Gravograph m20 user guide

Da's programmas Word funkcijas nevar par'dt pakalpojum' Google dokumenti un, i veiksit izmai'as, t's tiks atnestasSkat't detaliz'tu inform'ciju M20 series is the perfect solution for customizing jewelry (rings, bracelets, ...), souvenirs (pens, key rings, watches ...), recording photos (medals, lighters, ...) and making small labels (CE plate, mailbox labels, electric tape...).

Ultracompact, M20 is ideal for customizing objects and performing small industrial engraving work on various materials (aluminum, gold, copper, silver, plastic, etc.). Lightweight, quiet and transportable, it can accompany you during events such as ceremony, fairs or other events... Available and modular mechanical engraving machine. Do you start your business? Want to diversify your business? Thinking about completing a machine park? Or just change your working tools? M20 is the solution for you! Compact, discreet and lightweight, its compact size makes it easy to install in a store or small workshop. It is equipped with numerous tools and accessories for light engraving with diamond tip, deep engraving with customized cutters and cutting of fine materials. Modular machineExceive to your expectations, the M20 mechanical engraving machine evolves according to your needs and markets with additional modules and accessories. If you buy a machine for your current app, Gravograph will accompany you in the evolution of your business. You will be able to complete your initial setup with the addition of additional modules (feather set, wedding ring engraving, etc.). StrongThis rotary engraving machine uses a new solid bridge and a stronger shaft. The industry-created M20 design guarantees durability and durability. Designed with customer safety and elegance in mind, so you can adapt to any retail space. The combination of these two elements into one machine gives the M20 the heart and inner workings of industrial power, but the look and design that allow it to enter luxury boutiques where customers can admire and observe how their purchase becomes unique. The easy-to-use M20 is very easy to use, simple to use and is designed to eliminate any risk of error, from engraving design to finished recorded part. With gravograph's innovative solutions, you can directly engraver objects of different shapes and materials (e.g. curved bands) with gravograph's innovative solutions: surface tracking with the tip unit, auto-Z object height detection, positioning simulation and engraving with Point & Shoot.As when it comes to tooling, we move from a limited range a la escritura pequena a una gama profesional más amplia (One Cut, TwinCut) que abre la posibilidad de herramientas de corte y taladrado manteniendo los estándares de la gama anterior. Más de 200 de nuestros puntos de venta están ahora equipados con la máquina M20. En nuestra búsqueda de una máquina compacta, confiable y fácil de usar, hemos elegido esta solución equipada con el servicio y la seriedad de un proveedor reconocido. En los próximos años, muchos talleres estarán equipados con una máquina M20 a medida que nuestras actividades de grabado continúen expandiéndose.
