

meaningful SPEECH

Course for SLPs, SLPAs, and related professionals

Why is this child still scripting and what can I do to support their communication?

Why isn't my approach working for this child?

Why does this child seem to process language differently?

If these are questions you find yourself wondering, consider this course:

meaningfulspeech.com/course

What is it?

This is a self-paced course that will teach you how to confidently **identify, evaluate,** and **work** with any child who communicates with **delayed echolalia** (often referred to as **scripting**).

Why should I take it?

Did you know there are **TWO** ways to develop language? Children who communicate with **delayed echolalia** (often called scripting) are **gestalt language processors**, not **analytic language processors**. Their language development is a bit different and requires different language support. Both types of language development have the same final destination, though - flexible, original language! This course was created to help SLPs, parents and other professionals understand child-led therapy, gestalt language processing and learn the Natural Language Acquisition (NLA) framework, developed by Marge Blanc (2012), to help support kids on their language development journey.

What's included?

1. **Overview of the two ways to process language** (gestalt language processing and analytic language processing)
2. Learn how to **identify gestalt language processors**
3. Learn the **Natural Language Acquisition framework** (Blanc, 2012)
4. Develop an **in-depth understanding of the four main stages of Natural Language Acquisition**
5. Develop the skills to **assess and write reports and goals** for gestalt language processors
6. Understand **child-led therapy** and maximizing opportunities for spontaneous language
7. Learn from experts in the field in all of our **Lunch and Learn Interviews**
8. **Bonus Modules: learn about areas related to gestalt language processing** from experts in the field. The topics covered are **AAC, motor planning, sensory processing, autism, and MORE!**

meaningful SPEECH

Course for SLPs, SLPAs, related professionals, and parents

meaningfulspeech.com/course meaningfulspeechregistry.com

Meaningful Speech is the place you will be guided, step-by-step, from **understanding** → **assessment** → **supporting kids**.
