# ORDER FORM

## 1 What is the model of the speaker? Please provide the model in the blank.

\*List of models on page 5. If unknown, a sales representative can assist with determining the speaker model.

## 2 Do you have a required depth? If yes, please provide in the blank.

Generally 5.5 inches of depth provides enough space for wiring and conduit hole locations. See dimensions list on page 5 for more details. (See Page 1 Fig. 1 - 2 for Mason Box dimension examples)

## 3 What is the method of mounting? Please indicate whether direct through or flange mounted in the blank.

- Direct through (Mounts directly through the mason box to the rear of the build material.)
- Flange mounted (Mounts directly to the build material from the flange.)
- Both methods of mounting. (e.g. Flange mounting and thru holes on the bottom)

(Mount Method)

\*Our flange is typically perforated and extends from the sides of the mason box for embedding the mason box into a structure covering the flange with finish material, plaster, etc.

(Flange Depth)

If **flange mounted**, please indicate the depth of the flange from the front of the mason box in the blank.

\*This determines how far the Mason Box will protrude from the build material.

(See Page 1 Fig. 1 for example of flange depth)

## 4 What color is desired for the Mason Box? Please indicate color in the blank.

\*If Custom, please indicate RAL# or provider and code of paint desired.

(See page 4 for color options)

or

RAL #

## 5 What style grille is desired? Please indicate grille style in the blank.

\*If Custom, please contact sales representative.

(See Page 3 Fig. 4 – 6 for examples)

## 6 If a conduit hole(s) is/are needed, please provide the location(s) and diameter(s)\*. For example: left/right, top/bottom, back

(See Page 1 Fig. 3 for examples)

Location(s):

(left/right, top/bottom, back)

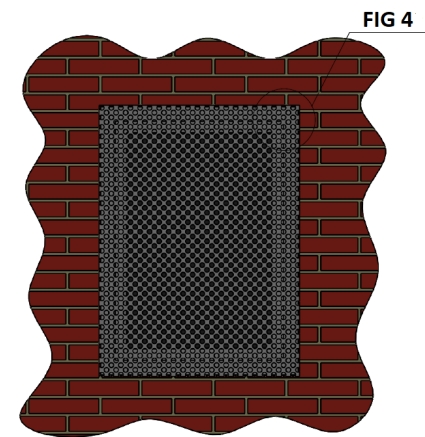

Diameter(s):

\*Overall depth may vary depending on conduit hole size.
