image of the Source of your Being. You are That. And you have the capacity to hold that Image in a very refined state.... Let us all embrace that Image, the refined energetics, the luminosity, the purity of the energetics of the White, the luminous White, the Radiance of each of us as individuals and the Radiance of each of us as a Collective Consciousness, gathered for the purpose of creating that Image, wholly and completely, in the world of form..... [Pause]

Begin to know yourself as that vast individual. Begin to know yourself as that vast Collective Consciousness..... [Short Pause]

Now being the All that you are, direct your attention back into this group energy and into this evening's teachings..... [Short Pause]

JOHN: [14:15]

Thank you, Gabriel, as always, for your wonderful message. And I don't think we thank you enough for just your Presence. It is wonderful and we do appreciate it. Thank you, thank you, thank you.....

JOHN: [14:35]

[Review of accomplishments of Seating the Divine Feminine-Masculine]

Now, our dear friends have asked us to lay a firm foundation with a brief review of what was put in place in the Seating of the Divine Feminine and the Divine Masculine Template on Earth. Now, we can all begin to create a very coherent Crucible from which to seat the energies of that Divine Image.

So in Session 1, we went over some important history of the Earth and how the split between the feminine and masculine happened.

Of course, one of the most important parts of this whole series was created in this session: together we created a Crucible of Love in the Sacred Heart, to hold more of the vastness of our Being. We continued to use this Crucible throughout the six sessions, to reinforce and expand it.

Now in the 2nd Session, we were exposed to how we currently use the fallen feminine-masculine template and how to change our approach. Again, we always return to the crucible in the Sacred Heart.

In the 3rd Session, we discussed the attributes and the qualities of the masculine and the feminine. We also were to experiment with choosing an attribute from the other's column and make it one of our own. And during this session we created a Star Tetrahedron of brilliant White Light that was made of and filled with Undifferentiated Love and Light. We seated it in our Sacred Heart to hold the Template of the Divine Feminine and Divine Masculine in Unity. What a powerful activation that was!

During our 4th Session we heard from Anna, Mother Mary, and Mary Magdalene. What a group! Now the focus of that session was not just on the Divine Feminine Triad but using the Divine Feminine as a vehicle to bring the Divine Masculine in perfect unison and seat this unison in the physical body. An awareness was opened to know both Source and yourself as a balanced, unified Being with both feminine and masculine attributes. We also began to integrate these Unity concepts within the mental-emotional body to create balance in our thoughts and emotions, so that we can manifest more precisely in form. Session 4 was very important again, because it started to develop a state of consciousness from the vastness of our Being as a Soul Spirit.

Now in Session 5, Yeshua and Master Kuthumi, in their merged state, helped us further seat the energies of the luminous White Star Tetrahedron into our bodies, into our energy systems, and into our consciousness. This Tetrahedron not only holds the Divine Feminine and the Divine Masculine template that can be absorbed into physicality, but it also brings Unity and equilibrium into the world of form. All parts of us are being unified, the physical as well as the nonphysical, through the mental-emotional body. Now you're beginning to replace every thought and every emotion and replace them with the thoughts that emanate from the Mind of Source. Your emotions reflect Unity through joy, harmony, and ecstasy.

During the 6th Session, we went through an Initiation that was seating the Unity Template into ourselves at both the physical and nonphysical level, and into the Earth, and also sharing it with our friends, the Elementals. This was a first step for a major shift of all of humanity, individually as well as collectively.

Now in the 7th Session, we had a mini review of what we had created in the previous sessions. Yeshua, merged with Master Kuthumi, and with the Presence of the Feminine Triad of Anna, Mother Mary, and the Magdalene, created a reference point for us to know the joy of being Divine. It also helped us to use the Crucible of Love in the Sacred Heart, the Holy Spirit, and the luminous White Star Tetrahedron. We merged our thoughts with the Divine Thought that is in the Mind of Source. This healed the fragmentation of the mental-emotional body and created a state of consciousness of knowing that we are a Divine Being of Light. We are a Soul Spirit unified with our Prime Creator, knowing we are navigating the world as a Christed Being in a body.

