

Greetings, Beloveds, it is I, Gabriel.

I come from the vast realms of the Collective Consciousness as an Archangel of Light, carrying templates and Light frequencies of Source Energy. I begin to emanate that Light into this entire Collective that has gathered this evening.

I want you to take a deep breath, and as you open yourself to my Presence and the Light frequencies that I carry..... notice the compatibility in this state of Being. Beloveds, you have come far since we began creating together. So, there is very little variance in the frequencies that we all carry. You have established a resonance, a state of Being within all parts of yourself, physically and spiritually.

You are becoming conscious Beings of Light. The most beautiful thing about this Light that I want you to see at this present moment is that that Light is YOU. You are beautiful to behold. Your Light Body is 70% illuminated. Your Merkaba field operates consistently at 100% Light. You are becoming, you ARE pure Light. Much of the carbon base within your physical body has been replaced by Light.

And as your journey on Earth continues, you emanate, you reflect, you exemplify what a Christed Being is in every moment of your day. When you hold this beautiful Image in the forefront of your consciousness, you begin to see the value that you bring to Earth and humanity. It is easy for you to Love yourself, because you now know yourself outside of every fragmented example of what a human is. For this was false. And now you know the Truth. What's not to Love, Beloveds?

Now, let us continue together to explore more of who you are. [4:03]
