Our goal is to help one million people reach their goals every day with the power of comprehensive assessment driven by data.

ABOUT MAT

At MAT (Movement Assessment Technologies), we love MOVEMENT ASSESSMENT, the LATEST RESEARCH and OBJECTIVE DATA.

We love it so much that we've combined these three things together to bring you our world-leading courses and the world's number one Movement Assessment Tool - The MAT®.

Since our inception, MAT has run courses in over 30 countries, helping 30000+ health and fitness professionals from 20+ different professions bridge the gap between pain and performance, improving their movement assessment, treatment and training skills.

Quickly we learnt that this struggle to bridge the gap was common to therapists and trainers all around the world. With Universities and higher education institutes often being very slow to implement the latest evidence and assessments into their curriculum, therapists and trainers are often left with out-of-date knowledge on how to best help their patients and clients.

MAT steps in to change this through cutting-edge courses and innovation with the MAT and other assessment and training tools, which are currently being integrated into research projects in seven Universities worldwide (that we know about).

We are proud to say that we are now the number one educational provider in the world for evidence-based, objective movement assessment and rehabilitation and getting closer to our goal of helping one million people every day through the people who study our courses and use our products.

Stephen King

Founder - MAT

Anker™

Anchor Your Assessment. Lay the Foundation for High-Performance Results.

The Anker™ is a premium anchored strength testing system designed to deliver accurate, stable and repeatable results — without complicating your workflow.

For too long, strength testing devices have been expensive, awkward to set up, or inconsistent in how force is applied. With four integrated load cells and a compact, easy-to-anchor design, the Anker provides rock-solid testing stability across a wide range of movements.

When paired with the Measurz app, you can assess peak force and performance metrics in real time, compare results to normative data, and track progress over time — helping you educate clients, guide rehab, and optimise performance with true confidence.

TECHNICAL SPECS

⚠ LOAD CAPACITY: 150kg (330lbs) per side

🎯 ACCURACY: 99.5% (independently NATA certified)

🕒 SAMPLING RATE: 500hz

🔍 RESOLUTION: 100g (1N)

📏 MEASUREMENTS:

On Device:

- Peak Force (kg, lb)

Measurz App:

- Peak, Average, Static Endurance & Dynamic Endurance Force (kg, lb), Endurance Fatigue Index (%), RFD (kg/s), Impulse (kg.s), Torque (Nm), Rate of Torque Development (Nm/s), Time to Peak (secs),

⚡ BATTERY: 1200mA Lithium Battery

🔋 BATTERY LIFE: A long time! (charge every 2-3 months)

🔌 CHARGER: USB-C 5V (cable included)

🔧 FUNCTION: Compression (4x load cells)

📡 CONNECTIVITY: BLE 5.3 to Measurz app

⚖️ WEIGHT: 2.5kg

📐 DIMENSIONS: 595mm x 160mm x 60mm

👉 WARRANTY: 12 months

📱 COMPATIBILITY: Measurz app on iOS, iPadOS, macOS (M1+) & most Android devices

Anker Independent Testing Results

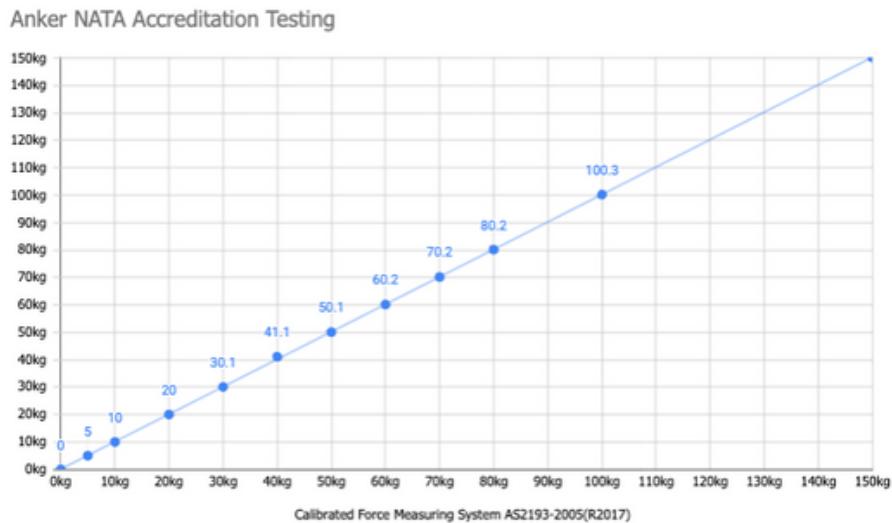

The Anker™ has been thoroughly tested both internally and externally to ensure the high quality and accuracy of the product. These methods include calibrated weight and machine-driven testing processes by leading companies in the field to the highest industry standards.