Now during the Collective activation with Yeshua and Master Kuthumi, we co-created a cosmic womb in our bodies and in the bodies of all humans, in which to develop a Christed Being. This was a huge service to the entire cosmos, so that Christ Consciousness from this moment forward is present in every human form and in every non-human form.

This new program is organized in monthly teaching sessions to allow all participants space to integrate and use the energetic material presented. Now there will be times that you will be required and asked to hold more than one session, depending on the material being covered.

Now this is going to happen right off the bat during the month of January. We will have a two week time period to integrate and absorb the concepts, energetics, and meditations of this session. We will meet again in two weeks for a discussion and question and answer period to further set the energetic templates that were presented. There will also be a channeled teaching to help us further explore the foundational energetics that we are creating together. These two meetings within this month will give our Collective group an opportunity to set a stable foundation for what we will create this year. In February and March, we will go back to our monthly sessions.

JOAN:

We are all asked to use our Mastery to create individually and collective and not be dependent on a teacher, guru, or leader. We are very independent forces of Christed Energy that will expand our individual Divine Image. This is an important piece of information, because it enables us to hold the Divine Image at a Collective level as well as an individual level. If time is not given to do the exploration on an individual level, then we will always be dependent on something outside of ourselves.

To truly exhibit our Divine Image completely, we must start competently exhibiting it at an individual level first. This is why we have come in a human form at this crucial time of Ascension. Understand, we each are responsible for creating the Image change in humanity. We are supported by a vast Collective Consciousness which we are in Unity with. Even though our group may be small in numbers, never think that we do not have the capacity to create a vital energetic template that will be documented for new generations.

I would suggest that you each keep a journal of your experiences and read it from time to time. You will find such jewels in it that you can always use as well as share. You don't need to write every day if that seems too time consuming, but at least two or three times a week.

Remember, you have a whole month to process and integrate the concepts and energetics. This is not a weekly class. These sessions are all about your experience of the Divine Image and how thoroughly you can incorporate them into your daily life. Be willing to change your process a little and step into a whole new territory of experience. We would suggest that you not share this material with others outside of our Collective group, as this dilutes the energetics that we are putting in place!!!

JOHN: [25:40] Let's start this session with a check-in on how you used your Divine Feminine and Divine Masculine energies in the last few months. What difficulties did you have and what successes did you observe?

So, let's have a conversation. Who wants to begin?

Remember, this is a co-creative series.

Don't forget to push *6 on your phone and then the number 1 to be put into the queue. I will let you know when you are on.

DISCUSSION SESSION: Participants made general comments and reported on how they had incorporated and experienced seating the Divine Feminine Masculine and Unity templates within themselves in the past few months. This part was not transcribed....

JOAN: [40:30] So then we'll get started on our discussion about tonight's concepts that we want to cover and the channeling that is to follow.

JOHN: So, let's begin our discussion with presenting some comments about the Sapphire Blue Star Tetrahedron and how we will expand its function. You know that the energetic configuration of this Star Tetrahedron is the bridge between the physical and the non-physical chakras: upper seven, lower seven. The tetrahedron is in fact an energetic matrix that has a complex function, much more than just being a bridge. It holds the consciousness of the Divine Feminine and the Divine Masculine Template as well as the beginning stages of Unity Consciousness. The vital energetics of this matrix expands the consciousness to both your physical expression and simultaneously your non-physical expression.

Through this energetic matrix, you begin to open the pathway to create more consciously from the vastness of your Being. Concepts of masculine and feminine are no longer related only to the function of a gendered body, that operates in rigidity and separation, but from a full expression of a more Divine Image. Your awareness of who you are becomes available, and you can see yourself from a physical as well as a non-physical perspective, functioning simultaneously in a body on Earth. This is where Unity begins to be established within our energetic system.

