TOTAL RETURNS AND VOLATILITY (IQ 2003 – 2Q 2018)

Risk-adjusted returns* from PRIVATE CORE REAL ESTATE have historically complemented balanced portfolios containing stocks and bonds.

Note that private real estate values are based on quarterly appraisals.

Investors cannot directly invest in an index. Unmanaged index returns do not reflect any fees, expenses or sales charges. There are material differences between all of the asset classes represented. Past performance is not indicative of future results. There is no guarantee that any trends shown herein will continue. These investment returns reflect comparisons against substantially different underlying asset classes. Recent performance may alter these assessments or outcomes.

Core Private Real Estate is represented by the NCREIF ODCE gross total returns. NCREIF ODCE data reflects the returns of diversified, core, open-end funds including leverage and fund expenses, but excluding management and advisory fees. Corporate Bonds are represented by the Citigroup Broad Investment Grade Corporate Bond Index. Stocks are represented by the S&P 500 Index. T-bills are represented by the U.S. Government 90-day T-bill. Hedge Funds are represented by the HFRI Fund of Funds Composite Index. Commodities are represented by the S&P GSCI Total Return Index.

Historically, real estate has a LOW CORRELATION to other asset classes due to less liquidity with HIGHER AVERAGE ANNUAL RETURNS

Note that private real estate values are based on quarterly appraisals

Please keep in mind that investing in real estate involves risk. Core Private Real Estate is not traded on an exchange; therefore transactions do not provide immediate liquidity and pricing is less transparent than that of stocks. Core Private Real Estate and Public Real Estate are often referred to as non-traded and traded, respectively. Core Private Real Estate values are based on appraisals, while other investment alternative values are based upon market prices; this measurement difference may have an effect on both volatility and correlations. Correlation is a statistical measure of how two securities move in relation to each other. The higher the coefficient (1.00 is the maximum), the greater the correlation between the two markets. Core Private Real Estate is represented by NCREIF ODCE data and reflects the returns of diversified, core, open-end funds including leverage and fund expenses, but excluding management and advisory fees. An investment in JLL Income Property Trust is different than the NCREIF ODCE, which is not an investable index. Like funds in the NCREIF ODCE, JLL Income Property Trust is a diversified, core, perpetual life commercial real estate investment alternative. Public Real Estate is represented by the NTSE NAREIT US Real Estate index, Corporate Bonds are represented by the Citigroup Broad Investment Grade Corporate Bond Index, Large Cap Stocks are represented by the S&P 500 index and T-Bills are represented by the 3-month T Bill. The returns presented by the indices above represent investments that have material differences from an investment in a real estate investment trust which targets commercial real estate, particularly an investment in non-traded shares. For example, the purchase of non-traded shares can entail higher upfront selling commissions and decreased on-going liquidity as a result of the non-traded issuer engaging an independent network of broker dealers to identify potential investors. In addition, the S&P 500 Index and the Citigroup Broad Investment Grade Corporate Bond Index each are comprised of investment vehicles reflecting a broad variety of investment objectives, including short and long-term capital appreciation (typically associated with Large Cap Stocks) and risk-adjusted current income (typically associated with Corporate Bonds). Furthermore, the purchase of Corporate Bonds from certain government issuers can mitigate or eliminate the amount of federal, state or municipal taxes payable by an individual in connection with his or her investment. Investors cannot directly invest in an index. Unmanaged index returns do not reflect any fees, expenses or sales charges. There are material differences between all of the asset classes represented. For a full discussion of the investment objectives, risks, fees and expenses, liquidity and tax treatment associated an investment in shares of JLL Income Property Trust, please see the prospectus.

INCOME PROPERTY TRUST

JLL Income Property Trust is an institutionally managed real estate investment trust (REIT). The offering is perpetual and its net asset value (NAV) is calculated and posted daily at www.jllipt.com. An investment in JLL Income Property Trust gives investors access to a diversified portfolio of core commercial real estate investments. Real estate investments, such as JLL Income Property Trust, have the potential to address a portion of an investor's income needs, may enhance the overall performance of their broader investment portfolio, and offer the potential for appreciation over a longer-term time horizon.

INVESTMENT OBJECTIVES

- Generate attractive income for distribution to stockholders
- Preserve and protect invested capital
- Achieve NAV appreciation over time
- Enable the use of real estate as a component of portfolio diversification

There can be no guarantee that these objectives will be achieved. Real estate investing involves risks. Please see Risk Factors on the back page.

¹The returns have been prepared using unaudited data and valuations of the underlying investments in the Company's portfolio, which are done by our independent valuation advisor. Valuations based upon unaudited or estimated reports from the underlying investments may be subject to later adjustments or revisions. The returns are net of all advisory fees (e.g. the fixed and performance advisory fee) and Company expenses (e.g. administration, organization, legal and accounting fees, and transaction expenses) and include capital gains and other earnings. Current performance may be higher or lower than the performance quoted herein. The investment return and principal value of an investment will fluctuate so that an investment may be worth more or less than its original cost. No representation or warranty is made as to the efficacy of any particular strategy or the actual returns that may be achieved. Past performance is no guarantee of future results. Returns shown reflect the percent change in the NAV per share from the prior period, plus the amount of any distribution paid out in the period. All returns shown in the table are net of Company expenses and advisory fees and assume reinvestment of distributions. Net returns shown are net of applicable share class specific fees. Class A and A-I shares are available for brokerage accounts, subject to suitability requirements. Class M and M-I shares are available through fee-based programs, wrap accounts, registered investment advisors, and other institutional and fiduciary accounts, subject to suitability requirements. See Notes section on back page for share class specific fees.

