

The First Six Rays of Creation

First Ray: Contains all of the energies of Source in complete Undifferentiated Divine original perfection. It also contains the original schematic or blueprint of all of creation.

Here are some of the ways that you have experienced the First Ray of Creation.

- You have drawn the Undifferentiated Love and Light of Source into your body through your Pineal Center compressed it and made it useable by directing it to various parts of your body.
- Aligned your Higher Mind with Universal Mind in the 8th chakra.
- Connected with the Mind of Source in the 10th chakra.
- Accessed the consciousness of your Sacred Heart. This is the Vast Creative Source Energy and the immense wisdom of your soul/spirit.
- Accessed the Void in the third-star tetrahedron of your Merkaba field. This is the fertile creative ground of Source Energy.
- Brought into your consciousness and your body the Undifferentiated Creative Source magnetics through the 7th-dimensional template that was retrieved from the time lock
- You have also worked with this Ray when you worked with the Template of 5th-dimensional consciousness of Love and Unity.

Second Ray: This ray was given as a stepping down mechanism of the energies of the first ray into a more accessible range of frequencies in denser environments. It also has a stepping up mechanism that assists in raising the consciousness as well as increasing the light frequencies and vibrations in any denser environments.

Here is how you have used the Second Ray of Creation.

- You have worked with this Ray in various applications using the Second Triad energetics and applying Source Light into your body.
- You have also used this stepping down mechanism in using and applying the Light Templates of 7th, 6th, and 5th dimensions and also applying of Source Magnetics.
- You used this Ray as a stepping up mechanism when you began the

process of ascending the Soul and connecting with the vastness of your Spirit which is pure Source energy. You saw the stepping up mechanism in action when you created a flow of Source energy within your body through the center channel when you created a flow of the descension of your Spirit into the body. You merged your vast spirit with your soul and created a flow of ascension and descension. This process allowed you a constant flow of Spirit into the body and an ascension of your soul in an uninterrupted way.

Third Ray: This ray contains six massive blocks of energy that are taken from the first ray in its original format and stepped down through the second ray to allow the energetics to be used for creation. These energetics can be used in different configurations to create in various applications and manifestations.

Here is how you have used this ray.

- As you used the Fourth, Fifth and Sixth Rays to create consciously and precisely. These rays are used together. Energies are taken from the first three blocks of energy that reside in the third ray. It is with these blocks of energy that creation can take place in the physical realm by those who are embodied in a physical body. The fourth ray provides stability and holds a pattern in the physical experience through the electromagnetic field that you create with your thoughts and emotions. The fifth ray provides fluidity and loosens the stability and rigidity of a pattern. The sixth ray adds more fluidity and more extensive options to the creation:

Fourth, Fifth, and Sixth Ray:

- The fourth ray holds any thought form or emotional pattern in a very stable arena of the electromagnetic field of your body and of the Earth so it can be experienced in the physical realm. This ray is not selective as to whether the pattern or thought is negative or positive. There is no polarized view in the Rays of Creation. It is in this ray that you begin to work actively with attention and intention. Your attention is placed on what you desire to create or change and with your intention, you proceed with your creative process through the fifth ray.

- The fifth ray contains more options for your creation and also loosens the stability of any pattern, so there is more fluidity. Here you can use the fluidity to transform or change any pattern or see many options in your creation.
- The sixth ray gives you many more fluid and expanded options with which to create. There are many open-ended possibilities in this ray.

As you have progressed in altering your consciousness and your body, you have changed your ability to use the Rays of Creation more efficiently and effectively. You have entered an expanded arena where there is no limit to what you can create.