So, now, let's hold the space for Joan to bring forth Master Kuthumi to continue this teaching. Now when this channeling session is over, our session will be completed. We suggest that you sit in these energies for a while to absorb more fully what is being given to us.

And remember, we will meet again in two weeks: Tuesday, January 19th at 8pm CST.

JOAN: Also, I have two logistic things. You will be sent in the email a link to your private page, and you will be required to use your username and password that you created when you registered to enter that private page. And it will have all of the recordings and transcriptions, or any pdf files that are available. And it will take a couple of days for us to get everything posted. Katie has to transcribe and Peggy'll have to edit. Hopefully, we can have the recording available on the private page in the next day. So, if we meet on Tuesday, hopefully by the end of Wednesday it will be posted – if not, Thursday morning. And the transcriptions will follow. So, we will keep you apprised of when these things are posted, via email. So that's how that will be handled.

Now, let's all take a deep breath and invite Master Kuthumi to be present with us.

MASTER KUTHUMI THROUGH JOAN WALKER: [45:22]

Greetings, Beloveds, it is, I Kuthumi. [John: Greetings!]

I am delighted to be participating in the dynamics of this Collective Consciousness. I come as a part of this Collective. I come to bring my experience and expertise as a Master Teacher.

As we begin to lay the foundations energetically and conceptually for these Gatherings, we want to make a very real connection between what we covered in Seating of the Divine Feminine and Masculine Template and these, as we explore further, the teachings of the Divine Image and Unity Consciousness. This is important, because it gets you out of that separated function of a masculine body or a feminine body. The experience of that separation begins to fall away, and you begin to see that you have both masculine and feminine attributes. And the gender of your body is just the vehicle that you use to explore the world of form and to explore your separation.

Originally, it was intended for you to explore your individuality, not your separation. So, in these next two sessions together, we want to join together more firmly that awareness within you about your individuality, irregardless of the body's gender. And that begins with this Sapphire Blue Star Tetrahedron.

As John has said to you, that Star Tetrahedron is so much more than a bridging mechanism between the physical and the nonphysical realm, between joining together the 14-chakra system so it functions in Unity. It is an energetic matrix, a very powerful matrix. And in this Unity that it brings with the 14-chakra system, as we explore further into these teachings, it will open the opportunity to begin to activate a 21-chakra system. So, we begin this evening with that beautiful, vibrant Blue Star Tetrahedron.

So, if you take a deep breath and visualize it, as it sits above your 7th chakra, bridging into the upper seven chakras that have no form. And visualize that energetic of that matrix joining together each of these 14-chakra system in a Unity expression. So there is a spiraling that is occurring, without separation, between the 14th chakra all the way through the system, anchoring through the root into the Christed Matrix, into the Earth.

And there is such coherence in the Presence of this Sapphire Blue Matrix. There is no separation any longer between the 7th and the 8th chakra, between the physical chakras and the non-physical chakras. There is only this beautiful, refined, coherence.

So let's sit together for a moment in this coherent, refined frequency of Unity and Love.

[Short Pause]

Experience yourself in this Unified Field, coherent, vibrant.

[Short Pause]

You are establishing it this moment: Unity between the first seven chakras and the upper seven chakras. There is no separation and no need any longer for a bridge, for you are creating that Unity in the 14-chakra system -- the Unity that allows you to see the vastness of who you are as part of the Master Realm, part of the Lords of Light, the Elohim, and the All That Is. You are One Collective Consciousness.

[Medium length Pause]

[53:59] Now, we have one more thing that we are going to create with the energetics of this Blue, Sapphire Blue Star Tetrahedron matrix. We are actually going to seat it in the first seven chakras. Our focus this evening is going to be on those first four chakras. It is important that we do this as a Collective Consciousness, because it alters the frequency of the physical body itself. It alters it to a much more refined state. And that refinement has to start in those first four chakras. And you can understand why, because they pertain to your physical life expression: every thought that you think, every emotion that you feel, how you use your mental-emotional body that is such a powerful, powerful vehicle, and how you love yourself unconditionally.

