

It is I, Uriel.

I come in the configuration of the tetrahedron with Metatron, Michael, Lord Melchizedek, and myself. We emanate from the vast consciousness of the All That Is. I come in the forefront of this configuration to lead you in further experience of your Light Body and of this vast field of Light that you have just created.

Understand, Beloveds, this field was not created by us – it is your individual Merkaba Vehicle: you created it through the consciousness that you have developed.

Some years back when it was first brought into the awareness of humanity, you were not aware of the levels that were open to you in this Merkaba field. But as you evolved your consciousness and you became familiar with your Sacred Heart, you became familiar with the Holy Spirit, with your personal Holy Spirit as well as the vast Holy Spirit of the All That Is. It brought us to this junction, at this very moment.

So each one of you sitting in your personal, vast Merkaba Vehicle gathered together in this Collective Consciousness emanates an unbelievable Radiance of Light -- so luminous! It is coherent, it is stable, and it is functioning at 100% the field/the speed of Light. There is such value in this vehicle for you in the coming times. And we will be with you to guide you and show you how to enter these vast regions of consciousness.

As you sit in your Merkaba vehicle of Light, begin to familiarize yourself with the consciousness, the vastness of the consciousness that that vehicle holds.

The functioning, the coherent functioning of this vehicle at 100% the speed of Light has begun to activate strands of DNA in your physicality that relate to your physicality. The consciousness that is held within this vehicle is such that even though the body you occupy, the human body that is transitioning, that you are creating the transition for into a 5<sup>th</sup> dimensional vehicle is being helped by the activations of some of these strands that relate to your physicality. So this is what I come to show you this evening.

In that DNA structure configuration, that lattice, the first two strands of that DNA lattice begin to be altered in the Presence of the Light that emanates in your Merkaba Vehicle. It removes a lot of the old, rigid template of separation, unworthiness, and victimization. You have worked with these things long enough!

[5:08] And now that you have this activated, coherent, stable Light Vehicle, that is emanating the Light of YOU, of your SoulSpirit, that DNA structure is being re-established in the 5<sup>th</sup>/6<sup>th</sup>/7<sup>th</sup> dimensional format, so that you will no longer have any conscious remembrance of anything but Unity and Love and a certainty in your ability to create.

Now that you have a functioning Merkaba Vehicle, this is a very real event that is taking place. So we ask to support that event by seeing it evaporate, and that confidence, that certainty, and that knowing Self from that Soul level, knowing Self as the Collective Consciousness. This is real – it's happening NOW.

Sometimes others will model to you separation, victimization, unworthiness. And you will just watch. You won't judge, just watch. And you will remember, once upon a time, you also created that. But now you have created with intention and you have altered that pattern in the DNA.

You are a very powerful creator. And through your thoughts and emotions that have been elevated, because you have elevated them to a more refined level, you are capable of altering your physical DNA structure. You can do this! You are doing it! Take a breath.....

Feel that confidence within you, not from superiority – that's not even in this equation – but from that confidence that emanates from your Soul, a knowing, a knowing of Self as a Collective Consciousness using a physical vehicle that is encompassed by a vast consciousness of your Light Vehicle. Your physicality is encased in that field of Light; so your consciousness is altered dramatically.

Always keep in the forefront of your awareness that, as you navigate these various dimensions and states of consciousness of these Star Tetrahedron configurations that are vast – that Luminous White Star Tetrahedron is vast, as is the Radiant deep Purple Star Tetrahedron that relates to Source. This Source energy – you are now capable of drawing from, consistently and precisely.

You enter the Void. It is like going into a black hole, but is something that you are drawn, you are magnetized to in that Light Vehicle. It is moist; it is the creative energy. And, as you enter it, deep within that Void energy, the Light that emanates in that Void is almost blinding. But you are so accustomed to that level of Light, because you are in your Merkaba Vehicle.

You ARE Light! And now, you see it, you know it, you feel it, and you command it.

[10:15] There are other strands in that DNA coding that we will be visiting in the next several meetings, so that you consciously are aware of what is happening within your body and within these vast conscious fields of Light in your Merkaba Vehicle. Things that were only talked – your mastery, your memory codes of that memory codes – will become very real events, because you have created an environment, a conscious avenue for those to express themselves in this vast state of consciousness.

This is just the beginning! A very important State of Being has been established, so that never again will you wonder, “Am I really a vast Being of Light?” That thought will never enter your mind, because in this Vehicle of Light, there can be no doubt. At that 100% the speed of Light, nothing else can exist.

And when you gather together in this beautiful Collective, each one of you emanating in your beautiful Merkaba Vehicle, gathering together in one unified expression, can you imagine the consciousness states that you are capable of entering.

There have been many, many concepts and energetics put forth in tonight’s session. You activated a full consciousness of that Merkaba functioning this evening. This was HUGE. And there were energetics at play in the DNA that we have briefly discussed with you.

So, in the coming weeks, every day activate your Merkaba field. Every day notice that 1<sup>st</sup> and 2<sup>nd</sup> DNA structure, how it has changed, how your mental-emotional body is operating at those higher levels, those more refined levels.

Your Higher Mind, your OverSoul, and your Christed OverSoul come into play here also. They impact every thought that you think. The energetics of that thought create levels and the emotions that are very powerful, Light-filled, refined. No longer do you find the need to play in anger, distrust, or those lower emotions, because that Higher Mind, the OverSoul, the Christed OverSoul, has a Light environment from which to exist and influence the physical body as it is upgraded very quickly now into that 5<sup>th</sup> dimensional vehicle, that is capable of using 5<sup>th</sup>/6<sup>th</sup>/7<sup>th</sup> dimensional frequencies and playing in those dimensions.

We have just begun!

[15:21] Allow yourself to play with your newfound vehicle, the consciousness that is now available to you. Play in the fields of that Star Tetrahedron, the Luminous White and that Source energy. The field that surrounds the Merkaba, the spheres that surround it, are pregnant with information, with states of consciousness that that Star Tetrahedrons exist in, that the Merkaba field exists in and draws from.

So, all of these things are to be examined, to be used, to be experimented with.

Sit for a little while together in your Collective Consciousness, in each individual Merkaba field. Sit in the consciousness of that Luminous White Star Tetrahedron and the deep Purple Source Energy of the 3<sup>rd</sup> Star Tetrahedron, of the consciousness of YOU as SoulSpirit in a body in that 1<sup>st</sup> Star Tetrahedron, knowing that very consciously, all three Consciousnesses operating simultaneously.

Sit in that energy, draw from it. Use the support of the Collective of this group that maintains that 100% the speed of Light. Sit with all of us, all that have gathered to be with you. Sit in that consciousness for about five minutes.

And then withdraw into your personal field. Activate it daily. Sit in meditation in that field and draw from those vast states of consciousness. Observe the 1<sup>st</sup> and 2<sup>nd</sup> strands of your DNA. See how they begin to glow.....

Breathe deeply and begin to immerse yourself in your personal Merkaba field.....

Blessings, Beloveds!
