

Greetings, It is I, Gabriel

I am honored to be here with you in this Collective Consciousness. Many have joined me this evening, as probably you are all aware – many of the Archangels, all of them in fact, we wouldn't miss this event for anything! And we are so pleased to be a part of this Collective Consciousness. All of the Masters, of course, are here in attendance, as well as the Elohim and the Lords of Light.

So, if you will take a deep breath, and let go of the thoughts of the day, and breathe in that Undifferentiated Light of Source..... As you exhale, exhale Love..... Now breathe in Love..... and exhale Light.....

As we gather together in this vast Collective Consciousness, let us activate your individual Merkaba field. And in this beautiful Collective Consciousness, you are quite capable of maintaining that 100% speed of Light. So, if you will, command your Light Vehicle to activate.

And let's work with the individual tetrahedrons first. Let's begin with the masculine tetrahedron that points to the sun. So, if you will, command it to spin at 75% the speed of Light. And see it spinning in a counterclockwise fashion, spinning and spinning. Each rotation increases the spin and the vibration to 75% the speed of Light. Feel the spin and the vibration as it increases. The Light that begins to emanate from this tetrahedron is very expansive, spinning and spinning at 75% the speed of Light.

Pay attention to your breath. Breathe that circular breath, expanding and contracting, filling your abdomen with breath and Light. And as you exhale, feel it contract. So, as you spin the rotation in a counterclockwise manner, also be conscious of your breath.

Now, let's increase that speed to 100%. Give the command to spin at 100% the speed of Light, breathing in that circular breath, spinning and spinning and spinning, feeling the vibration expand.

And the Light that emanates is quite spectacular, spinning and spinning.

[4:40] Now, place your attention in the lower tetrahedron that points to the Earth, draws from that magnificent Earth energy. And begin to spin it at 75% the speed of Light. Give it the command: spin to 75% the speed of Light..... spinning and spinning..... breathing coherently, increasing the vibration with each rotation to 75% the speed of Light.

Notice how the Light begins to emanate..... magnificent.

Now, let's increase that spin to 100%. Give the command to increase speed to 100% in a clockwise fashion, spinning it clockwise at 100% the speed of Light. Every rotation increases the vibration and the speed to 100% the speed of Light, breathing, spinning. The Light that is emanating is so radiant. It is your vehicle.

Now, begin to merge the two spinning fields into one star tetrahedron. As they merge, they form one star tetrahedron that is very stable. And the Light that emanates as the two merge is magnified. The vehicle, your personal vehicle, is quite beautiful to behold. See how stable the star tetrahedron is. See how Light-filled it is.

As we observe the group energy, every one of you capable of spinning your star tetrahedron at that 100% the speed of Light, very stably, the Light that is emanating from the Collective Consciousness is massive. It supports each individual Merkaba field to operate at that stable 100% the field of Light.

Sit, for a moment, in your Collective, in your individual Merkaba field. And just absorb and watch the beauty of this field, the emanations of Light that come from this very stable star tetrahedron.....

Now, take a portion of your consciousness and bring it back into this call, still remaining in your Vehicle of Light.