³Fees and expenses reduce cash available for distribution. We may pay distributions from sources other than cash flow from operations, including, without limitation, the sale of assets, borrowings, or offering proceeds. To date, cash flow from operations has been sufficient to cover cumulative distributions. Year to date cumulative distributions have been funded 89% by funds from operations and 11% from the sale of assets and borrowings. Distribution payments are not guaranteed and may be modified at the Company's discretion.

⁴NAV is reported based on the fair value of assets less liabilities. Our daily NAV can be found on our website at www.jllipt.com and our toll-free line, 855.652.0277.

SUMMARY OF RISK FACTORS

You should read the prospectus carefully for a description of the risks associated with an investment in JLL Income Property Trust. Some of these risks include but are not limited to the following:

- Since there is no public trading market for shares of our common stock, repurchases of shares by us after a one-year minimum holding period will likely be the only way to dispose of your shares. After a required one-year holding period, JLLIPT limits the amount of shares that may be repurchased under our repurchase plan to approximately 5% of our net asset value (NAV) per quarter and 20% of our NAV per annum. Because our assets will consist primarily of properties that generally cannot be readily liquidated, JLLIPT may not have sufficient liquid resources to satisfy repurchase requests. Further, our board of directors may modify or suspend our repurchase plan if it deems such action to be in the best interest of our stockholders. As a result, our shares have limited liquidity and at times may be illiquid.
- The purchase and redemption price for shares of our common stock will be based on the NAV of each class of common stock and will not be based on any public trading market. Because valuation of properties is inherently subjective, our NAV may not accurately reflect the actual price at which our assets could be liquidated on any given day.
- JLLIPT is dependent on our advisor to conduct our operations. JLLIPT will pay substantial fees to our advisor, which increases your risk of loss. JLLIPT has a history of operating losses and cannot assure you that JLLIPT will achieve profitability. Our advisor will face conflicts of interest as a result of, among other things, time constraints, allocation of investment opportunities, and the fact that the fees it will receive for services rendered to us will be based on our NAV, which it is responsible for calculating.
- The amount of distributions JLLIPT makes is uncertain and there is no assurance that future distributions will be made. JLLIPT may pay distributions from sources other than cash flow from operations, including, without limitation, the sale of assets, borrowings, or offering proceeds. Our use of leverage increases the risk of your investment. If JLLIPT fails to maintain our status as a REIT, and no relief provisions apply, JLLIPT would be subject to serious adverse tax consequences that would cause a significant reduction in our cash available for distribution to our stockholders and potentially have a negative impact on our NAV.
- While JLLIPT's investment strategy is to invest in stabilized commercial real estate properties diversified by sector with a focus on providing current income to investors, an investment in JLLIPT is not an investment in fixed income. Fixed income has material differences from an investment in a non-traded REIT, including those related to vehicle structure, investment objectives and restrictions, risks, fluctuation of principal, safety, guarantees or insurance, fees and expenses, liquidity and tax treatment.
- Investing in commercial real estate assets involves certain risks, including but not limited to: tenants' inability to pay rent; increases in interest rates and lack of availability of financing; tenant turnover and vacancies; and changes in supply of or demand for similar properties in a given market.
- You should carefully review the "Risk Factors" section of our prospectus for a discussion of the risks and uncertainties that we believe are material to our business, operating results, prospects and financial condition. Except as otherwise required by federal securities laws, we do not undertake to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
- This sales material must be read in conjunction with the prospectus in order to fully understand all the implications and risks of the offering of securities to which it relates. This sales material is neither an offer to sell nor a solicitation of an offer to buy securities. An offering is made only by the prospectus.
- Investors could lose all or a substantial amount of their investment. Alternative investments are suitable only for eligible, long-term investors who are willing to forgo liquidity and put capital at risk for an indefinite period of time.
- This material is not to be reproduced or distributed to any other persons (other than professional advisors of the investors or prospective investors, as applicable, receiving this material) and is intended solely for the use of the persons to whom it has been delivered.

FORWARD-LOOKING STATEMENT DISCLOSURE

This literature contains forward-looking statements within the meaning of federal securities laws and regulations. These forward-looking statements are identified by their use of terms such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "predict," "project," "should," "will," and other similar terms, including references to assumptions and forecasts of future results. Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, and other factors that may cause the actual results to differ materially from those anticipated at the time the forward-looking statements are made. These risks, uncertainties, and contingencies include, but are not limited to, the following: our ability to effectively raise capital in our offering; uncertainties relating to changes in general economic and real estate conditions; uncertainties relating to the implementation of our investment strategy; and other risk factors as outlined in our prospectus and periodic reports filed with the Securities and Exchange Commission. Although JLLIPT believes the expectations reflected in such forward-looking statements are based upon reasonable assumptions, we can give no assurance that the expectations will be attained or that any deviation will not be material. JLLIPT undertakes no obligation to update any forward-looking statement contained herein to conform the statement to actual results or changes in our expectations.
