

To whom it may concern,

Students have a constitutional right to participate in non-disruptive protests during the school day. This means that school officials cannot retaliate against or discipline student protestors unless the protests cause, or are reasonably expected to cause, the disruption of school events or make it impossible for school officials to maintain order.

As the child's parent/guardian this letter is not only my expressed permission but an assertion of my child's right to peacefully protest in the following manner.

- Not wearing a mask/facial covering/shield
- 1.) Demonstrating concern regarding the potential health and safety issues, such as decreased oxygen levels and inhalation of harmful bacteria, that arise through mandated mask-wearing forced upon the individual; and
- 2.) Constitutional rights, Natural Law, exercising Free Will, The right of Conscience Act of Illinois, HIPPA-patient/doctor privacies, medical exemptions, informed consent

My child is not to be sent to the office. I do not give my child permission to leave campus. My child shall not be harassed, bullied, or treated differently by any teacher, administrator, faculty, or student for standing up for his/her right to peacefully protest the mask mandates. If any teacher or administrator takes issue with my child's right to protest, please contact me to meet with them and the principal to further discuss.

The Archdiocese of Chicago protocols and forced illegal mandates do NOT hide behind informed consent. Zero data has been made public, in fact the Archdiocese has encouraged its staff to ignore parental and all other enquiries that question their current unconstitutional Covid-19 mandates.

CDC replaced the PCR test on 1-1-2022 due to its failure to act as a diagnostic test for Covid-19. It was always intended to be used for research purposes and nothing more due to the manipulations of its magnification cycles by the person(s) performing the test.

CDC also deemed the cloth masks as useless by shifting to N-95/KN-95(which still provide limited protection and must be professionally fitted by a medical professional to maximize efficacy) proving the entire Covid protocol/unconstitutional illegal mandates are actually detrimental to our children's health and if these mandates continue then the Archdiocese of Chicago will be held responsible for ANY adverse health effects that has come from them.

Regards,