So when we create the Presence of this beautiful Star Tetrahedron within these four chakras this evening, we are bringing a new frequency range to the physical body. Now in previous conversations, we have talked about the descent of Spirit into form, the descent of You at that vaster level, merged with your Soul expression into the body. And we have told you that it cannot remain in that body for long periods, because the frequency resonance isn't there yet.

This is what you are creating this evening: a more refined resonance, so that your Spirit, the vastness of who you are, the perfected Image of the Source of your Being can take up a greater residence within your body. Just as you created an environment for the Soul to be more present and in the forefront of your life experience in a body, now we are creating together a much different frequency range that the body is capable of holding, so that there is a better resonance in the frequency range for your body, for your Spirit to take up residence in the body.

Originally, that Adam Kadmon body, the body that humans were given as a 12th dimensional Christed Being, the Spirit as well as the Soul was fully merged and incorporated in that Adam Kadmon body. So, you see the value that you now bring to humanity, to the body, as we create together this new template, energetic template, that will enable the Spirit to descend in the body and to be anchored in the body. This will not happen overnight, Beloveds! You will still have this ascension and descension going on. But you will notice, as we go along in this year, that that coming and going is lessened and that you are able to remain conscious at that Spirit level in your body in your daily experience.

And this is another reason why we have allotted a month time for you to incorporate these energetic templates. They are vast templates! You cannot do this in a week or two weeks. And, for some of them, some of these energetics we will be working with, you can't even do it in a month. So, be gentle with yourself, take the time that is needed, privately, individually, to incorporate these energetic templates that we create together as a Collective Consciousness.

So, take a deep breath..... and give yourself a moment here to absorb what I have said to you in the last couple of minutes. It is huge!

[Short Pause]

[61:17] Now, bring your attention to that beautiful, luminous, Sapphire Blue Star Tetrahedron. See it right in front of your body..... how beautiful that Sapphire Blue is! Notice the energetics that are within that tetrahedron, as it spins, it is spinning, spins right in front of you, at the level of your Heart chakra. It spins and it spins, vibrant, and very energetically potent.....

Now, we are going to create four of these Blue, Sapphire Blue Star Tetrahedrons. And we are going to take them from the Mother Star Tetrahedron that is right in front of you, and we are going to place them in each chakra.

So, take a deep breath..... and go to that Mother Star Tetrahedron, the vast energetic matrix, and draw a Star Tetrahedron holding the exact duplicate of the energetics of its Mother. And place it in your root chakra.....
See it ignite the Light that was already there in that root chakra.....
And that beautiful, spinning vortex of the Sapphire Blue Star Tetrahedron begins to spin in unison with that root chakra, creating a very refined energetic field of Light....
For the moment, hold it in very close unison with that root chakra... creating a vaster expression, a Divine Image of the All That Is... merged whole and complete within that root chakra. It immediately vibrates at a different frequency range.....

[Short Pause]

Take a deep breath.... allow that Star Tetrahedron to be very much a part of your root chakra.....

Now, go back to the Mother Star Tetrahedron and draw from it another Sapphire Blue Star Tetrahedron with the duplicate energetic configuration, and place it in your sacral chakra. It ignites the sacral chakra as it merges energetically with the Light that is already there.....

And it begins to spin in resonance with the sacral chakra, spinning and spinning and spinning... and as it spins, it creates a different frequency resonance, creates a refinement that was not there previously, spinning and spinning... Hold it close within that 2nd chakra, allow it to spin in Unity as you create a refined resonance in the body.....

