

Learn Today, Prevent Tomorrow!

Infection Control for the Dental Professional

Are you confident that your practice would pass an infection control inspection today?

No one wants to risk the practice-endangering challenges and penalties that occur as a result of poor infection control protocols. These protocols exist to keep the patient and healthcare team safe from disease transmission and workplace hazards. It is essential to cultivate a practice culture where excellent infection control is the standard.

In this essential course, India Chance, RDH, CDIPC provides detailed instruction on CDC recommended infection control practices and certain safety engineering controls for dental practices as required by OSHA. The attendee will gain the knowledge to recognize, comprehend, and apply the recommended and required guidelines put forth by the CDC and OSHA.