Across testing, the Anker™ consistently tests at 99.5% accuracy throughout its capacity ranges, with validation for two years against these industry standards. Each device also has a built-in calibration mode, should users wish to recalibrate themselves in the future.

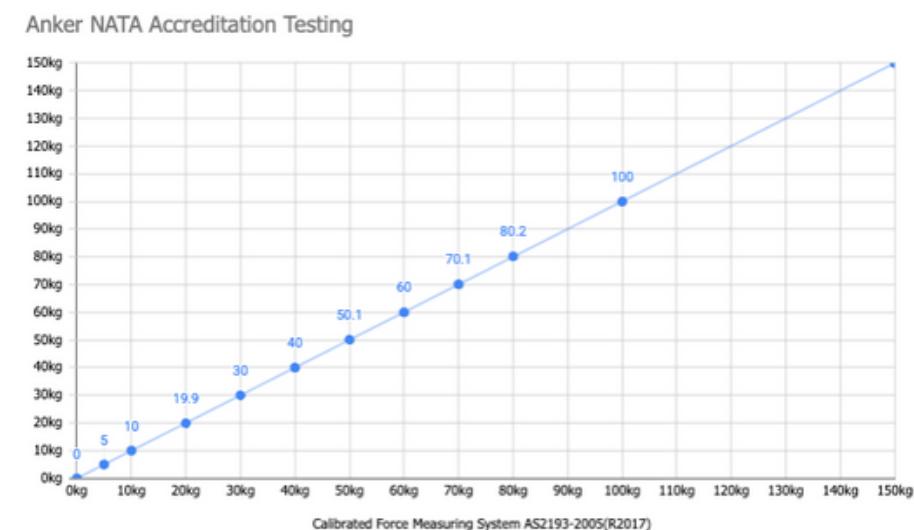

With these testing results, we're confident that Anker™ is not only one of the most affordable multi-cell devices on the market but also one of the most accurate at the lowest cost.

Below is some of our data from our external NATA ISO standard testing.

MEASURZ

APP

 Power Up The Anker™ With The World's Most Complete Assessment System

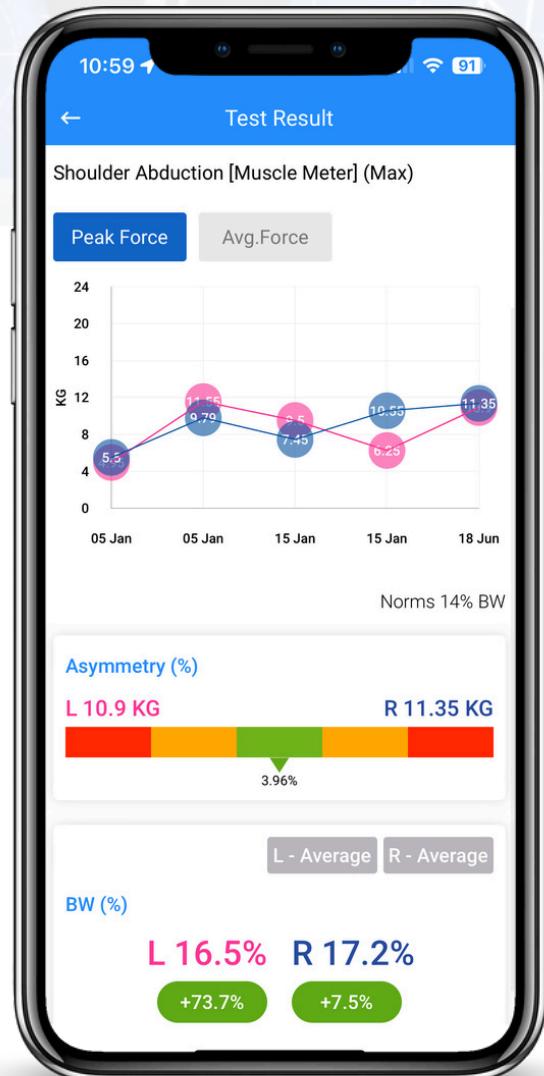

Our Measurz app takes the Anker™ to the next level.

Power up the Anker™ with our Measurz app to unlock new testing modes, allowing you to improve client outcomes. Easily communicate progress with client-centric results.

The Measurz app also allows you to perform over 1000 tests with your clients on all of the different aspects of Functional Performance Testing, including:

- Outcome Measures
- Flexibility + ROM
- Balance + Proprioception
- Strength
- Power
- Speed
- Endurance
- Aerobic + Anaerobic Fitness
- Wellness + more

The Measurz app is designed to optimise your workflow to perform assessments quickly and help enhance your communication with your clients.

“If you’re not measuring when assessing....you’re guessing!”