[Short Pause]

Take a deep breath. Return to the Mother Star Tetrahedron and draw another duplicate and place it in your solar plexus, igniting with the Light of the solar plexus that was already there, uniting, spinning, creating a refined resonance in the solar plexus, altering the frequency range in that sector of the body, changing the frequency resonance of the body... to a more refined expression, spinning and spinning, creating that vibrance, creating that resonance... eliminating any gross expression of separation... spinning, vibrant Blue, Sapphire Blue...

[Short Pause]

Take a deep breath and return to the Mother Star Tetrahedron and draw from it a duplicate... and place that beautiful Star Tetrahedron, Sapphire Blue Star Tetrahedron, in your Heart chakra, igniting further the Light in the Heart... merging with the Light that is already there, creating a vibrant, unified expression of refined resonance of the All That Is, powerful, refined... unified...

See it spin as it merges with the Heart chakra, spinning and spinning and spinning, creating a Unity, a refinement, a resonance that holds the Divine Image in the body, creating change in the body, creating a refined resonance in the body...

[Short Pause]

Now as these four Sapphire Blue Star Tetrahedrons are spinning, they spin in Unity with each chakra and in Unity with the first four expressions of yourself, as Soul Spirit in a body, in one Unified Field of refined Light, impacting the physical body in such a way that it impacts every cell, every molecule, every neuron in the body, and stimulates it to function at that more refined energetic level.

So the body has begun its transformation more fully into Light Body, because you are creating a different refined frequency resonance within the physicality of the cells of the body, of the body itself. So not only are you creating a field for your Spirit to take up residence in, but you are creating a change in the physicality, so that the Light Body, although anchored in the body, becomes more activated at that... because it has a more refined expression.

And now it can merge more fully with the body itself. It cannot happen just in this evening. It requires your attention. It requires your practice, your utilizing these energetic templates proficiently and continually. The body is slow to respond and requires your attention...

[Short Pause]

[77:03] A lot has occurred in this session, dear Ones. Dramatic changes are taking place in the body... This may bring up some fragmentation in your mental-emotional body. This may bring up some old, past patterns for you to re-look at. It may bring up some emotions. You may feel very vulnerable for a while...

Your ego expression is being called upon to change with the energetics that are now present in the solar plexus, that power center of the personal power center, how you use personal power. Issues around that may arise for you to look at. Awarenesses will arise in that chakra about how you need to use your power more effectively, how you need to use your emotions and not push them away, so that they can be fully expressed as the Divine Image that you are... the thoughts that are available now in the mental body, from the Mind of your Source of your Being..... So those that don't resonate surface for you to release, because they no longer have a way to express themselves in the refinement of these energies that you are creating.

So rest often, sometimes even if you feel you have to withdraw for a few days here and there – do so! It's a wonderful, uplifting time... There will be such Joy that you can tap into in your emotions, as you see yourself vibrating in that very refined field. So not all of these things are negative that surface, dear Ones. Look for the gems, look for the jewels that surface. The Beauty of yourself that has been hidden away will surface for you to see fully. And it will bring such Joy to your Heart...

So this next two weeks is for you, Beloveds, for your body. Take advantage, work individually... Journal, practice, notice the refinement that you are creating...

This has been a very full session, Beloveds! So as we close, now, this Gathering, it doesn't limit you in any way, because you are always part of this Collective energy. That is who you are, the vastness of who you are – a Collective Consciousness. But you also are an individual expression of that Consciousness.

So, in the quiet time in these next two weeks, get in touch with how you vibrate in this refined state of your body, simultaneously as the individual and the Collective Consciousness expressing itself in Unity in the body, creating a receptacle for the vast expression of you, of your Spirit, to take up residence...

So we will sit together for a few minutes longer...

[Pause for a few minutes]

As we close our Gathering, we do so in great Love and appreciation for each other and for the opportunity to change our bodies. And even though we close this meeting, we remain as one Unified Field of Light, expressing the Divine Image on Earth...

Blessings, Beloveds!

[87:00]
