

**JOHN:**

Some of you who will be attending the Crystal Conference will have heard some of the following information. It's important that we have coherency in our Collective group; therefore, please listen and understand that there are energetics in these concepts that are very important.

As you can tell from Gabriel's guidance, it's significant that we all have our Merkaba fields operating at 100%. There are many triggers that may come into your awareness as you spin the 1<sup>st</sup> and 2<sup>nd</sup> Tetrahedrons. Fragments in the mental and emotional body cannot exist in a field of Light that is spinning at 100% the speed of Light.

In that field of Light, any separation or fear energies will be kicked up for you to look at and clear. These anomalies cause wobbles in the coherency of a balanced spin within your Merkaba field. For instance, you might think that you are not qualified to do this level of service, or some other thought of doubt or unworthiness. Your emotions may fluctuate from feeling confident to feeling fearful. You may also have a tendency to revert to old patterns that hold you in the grip of your rational mind. The rational mind prevents you from receiving the purity and refined Light that is available to you now.

We have been asked to stay in the Collective Consciousness Energy of Source. When our pure Source Energy begins to wobble, we cannot maintain the Merkaba spin at 100%. Either the top tetrahedron will drop down to a speed of 50% or 75%, and the bottom may be spinning at 100%, or vice versa. These are very subtle events, so you have to pay close attention to what you think and what you feel as you create your personal field.

You all have done substantial clearing and healing work over the last few years. What surfaces now as you spin your personal field are small fragments left over from some of your clearing. Or it may be some of the collective human consciousness that is creeping in because of the environment that you play in each day.

Allow yourself time to absorb and use the energies that are given to you in these conferences. Hold them close and absorb and integrate them before you automatically doubt yourself. Trust yourself!

There is a ploy of the untransformed ego that you must be aware of. It tells you not to trust where your Soul is leading you, that you are not wise enough or not worthy enough to be the Christ Consciousness that you are. Don't be confused and think that you do not understand, but allow some integration of the concepts and energetics, because, as you know, it is in the experience of them that you truly know them.

Also, something to remember about the ego is that it is divided. Your ego always expresses itself from a state of fear and separation. It either puffs you up as better than or tears you down as less than. A big portion of this is due to you still being in a 3D body that you are in the process of resurrecting into a Light body.

Other issues to see clearly are gender wounding. I know that you all have done a lot of work in this area, but when your Merkaba spins at this increased speed, some of the old unconscious issues may arise. Just as a reminder, let me tell you a short story:

Once upon a time, there was this beautiful planet called Earth. It had a beautiful 12<sup>th</sup> dimensional energy field and a Christed Matrix as its blueprint. As we know, because of anomalies created, our access to the divine feminine and the divine masculine template diminished over many eons. We ended up at the end of this great decline in a gender-separated state.

As the consciousness declined, humans started to relate to their bodies more and more. The gender of the body was a key reason that we could play in separation. We saw ourselves as better than or less than according to what body type was in power.

These woundings were passed down generation after generation in the DNA of the body's genetics, as well as being modeled and taught. In separation and fear, we always looked to the outside world for information, and we reacted according to what we perceived and believed. The ego became the dominate voice that we heard and used. We had no conscious awareness of our mind or Soul wisdom. This brings us to today....

We have all worked on these masculine/feminine issues. Because of the alterations that we have made, the DNA structure in the body has been altered, so that a Unity Consciousness in ourselves can become part of our physical make-up. We need to stay aware of some of these old triggers returning to disturb this wonderful balance we have created.

In tonight's session, we will add some concepts and energetics that expand the functioning of your Merkaba field.

Your Merkaba field consists of three Star Tetrahedrons that spin and operate on the same axis. These three Star Tetrahedrons are

- #1: Your personal, stable Star Tetrahedron that you have been using
- #2: A Luminous white Star Tetrahedron, and
- #3: A deep Purple Star Tetrahedron.

Each of these Star Tetrahedrons holds states of consciousness that you are now capable of accessing. The 2<sup>nd</sup>, the White Star Tetrahedron contains all colors, all sounds, and much more. It brings Unity Consciousness to the personal Merkaba field and increases the Sacred Heart consciousness. Indeed, it is the home of the Sacred Heart consciousness. The 3<sup>rd</sup> Purple Star Tetrahedron relates to the Creative Consciousness of Source.

When all three are functioning in one Unified Field of Light, your Light Body begins to function from its vaster state. Strands of DNA that relate to your physical body are activated. This escalates the body's ability to operate as a 5<sup>th</sup> dimensional vehicle.

These last few statements are very important concepts that have huge energetic components.

We will be exploring these energetics with our Collective Guides of Metatron, Michael, Lord Melchizedek, and Uriel.

Now, take a deep breath and help Joan bring forth the Collective Consciousness.
